14.3 Advanced Search 148
14.4 Search Results - Projects 150

Definitions

Adjustment	A Project that has been approved in the GAA may be changed under certain circumstances, with the approval of the Secretary and/or the MYPS AUC Coordinator. Typically, an Adjustment may include minor changes and/or correction of a Project or its Component details, and completion of missing data. Such changes will have no impact on GAA details.
Augmentation	Augmentation is the act of the constitutional officers authorized to use savings in their respective appropriations to cover a deficiency in any existing P/A/P within their respective offices.
Errata	Errata are changes, additions or deletions of Projects in the National Expenditure Program (NEP), prior to the House General Appropriations Bill (HGAB).
Future Bridge ID	A unique code given to a new bridge yet to be constructed. Only after a project on a Future Bridge is complete, will the new bridge be recorded as an asset and assigned a Bridge ID in the Road and Bridge Information Application (RBIA).
Future Road ID	A unique code given to a new road yet to be constructed. Only after a project on a Future Road is complete, will the new road be recorded as an asset and assigned a Road Section ID in the Road and Bridge Information Application (RBIA).
Amendments	Amendments are new Projects added, or changes made, to the House General Appropriations Bill (HGAB), prior to the General Appropriations Act (GAA).
Major Final Output Superseded in 2018 by Organizational Outcome	A good or service that an agency is mandated to deliver to external clients / stakeholders through the implementation of Programs, Activities and Projects (PAPs).
Modification	A Project that has been approved in the GAA may be changed under certain circumstances, with the approval of the Secretary and/or DBM. Typically, a Modification may include minor changes in stationing of a Project, or a change in target, but within the same Project Category, or a change in the Operating Unit (if DBM approved).
Multi-Year Obligational Authority	Refers to an authority issued by the DBM to enable an agency to enter into a multi-year contract whether for Locally Funded Projects or Foreign Assisted Projects.
Non-Project	Non-Projects are projects that are not strictly Capital Outlay projects (i.e. they do not extend the life of an asset by more than one (1) year). Examples of Non-Projects are those involving maintenance or supply of equipment and/or

	materials, where the materials are not part of a specific infrastructure project, or their final destination cannot be identified; and dredging or desilting projects.
Originating Agency	The government organization responsible for identification and planning of the Project.
Project	A Project is a special agency undertaking within a definite timeframe and which is designed to produce pre-determined works, goods or services. A civil works project includes the construction, improvement, rehabilitation, demolition, repair, or restoration of roads, bridges, flood control structures or other types of infrastructure. A Project must extend the life of an asset by more than one (1) year.
Project Component	A distinct element of a Project that needs to be tracked separately for management and monitoring purposes. Valid types of Project Component include Feasibility Study, Detailed Engineering Design, Civil Works, Right of Way, and Engineering Administrative Overhead. Separate types of infrastructure (such as roads and bridges) must be identified as separate Components.
Project ID	Unique identifier given to a Project in MYPS. This identifier is assigned by the user upon entry into MYPS. A project carries this Id from initial identification as a potential project, through approval in a program, through implementation, and final completion. The same Project ID is used by other systems in the Department including the Design Management Application (DMA), the Project and Contract Management Application (PCMA), and the electronic Project Life Cycle (e-PLC) application. DMA is still currently under development.
Realignment	The allocation to a Project that has been already approved in the GAA may be realigned to another Project under certain circumstances with the approval of DBM. Typically a Realignment includes a change in Implementing Office, or a change in Project Category or change in Location. See also Modification. The term Realignment was discontinued from FY 2018 onward.
Rehabilitation	Types of work which restore structural capacity and performance, and/or enhance safety. These types of work are applicable to infrastructure in poor or bad condition. In the case of pavement, this shall not extend into the subgrade. In the case of flood control, this includes dredging.
Repair	Reactive, simple, small-scale activity to mend a minor damaged portion of an asset to a good or sound condition comparable to

	that before the damage occurred, which is typically funded from Maintenance and Other Operating Expenses (MOOE). As opposed to Rehabilitation of Infrastructure, or Capital Project for Equipment, Repairs do not change the fixed asset or its performance.

Abbreviations and Acronyms

AUC	Application User Coordinator
BAR	Budget Accountability Report
BED	Budget Execution Document
BP	Budget Proposal
CS	Consulting Services Component
CWD	Design Component of a Design and Build Project
DBM	Department of Budget and Management
DED	Detailed Engineering Design
DEO	District Engineering Office
DPD-PS (or DPD)	Development Planning Division - Planning Service
DPWH	Department of Public Works and Highways
DR	Dredging of Desilting Component
EAO	Engineering and Administrative Overheads
FCIA	Flood Control Inventory Application
FCS	Flood Control Structure
FS	Feasibility Study
GAA	General Appropriations Act
GIS	Geographic Information System
GOP	Government of the Philippines
HGAB	House General Appropriations Bill
LD	Legislative District
LS	Lump Sum Project
MCA	Multi-Criteria Analysis
MYOA	Multi-Year Obligational Authority
MYPS	Multi-Year Planning and Scheduling Application
NEDA	National Economic and Development Authority
NEP	National Expenditure Program
OTH	Other Component
PAP	Program – Activity - Project
PCMA	Project and Contract Management Application
PD-PS or PD	Programming Division - Planning Service
PIP (alias PDP)	Public Investment Program (Philippine Development Plan)
PPC	PIP Planning Coordinator
PS	Planning Service
RBIA	Road and Bridge Information Application
RBP	Regional Budget Proposal (see also UBP)
RDIP	Regional Development Investment Program (see also UDIP)
ROW	Right of Way
SD-PS	Statistics Division - Planning Service
UACS	Unified Accounting Code Structure
UBP	UPMO Budget Proposal (see also RBP)
UDIP	UPMO Development Investment Program (see also RDIP)
UPMO	Unified Project Management Office

1 Introduction

1.1 Background

This is a companion document to the Multi-Year Planning and Scheduling Application (MYPS) Application Design Report and MYPS Process Design Report. The MYPS application has been running in the Department of Public Works and Highways (DPWH) since 2003 in various forms and has undergone a number of enhancement stages. The most recent development phase involved the interfacing of the MYPS application with the DPWH's Project and Contract Management Application (PCMA). Whereas the MYPS is the planning tool for preparing programs of predominately capital works projects for the Department and other Departments managed by DPWH, PCMA monitors the implementation and completion of the Civil Works components of those projects.

The web-based MYPS will largely mirror the existing Visual Basic application however this redevelopment will make available the use of later technology, web-based application features, graphics and easier maintenance and interfacing with the other applications within DPWH.

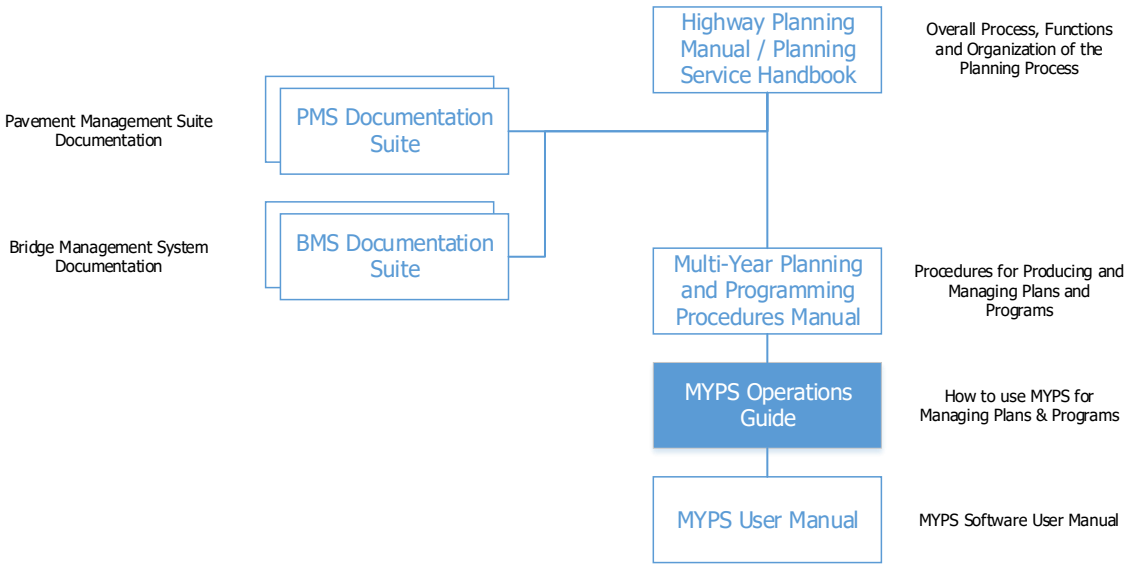

This report presents MYPS screens and menus from the existing MYPS application and non-prescriptive mock up designs for the web version. Information on existing Data validation and Business Rules and should prove useful during the development of the Web version.

1.2 Related Reports

This report is one of a series of reports prepared in relation to the enhancement and implementation of the MYPS within DPWH. The reports related to the MYPS are:

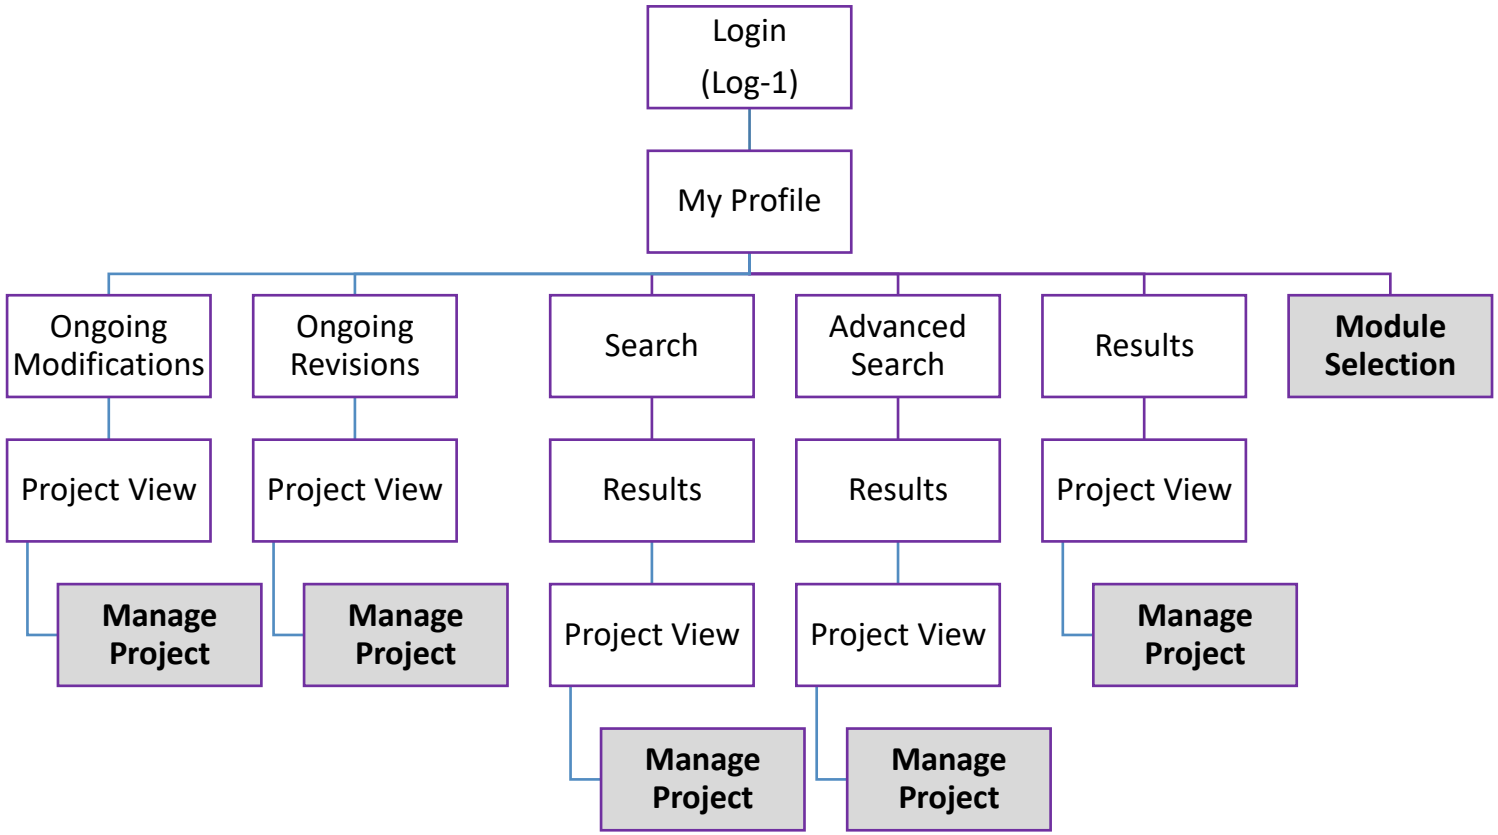

- MYPS Process Design Report
- MYPS Application Design Report
- MYPS Screen Design Report
- MYPS Publishing Interface Design.
- MYPS Operations Guide
- MYPS User Manual
- MYPS Acceptance Test Plan

Other related documentation is shown in the following Document Map.

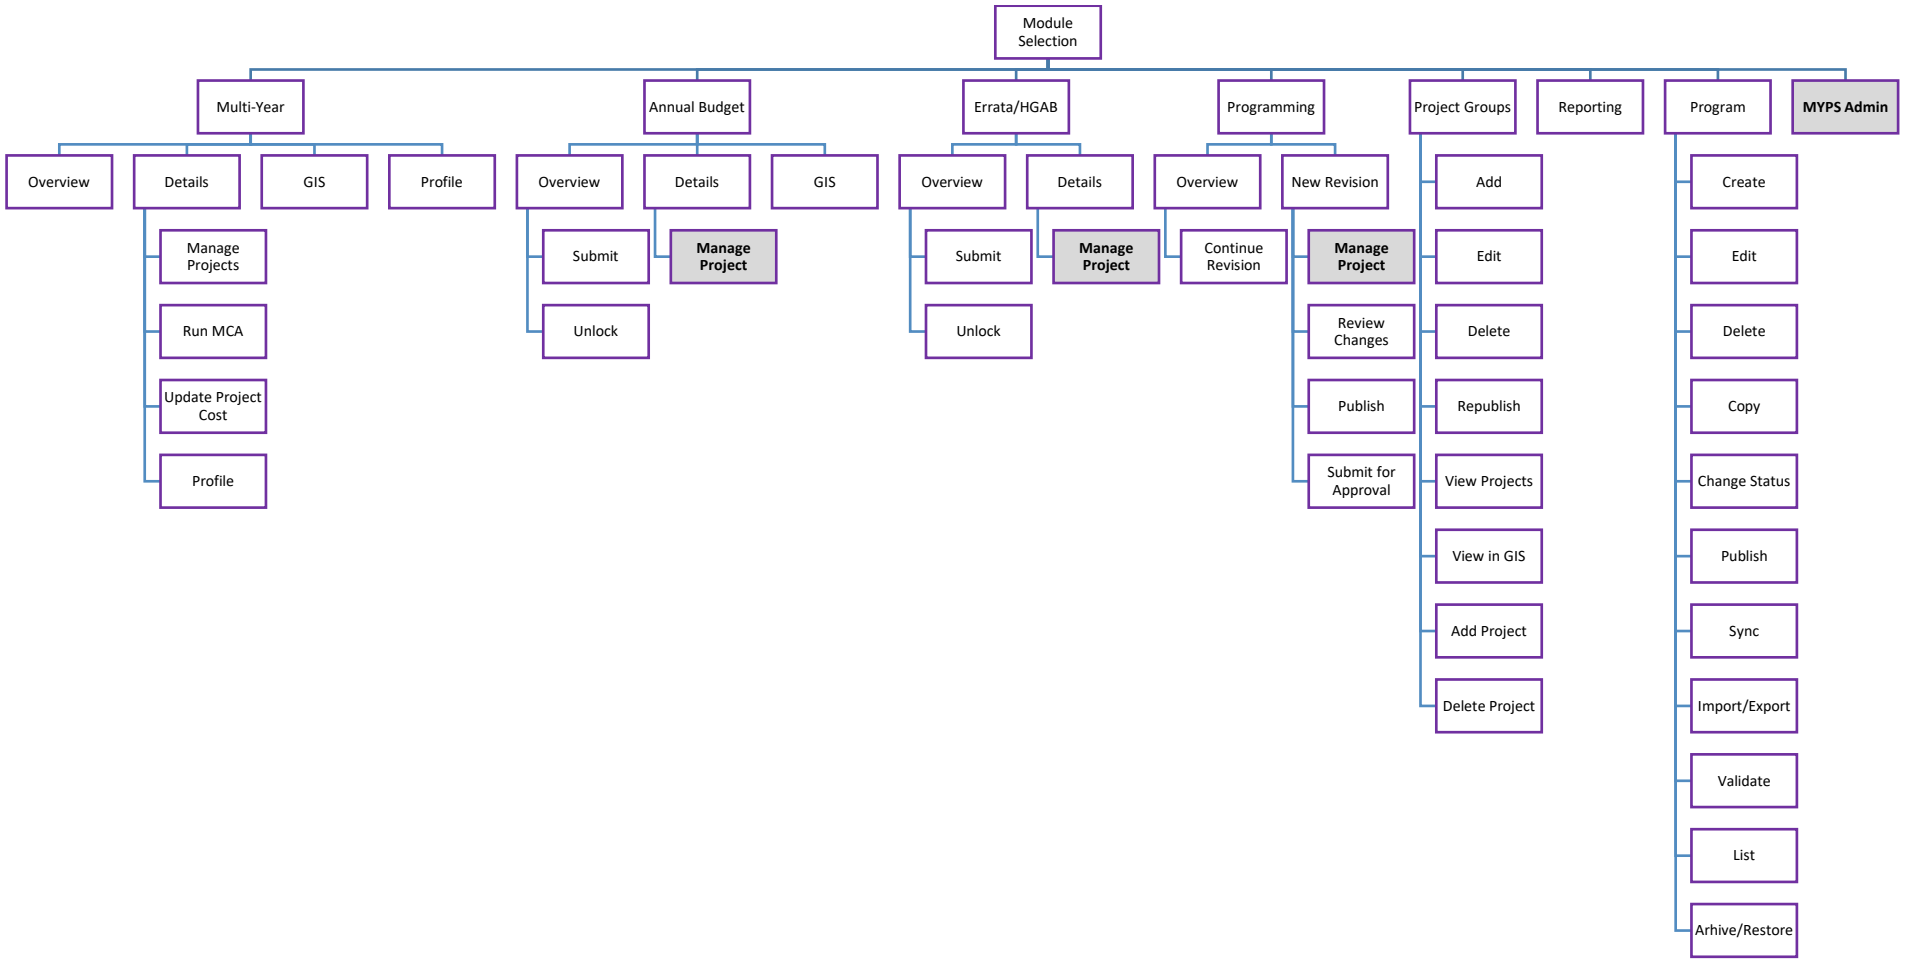

2 Site Index

2.1 Log In

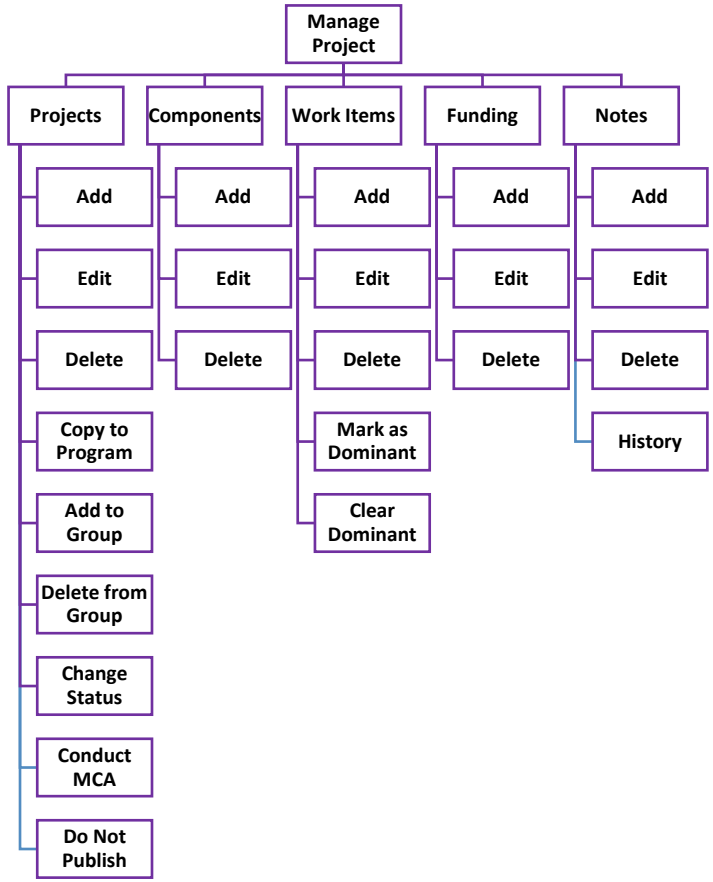

"Module Selection" and "Manage Project are presented on the following pages.

2.2 Module Selection

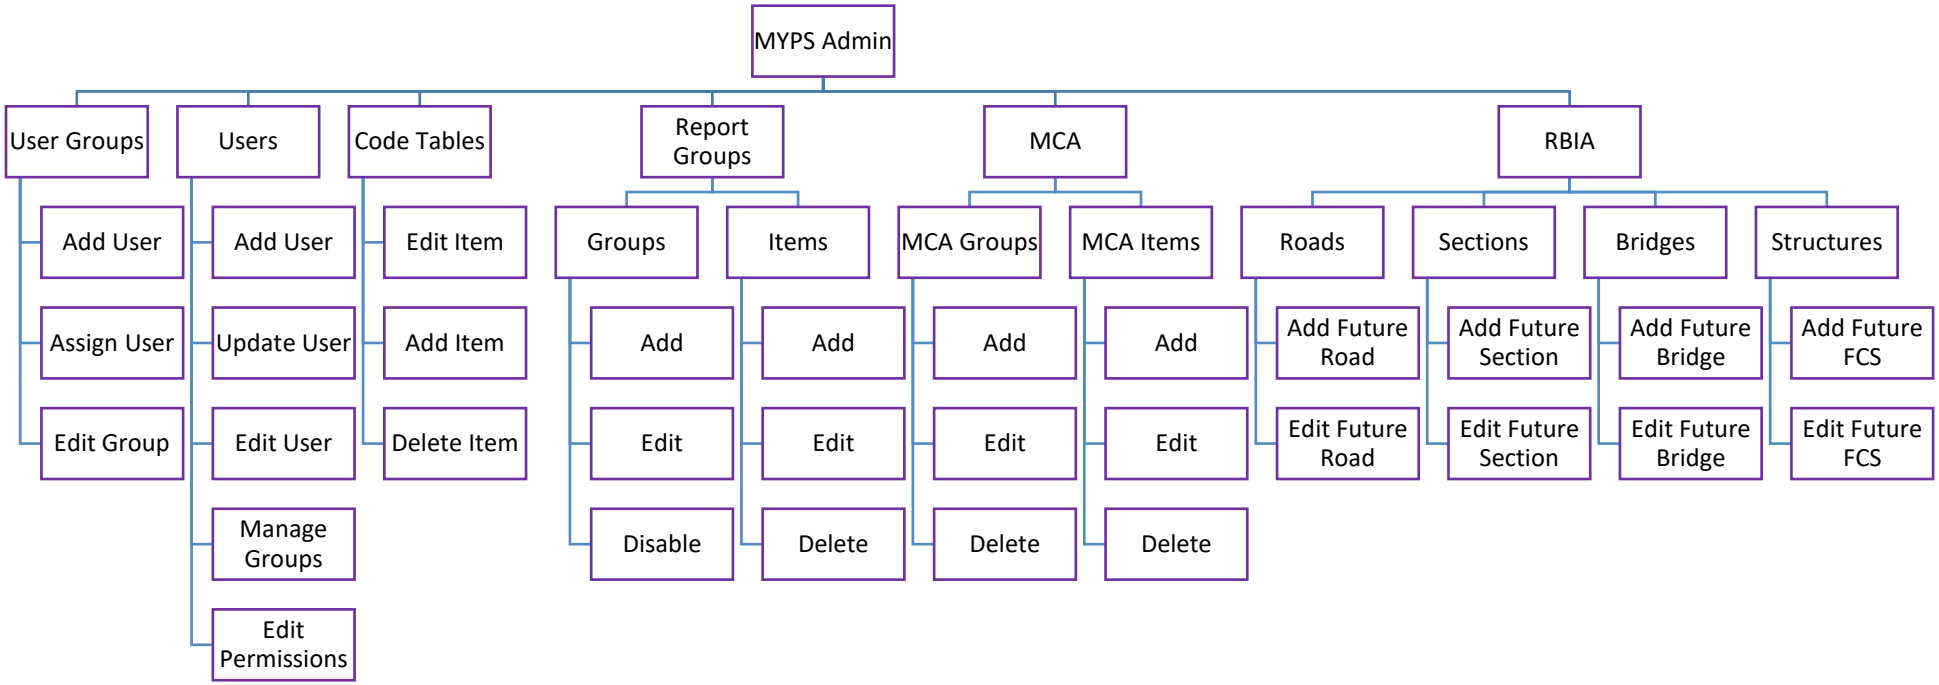

"Manage Project" and "MYPS Administration" are presented on the following pages.

2.3 Manage Project

"MYPS Administration" is presented on the following page.

2.4 MYPS Administration

3 Common Elements

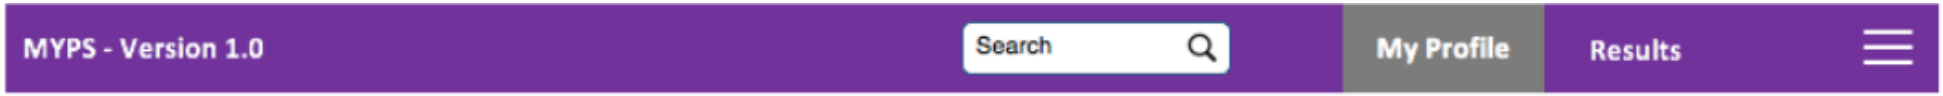

3.1 MYPS Frame

The frame common to most MYPS web pages shall be of the following form.

Field Name on Menu	Comments
1. Title	The full application title – only shown until the User is logged in
2. Log in	Shows the Login page
3. 	Shows the main function menu – inactive until logged in

Depending on the module being viewed additional elements will be displayed.

Field Name on Menu	Comments
1. Title	The abbreviated application title
2. Search	Allows a search for a Project ID, or selection of an advanced search screen
3. My Profile	The My Profile page displays the User details, current open Revisions
4. Results	Shows a list of recent search results, allowing the User to choose a project to view.
5. 	Shows the main function menu – inactive until logged in

3.2 Main Module Selection

The following popup is display when the icon is selected. The options are:

Field Name on Menu	Comments
1. My Profile	Displays the My Profile page
2. Multi-Year Planning	Starts the Multi-Year Planning module - for RDIP/UDIP and PIP management
3. Annual Budget Propsoal	Starts the Annual Budget Proposal module - for RBP, UBP and BP management
4. NEP with Errata	Starts the NEP with Errata module – for preparation of NEP with Errata
5. HGAB with Amendments	Starts the HGAB with Amendments module – for preparation of HGAB with Amendments
6. Programming	Starts the Programming module – for applying Revisions and general Project management
7. Project Groups	Starts the Project Groups module – for managing Project Groups
8. Reporting	Starts the Reporting module
9. Program Management	Starts the Program module - for managing all aspects of Program
10. MYPS Administation	Starts the Administration module - for managing User, User Groups, Code and Report tables, structures

Field Name on Menu	Comments
11. Projects	Starts the Projects module - for general management of Projects
12. Sign out	Logs the User out of MYPS and returns to the Login page

3.3 Design Elements

A number of the modules have very similar functionality and there shall be consistency in the design and use of these modules e.g. Project management for:

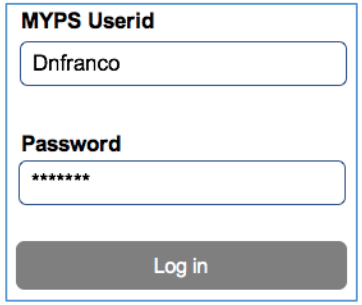

- Multi-Year Functionality
- Annual Budget Preparation
- NEP and HGAB revisions stages
- Programming of Revisions to GAA
- General review and edit of Projects

The developer shall use standard font sizes, and colors schemes throughout. The fonts and sizes, use of menus, etc. shall be approved by the DPWH prior to full system development. It is recommended that a mockup version be prepared which shall give the DPWH a strong sense of the look and feel of the proposed application.

4 Login Procedure

4.1 Login Screen (Log-1)

The Login screen allows registered Users to log into access the MYPS application.

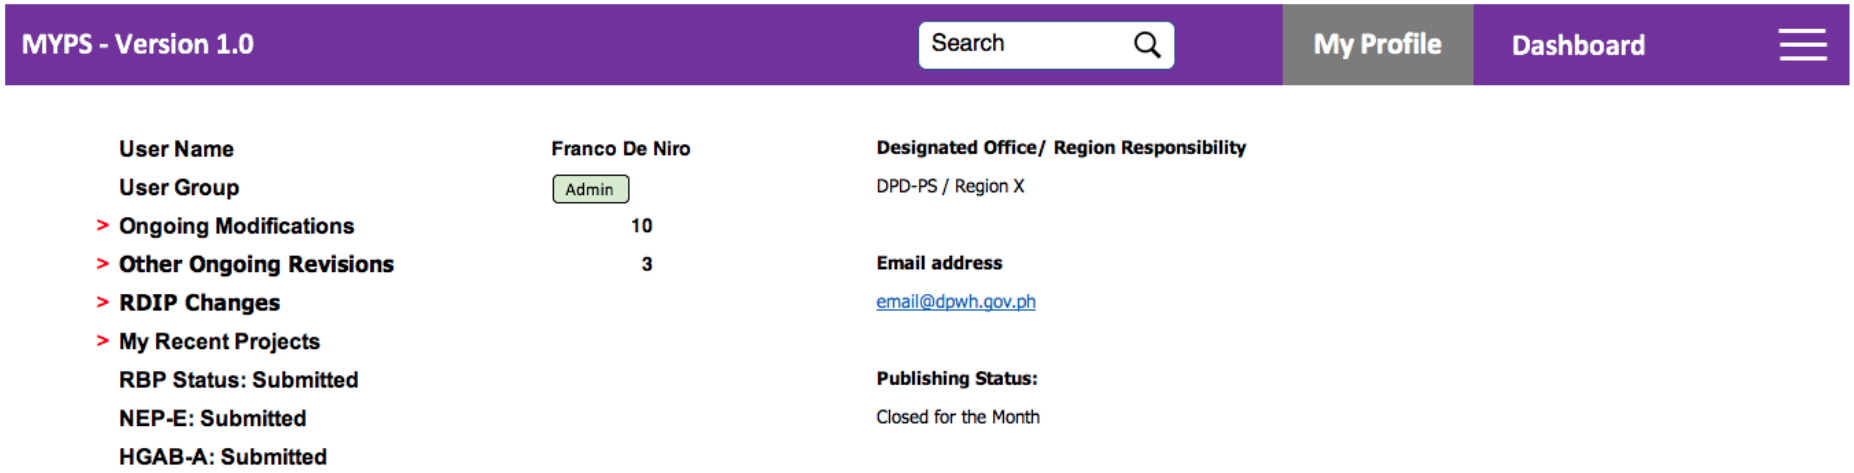

Field Name on Screen	MYPS Table	Source	Data Rules
1. MYPS Userid *	Mypsuser: userid	User entered	MYPS checks the Userid and password entered against that stored in MYPS. Disabled Userids will not be allowed to log in and a suitable warning given.
2. Password *	Mypsuser: password	User entered	

Menu Item	Enabling Rules	Action
1. Log in	Always	If userid and password combination match those stored in the MYPS, then apply the Security Permissions for that user, and open the My Profile screen; otherwise indicate invalid Userid and prompts user to re-enter username and password.

4.2 My Profile

This screen is the initial screen after logging in and gives a summary of recent activities, and uncompleted tasks.

Field Name on Screen	MYPS Table	Source	Data Rules
1. User Name	Mypsuser: name	Logged in User	Disabled: A user can be in more than one User Group.
2. User Group	Mypsuser: usertype		
3. Designated Office/Region of Responsibility	Mypsuser: Office		Office and Region for which this User is responsible
4. Email Address	Mypsuser: email		
5. Ongoing Modifications	Transaction_log and History	Count of unpublished Modifications for the User	may be 0
6. Other Ongoing Revisions		Count of unpublished non-modification revisions for the User	may be 0
7. RDIP Changes		Indicates unapproved RDIP changes	
8. My Recent Projects		Displays a popup list of recent project selections	
9. RBP Status		Indicates RBP Status	
10. NEP-E Status		Indicates NEP-E Status	
11. HGAB-A Status		Indicates HGAB-A Status	

Field Name on Screen	MYPS Table	Source	Data Rules
12. Publishing Status		Indicates whether Publishing permitted	The close off for a month is set by the MYPS AUC

Menu Item	Enabling Rules	Action
1. Ongoing Modifications	Always	If Ongoing count is not 0, displays list of ongoing Project Modifications by the User
2. Other Ongoing Revisions	Always	If Ongoing count is not 0, displays list of ongoing Project Revisions (non-modification) by the User
3. RDIP Changes	Always	Displays a list of new RDIP changes
4. My Recent Projects	Always	Displays a list of recent Project activity (last 5 recorded and remembered from previous sessions, or last search results (only from current session)

4.3 Ongoing Revisions

This popup is shown when the user selects the Ongoing Revisions action.

Unfinished Modifications			
Project	**Description**	**Date Started**	**Reason**
P00200301LZ	Construction of Local Roads for Limbo, Sultan Kudarat, Maguindanao	04/23/2018	Project Description Typo
P00146600MN	Construction of Multi-Purpose Building, Barangay Tunggol, Datu Montawal, Maguindanao	5/02/2018	Station Limits
P00146602MN	Construction of Multi-Purpose Building, Barangay Dungguan, Datu Montawal, Maguindanao	06/15/2018	Component Cost

Field Name on Screen	MYPS Table	Source	Data Rules
1. Project	Transaction_log and History	Logged in User	All fields are disabled; however a the table elements can be highlighted and copied, or a row selected.
2. Description	Project		
3. Date Started	Transaction_log and History		
4. Reason	Transaction_log and History		

Upon clicking on a Project row, the User is shown the Project View Screen.

5 MYPS Administration

5.1 MYPS Administration Module

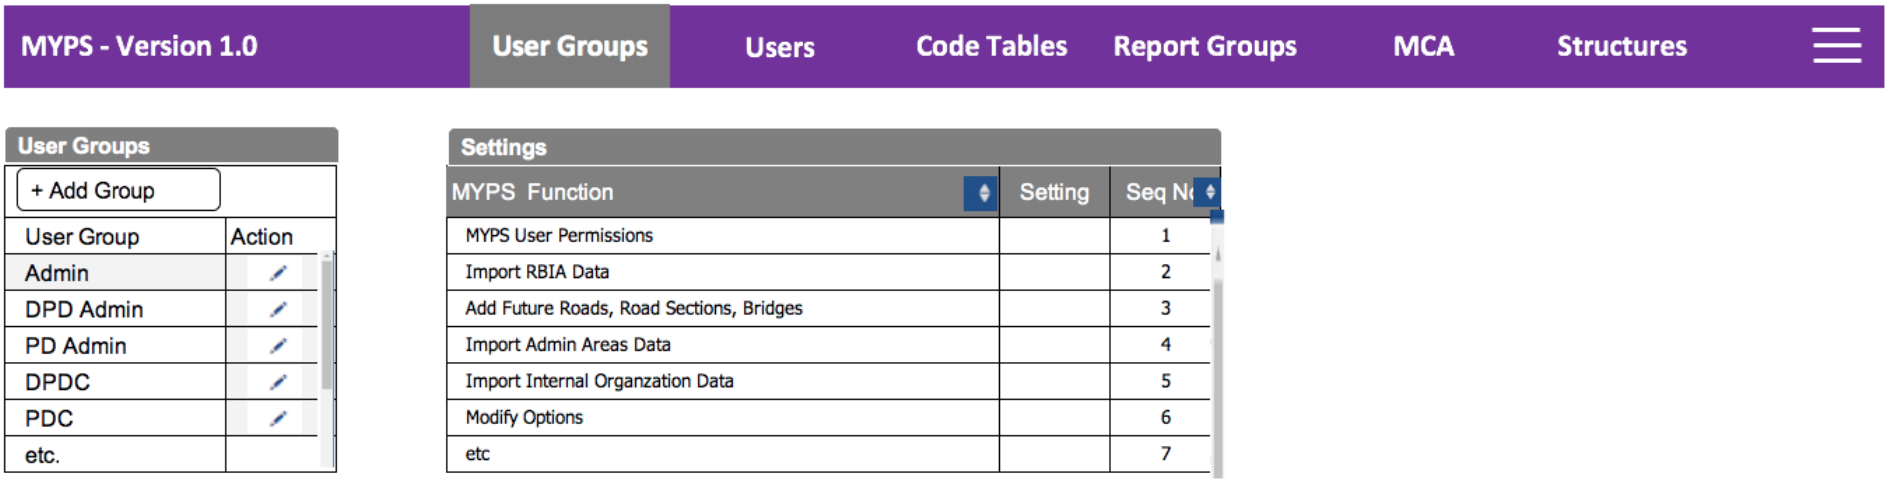

This screen is the same for all actions within the MYPS Administration module.

Field Name on Menu	Comments
1. User Groups	Selects the User Groups page (see 5.2)
2. Users	Selects the Users page (see 5.3)
3. Code Tables	Selects the Code Tables page (see 5.4)
4. Report Groups	Selects the Report Groups page (see 5.4)
5. MCA	Selects the Multi-Criteria Analysis (MCA) page (see 5.6)
6. Structures	Selects the Structures page (see Section 6 (for RBIA and FCIA data)
7. 	Shows the main function menu

5.2 User Groups Screen

This screen presents the User Groups and Management options.

A list of User Groups, and the permission settings for a selected Group are shown.

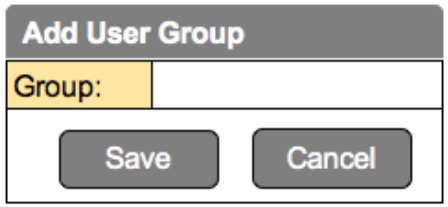

Field Name on Screen	MYPS Table	Source	Data Rules
1. User Group *	Mypsuser_security_ug: usertype	Input from user	Mandatory; unique
2. Action		See User Group Actions	User selects to display Action options
3. MYPS Function *			Disabled
4. Setting	Mypsuser_security_ug or Mypsuser	File choice depends on whether a User Group or a User permissions are being edited	Enabled: User assigns permission to use the function
5. Sequence Number *	Mypsuser_security_ug or Mypsuser	Input from user	User selects to display Action options

The User Group actions are tabled below and described following:

Group Item	Action	Description
UserG-1	Add	Creates a new User Group
UserG-2	Edit	Edits the specific permission of the User Group
UserG-3	Assign	Assigns or unassigns Users to/from the selected Group

5.2.1 Add User Group (UserG-1)

This function will add a new User Group to the MYPS application.

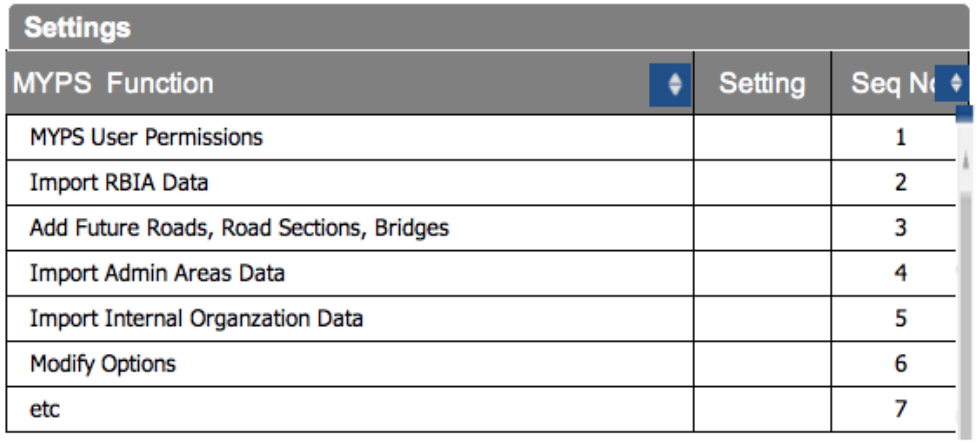

Field Name on Screen	MYPS Table	Source	Data Rules
1. User Group *	Mypsuser_security_ug: usertype	Input from user	Mandatory; unique

Menu Item	Enabling Rules	Action
1. OK/Save	Always	Validate the User group, and save if ok
2. Cancel	Always	Exit the popup without saving any changes

5.2.2 Edit Permissions (UserG-2)

This function permits updating of User Group or User Permissions. This screen shall show the full list of permissions as defined in other documents.

Settings

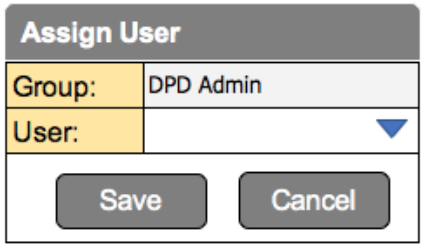

MYPS Function	Setting	Seq No
MYPS User Permissions		1
Import RBIA Data		2
Add Future Roads, Road Sections, Bridges		3
Import Admin Areas Data		4
Import Internal Organzation Data		5
Modify Options		6
etc		7

Menu Item	Enabling Rules	Action
1. MYPS User Permissions	Only if Edit User Group is checked	If checked, allows Users in the currently selected User Group to edit permissions.
2. Import RBIA Data		If checked, allows Users in the currently selected User Group to Import RBIA data from the RBIA
3. Add Future Roads, Road Sections and Bridges		If checked, allows Users in the currently selected User Group to add Future Roads, Sections and Bridges
4. Import Admin Areas Data		If checked, allows Users in the currently selected User Group to Import Admin Areas data from the Administrative Areas Management Application database to MYPS internal tables
5. Import Internal Organization Data		If checked, allows Users in the currently selected User Group to Import Internal Organization Management System data from the IOMS database to MYPS internal tables
6. Modify Options		If checked, allows Users in the currently selected User Group to Modify the Options (lookup tables) from the MYPS interface
7. Create Program		If checked, allows Users in the currently selected User Group to Create a Program
8. Copy Program		If checked, allows Users in the currently selected User Group to Copy a Program

9. Delete Program		If checked, allows Users in the currently selected User Group to Delete a Program
10. Modify Program		If checked, allows Users in the currently selected User Group to Modify a Program (its name, start year etc.).
11. Change Program Status		If checked, allows Users in the currently selected User Group to Change the Program Status (Working / Approved)
12. Publish Program		If checked, allows Users in the currently selected User Group to Publish a Program to PCMA
13. Create Project Group		If checked, allows Users in the currently selected User Group to Create a Project Group
14. Rename Project Group		If checked, allows Users in the currently selected User Group to Rename a Project Group
15. Delete Project Group		If checked, allows Users in the currently selected User Group to Delete a Project Group
16. Add a Project		If checked, allows Users in the currently selected User Group to Add a Project
17. Delete a Project		If checked, allows Users in the currently selected User Group to Delete a Project
18. Modify a Project		If checked, allows Users in the currently selected User Group to Modify a Project (any of its attributes, including Components information)
19. Import Projects		If checked, allows Users in the currently selected User Group to Import Projects
20. Add a Project to a Program		If checked, allows Users in the currently selected User Group to Add a Project to a Program
21. Remove a Project from a Program		If checked, allows Users in the currently selected User Group to Remove a Project from a Program
22. Add a Project to a Project Group		If checked, allows Users in the currently selected User Group to Add a Project to a Project Group
23. Remove a Project from a Project Group		If checked, allows Users in the currently selected User Group to Remove a Project from a Project Group
24. Publish Project		If checked, allows Users in the currently selected User Group to Publish a Project to PCMA
25. Modify a Project Note		If checked, allows Users in the currently selected User Group to Modify a Project Note
26. Delete a Project Note		If checked, allows Users in the currently selected User Group to Delete a Project Note
27. Reports…		If checked, allows Users in the currently selected User Group to Run the Corresponding Report, only if the report is allowed to be utilized by the User Group

5.2.3 Assign User Group (UserG-3)

This function permits the assigning of Users to a User Group.

Field Name on Screen	MYPS Table	Source	Data Rules
1. Group *	Mypsuser_security_ug: usertype	Selected User Group	disabled
2. User *	Mypsuser: usertype	Drop down list of Existing Users	Mandatory; multiple selection

Menu Item	Enabling Rules	Action
1. OK/Save	Always	Save the User Group data to each selected user
2. Cancel	Always	Exit the popup without saving any changes

5.3 Users Screen

This page controls management of MYPS Users.

Employee ID	Full Name	User Name	Email	Designated Office	Region/District	User Groups	Action
1502320	Doe, John	doeja	doejohn@yahoo.com	Central Office	Central Office	Admin	
16040030	Abad, Leoncio Jr. S.	abadl		Development Planning Division	Central Office	ROC	

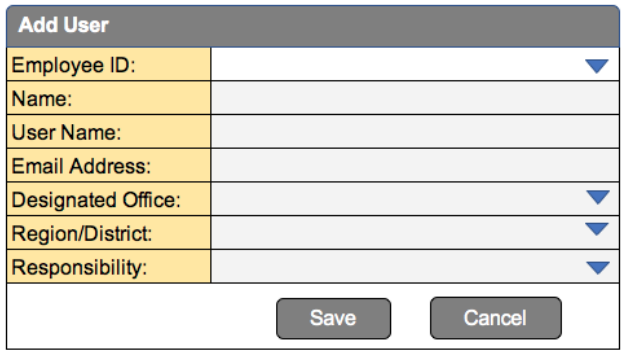

Field Name on Screen	MYPS Table	Source	Data Rules
1. Employee ID *	Mypsuser: employeeid	User	Disabled
2. Full Name *	Mypsuser: name	Choice of Employee ID	Disabled
3. User Name *	Mypsuser: Userid	Choice of Employee ID	Disabled
4. Email Address	Mypsuser; emailadd	User entered	Optional;
5. Designated Office *	Mypsuser: discode	Choice of Employee ID	Disabled
6. Region/District *	Mypsuser: regcode	Choice of Employee ID	Disabled
7. Group *	Mypsuser_security_ug: usertype	Selected User Group	disabled

The available actions are tabled below and described following:

User Item	Action	Description
User-1	Add User	Create a new User
User-2	Update User	Update the User details
User-3	Disable User	Disable a User from future log in
User-4	Manage Groups	Manage the Groups assigned to a User
User-5	Edit Permissions	Edit the permissions for a User

5.3.1 Add User (User-1)

This function is used by an Administrator to create a User and set his initial details and password.

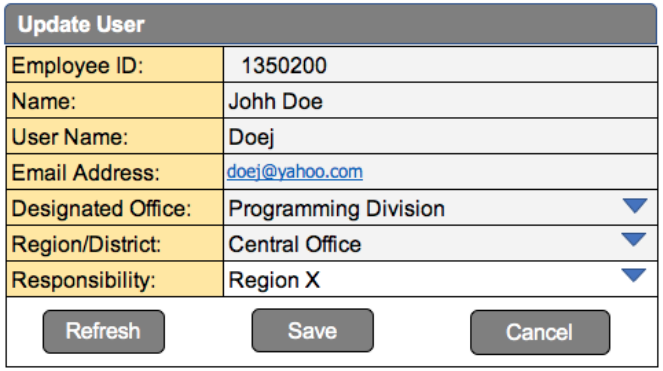

Field Name on Screen	MYPS Table	Source	Data Rules
1. Employee ID *	Mypsuser: employeeid	User	Mandatory; Employee ID chosen from PIS; autopopulates other fields
2. Name *	Mypsuser: name	Choice of Employee ID	Disabled
3. User Name *	Mypsuser: Userid	Choice of Employee ID	Disabled
4. Email Address	Mypsuser; emailadd	Choice of Employee ID	Disabled
5. Designated Office *	Mypsuser: discode	Choice of Employee ID	Disabled
6. Region/District *	Mypsuser: regcode	Choice of Employee ID	Disabled
7. Responsibility *	Mypsuser: responsibility	Choice of Employee ID	Disabled: defaults to Region/District

Menu Item	Enabling Rules	Action
1. Save	Always	Validate the User details, and save if ok
2. Cancel	Always	Exit the popup without saving any changes

5.3.2 Update Login Credentials (User-2)

This function refreshes a User Login credentials based on Active Directory settings, and allows the setting of Responsibility.

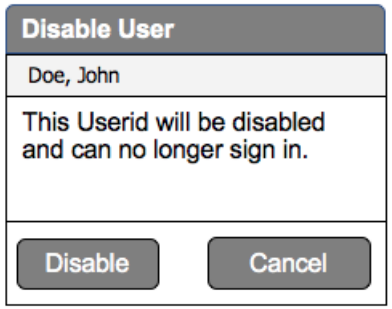

Field Name on Screen	MYPS Table	Source	Data Rules
1. Employee ID *	Mypsuser: employeeid	User	Mandatory; Employee ID chosen from PIS; autopopulates other fields
2. Name *	Mypsuser: name	Choice of Employee ID	Disabled
3. User Name *	Mypsuser: Userid	Choice of Employee ID	Disabled
4. Email Address	Mypsuser; emailadd	Choice of Employee ID	Disabled
5. Designated Office *	Mypsuser: discode	Choice of Employee ID	Disabled
6. Region/District *	Mypsuser: regcode	Choice of Employee ID	Disabled
7. Responsibility *	Mypsuser: responsibility	Region Drop down	Enabled: A valid Region/UPMO code must be chosen

Menu Item	Enabling Rules	Action
1. Refresh	Always	MYPS shall refresh the User credentials based on the Active Directory settings.
2. Save	Always	Save the changes. If successful, returns to My Profile.
3. Cancel	Always	Exit the popup without saving any changes

5.3.3 Disable User (User-3)

This function shall disable a User from future sign in.

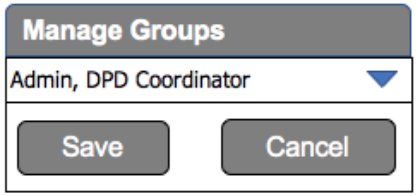

Field Name on Screen	MYPS Table	Source	Data Rules
1. User Name *	Mypsuser: Userid	Based on Selected User	Disabled

Menu Item	Enabling Rules	Action
1. Disable	Always	Disable the User permanently
2. Cancel	Always	Exit the popup without disabling the user

5.3.4 Manage User Groups (User-4)

This function allows multiple selection of User Groups for the chosen User

Field Name on Screen	MYPS Table	Source	Data Rules
1. User Group	Mypsuser: Usertype	Dropdown list of User Groups	Mandatory; multiple selection of Groups, comma separated

Menu Item	Enabling Rules	Action
1. OK/Save	Always	Validate the selections, and save selected User Groups to nominated User if ok
2. Cancel	Always	Exit the popup without saving any changes

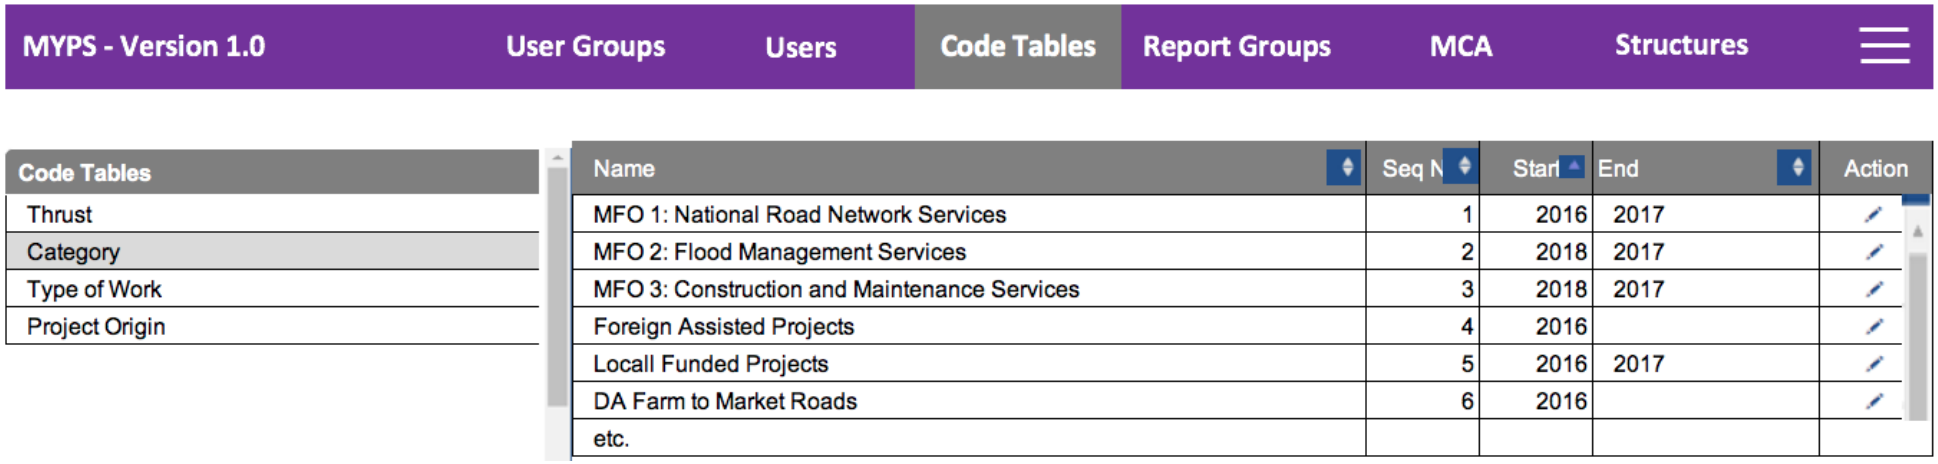

5.3.5 Edit Permissions (User-5)

This function allows the Functional permissions for a User to be modified.

See Section 5.2.2

5.4 Code Tables Screen

This screen manages MYPS Code Tables.

Field Name on Screen	MYPS Table	Source	Data Rules
1. Code Tables *	MYPS Code Table List	Dropdown	Mandatory selection
A list of settings for the selected Code table are displayed			
2. Name	Selected table		Validation of each table dependent on the table
3. Sequence Number	Selected table		
4. Start Year	Selected table		
5. End Year	Selected table		
6. Action		List: Add, Edit	

The actions for code tables are tabled below and described following:

Category Item	Action	Description
Cat-1	Add	Creates a new category table entry

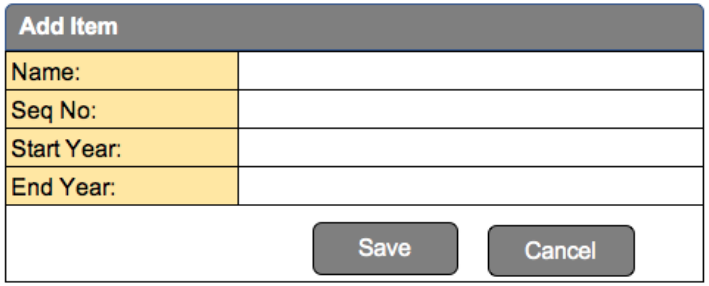

Cat-2	Edit	Edit the name or the Year start and end.

The other Code tables to be managed by this page are tabled below and the mechanism described for Category shall be applied to each table with appropriate changes in columns and validation.

Table Name
Program Category
Project Origin
Agency Code
Project Cost Type
Funding Agreement
PAP (Thrust)
Types of Work
Modification Category
Modification Reasons
RDP Results Matrix
RDP Outputs
Implementation Readiness
NEDA Status
EAO Percentages

5.4.1 Add Category Item (Cat-1)

The Add screen for each table will depend on the details of the Code table. Category is shown.

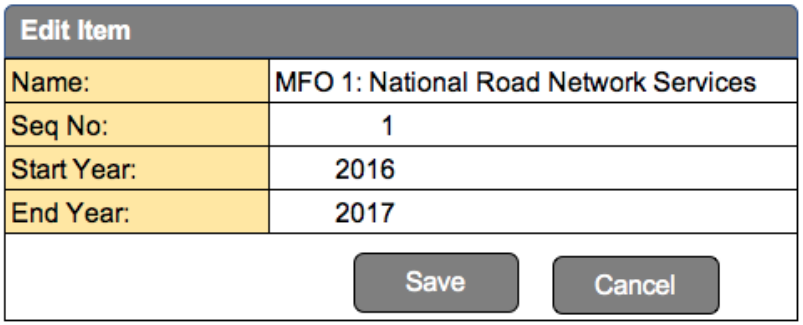

Field Name on Screen	MYPS Table	Source	Data Rules
1. Name *	Category; name	User supplied	Mandatory; Unique
2. Seq No *	Category; Seqno	User supplied	Mandatory; Unique
3. Startyear *	Category; startyear	User supplied	Mandatory; YYYY format
4. Endyear	Category; endyear	User supplied	Optional; YYYY format if supplied; greater than or equal Startyear

Menu Item	Enabling Rules	Action
1. Save	Always	Validate the selections, and save selected Category if ok
2. Cancel	Always	Exit the popup without saving any changes

5.4.1 Edit Category Item (Cat-2)

The Edit screen for each table will depend on the details of the Code table. Category is shown.

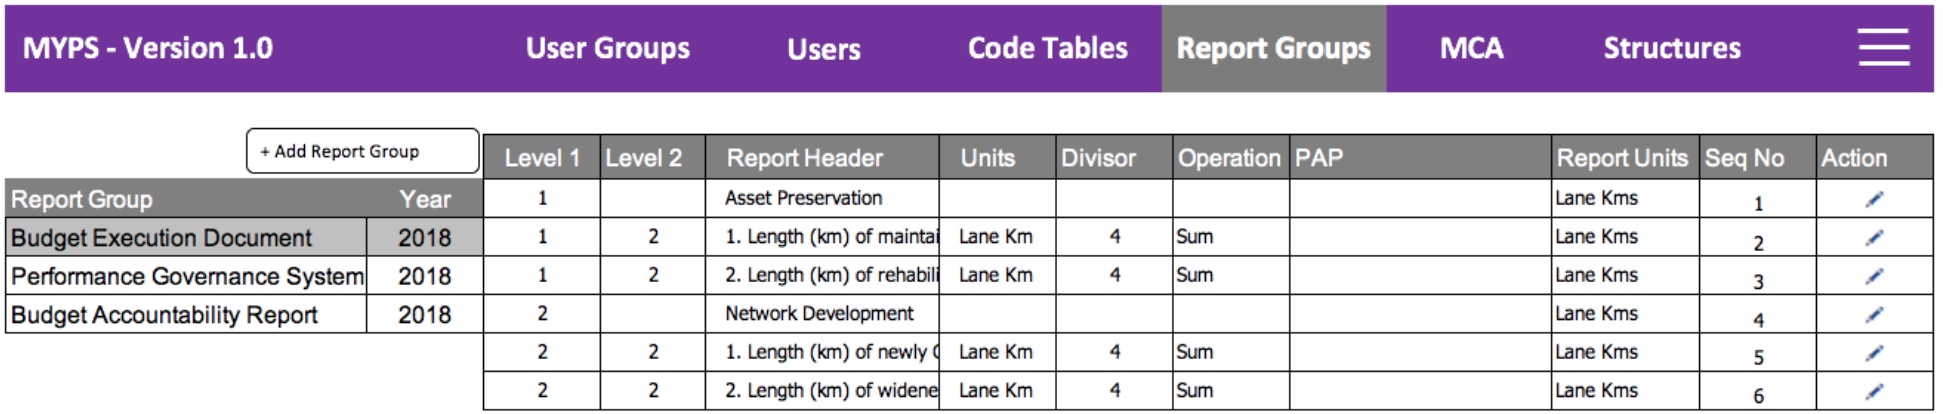

Field Name on Screen	MYPS Table	Source	Data Rules
1. Name *	Category; name	User supplied	Mandatory; Unique
2. Seq No *	Category; Seqno	User supplied	Mandatory; Unique
3. Startyear *	Category; startyear	User supplied	Mandatory; YYYY format
4. Endyear	Category; endyear	User supplied	Optional; YYYY format if supplied; greater than or equal Startyear

Menu Item	Enabling Rules	Action
1. Save	Always	Validate the selections, and save selected Category if ok
2. Cancel	Always	Exit the popup without saving any changes

5.5 Reporting Groups

The page provides management of Report Groups such as BED, BAR and PGS.

Field Name on Screen	MYPS Table	Source	Data Rules
1. Report Group			Mandatory; unique
2. Report Year			Mandatory; unique
The data shown for each Report Group is dependent on the selected Group			
1. Level 1	Selected table		Validation of each table dependent on the table
2. Level 2	Selected table		
3. Units	Selected table		
4. Divisor	Selected table		
5. Operation	Selected table		
6. PAP	Selected table		
7. Report Units	Selected table		
8. Sequence Number	Selected table		
9. Action	Selected table		

The actions for Report Group management are tabled below and described following:

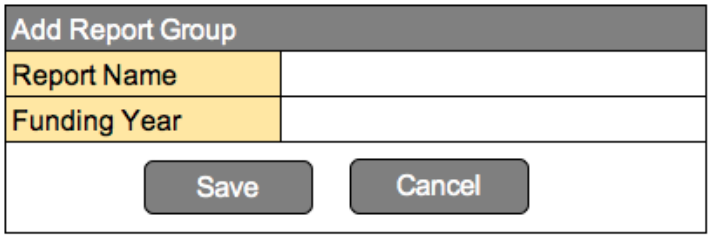

ReportG Item	Action	Description
ReportG-1	Create Group	Admin User can define a Reporting Group
ReportG-2	Edit Group	Admin User can edit the Reporting Group details

The actions for managing Report Group Items are tabled below and described following:

RGItem Item	Action	Description
RGItem-1	Create Item	Admin User can create a Report Group item
RGItem-2	Edit Item	Admin User can edit a Report Group item
RGItem-3	Delete Item	Admin User can delete a Report Group item

5.5.1 Create Report Group (ReportG-1)

This function allows creation of a new reporting group, such as Budget Execution Document (BED), Budget Accountability Report (BAR) that matches this year's requirements.

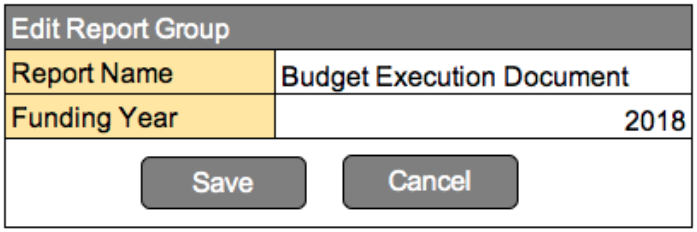

Field Name on Screen	MYPS Table	Source	Data Rules
1. Report Name *	ReportGroup; name	User supplied	Mandatory; Unique
2. Funding Year *	ReportGroup; year	User supplied	Mandatory; YYYY format

Menu Item	Enabling Rules	Action
1. Save	Always	Validate the data, and save if ok
2. Cancel	Always	Exit the popup without saving any changes

5.5.2 Edit Report Group (ReportG-2)

This function permits the User to edit the Report Group attributes.

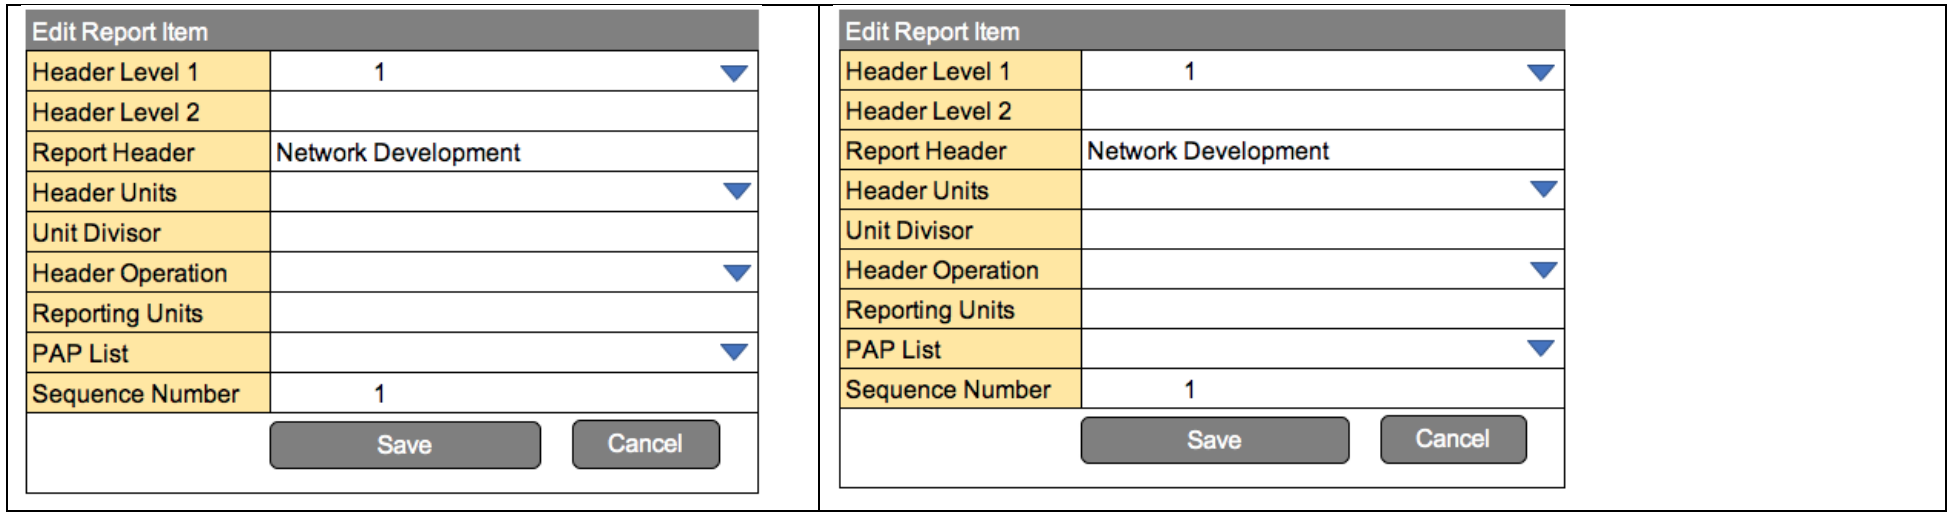

Field Name on Screen	MYPS Table	Source	Data Rules
1. Report Name *	ReportGroup; name	User supplied	Mandatory; Unique
2. Funding Year *	ReportGroup; year	User supplied	Mandatory; YYYY format

Menu Item	Enabling Rules	Action
1. Save	Always	Validate the data, and save if ok
2. Cancel	Always	Exit the popup without saving any changes

5.5.3 Add or Edit Group Item (RGitem-1) (RGitem-2)

The function adds a report item to a Report Group.

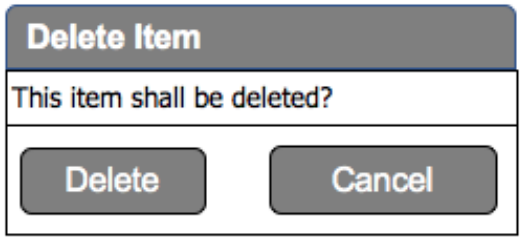

Field Name on Screen	MYPS Table	Source	Data Rules
1. Header Level 1 *	ReportGroup;	User supplied	Mandatory; Unique
2. Header Level 2	ReportGroup;	User supplied	Optional
3. Report Header *	ReportGroup;	User supplied	Mandatory; free text
4. Header Units *	ReportGroup;	User supplied	Mandatory; drop down list of Units of Measure
5. Unit Divisor *	ReportGroup;	User supplied	Mandatory; cannot be 0
6. Header Operation *	ReportGroup;	User supplied	Mandatory; One of Sum, or Count
7. Reporting Units *	ReportGroup;	User supplied	Mandatory; drop down list of Units of Measure
8. PAP list *	ReportGroup;	User supplied	Mandatory; Dropdown list of PAP codes
9. Seq No*	ReportGroup;	User supplied	Mandatory;

Menu Item	Enabling Rules	Action
1. Save	Always	Validate the data, and save if ok
2. Cancel	Always	Exit the popup without saving any changes

5.5.1 Delete Group Item (RGitem-3)

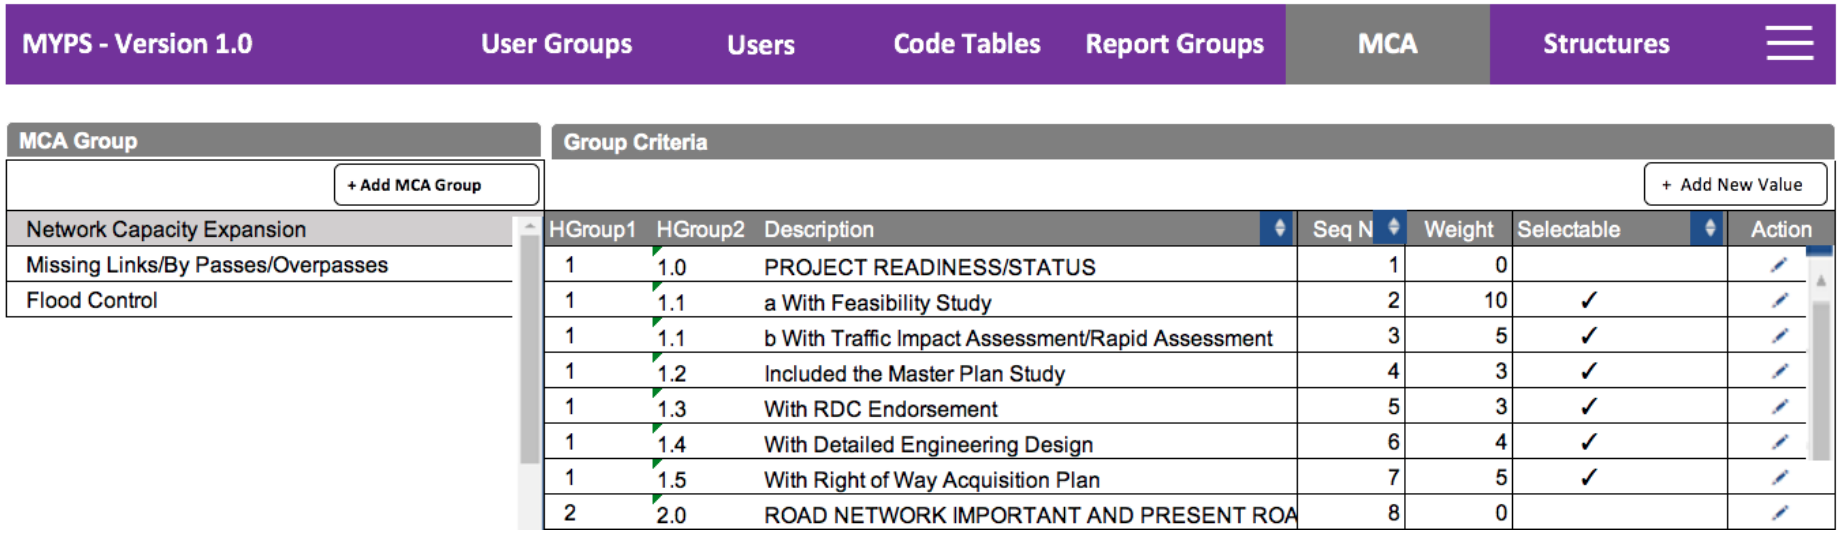

The Delete item shall depend on the validation. In most cases an Item shall not be deleted if it has been used to populate a table.

Menu Item	Enabling Rules	Action
1. Delete	Always	Validate the data, and delete if not used
2. Cancel	Always	Exit the popup without saving any changes

5.6 MCA Screen

This screen is used to manage the MCA Groups and settings. MCA management is very similar to the Report Groups in purpose and actions.

The actions for MCA Groups are tabled below and described following:

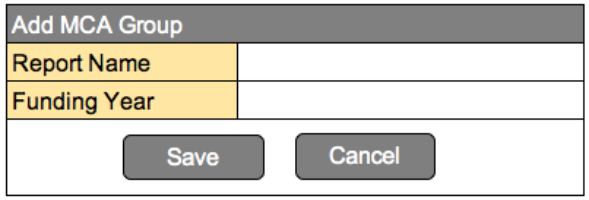

MCA Group	Action	Description
MCAGroup-1	Create MCA	PPC defines an MCA analysis group
MCAGroup-2	Disable MCA	PPC disables/end dates an MCA analysis group
MCAGroup-3	Run MCA	PPC performs the MCA for a Project

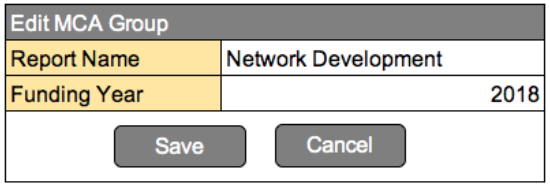

The actions for MCA Group Items are tabled below and described following:

MCA Item	Action	Description
MCAItem-1	Add MCA Item	PPC defines an MCA item
MCAItem-2	Edit MCA Item	PPC edits the description, weighting, order and whether it can be selected or not
MCAItem-3	Delete MCA Item	PPC deletes an MCA item

5.6.1 Add MCA Group (MCAGroup-1) (MCAGroup-2)

This function allows the creation of a new MCA group.

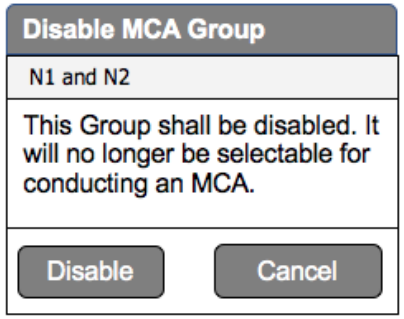

Field Name on Screen	MYPS Table	Source	Data Rules
1. Report Name *	MCAGroup; name	User supplied	Mandatory; Unique
2. Funding Year *	MCAGroup; year	User supplied	Mandatory; YYYY format

Menu Item	Enabling Rules	Action
1. Save	Always	Validate the data, and save if ok
2. Cancel	Always	Exit the popup without saving any changes

5.6.2 Disable MCA Group (MCAGroup-3)

This function disables an MCA group, disallowing the use of the Group from further analysis.

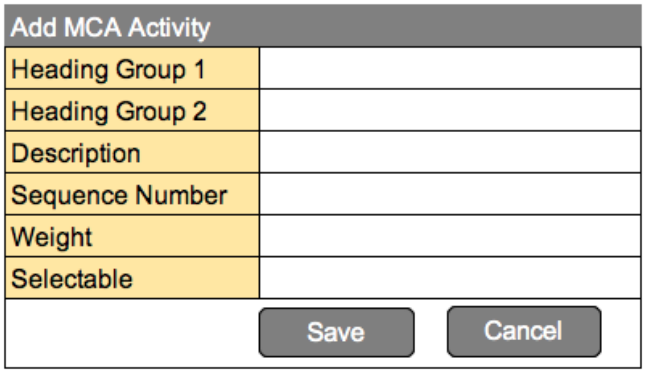

Field Name on Screen	MYPS Table	Source	Data Rules
1. MCA Group Name *	MCAGroup; name	User supplied	disabled

Menu Item	Enabling Rules	Action
1. Disable	Always	Disable the MCA Group and exit
2. Cancel	Always	Exit the popup without saving any changes

5.6.3 Add MCA Group Item (MCAitem-1)

This function is used by an Administrator to add an MCA Line Item.

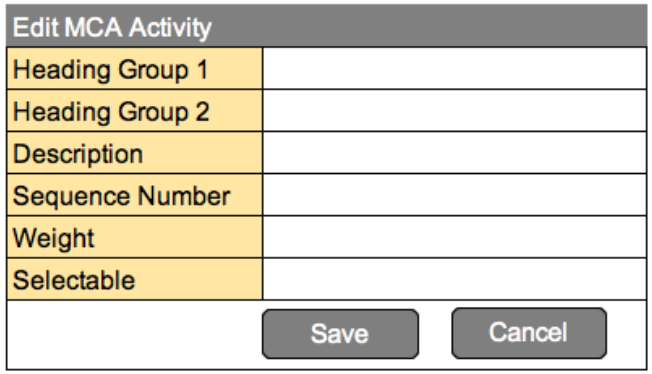

Field Name on Screen	MYPS Table	Source	Data Rules
1. Heading Group 1 *	MCA_template	User entered	Mandatory; Free text
2. Heading Group 2 *	MCA_template	User entered	Optional; free text
3. Description *	MCA_template	User entered	Optional; free text
4. Sequence Number *	MCA_template	User entered	Sortable sequence
5. Weight *	MCA_template	User entered	Mandatory; 0 or greater

Menu Item	Enabling Rules	Action
1. Save	Always	Validate the MCA Item details, and Add new item if ok
2. Cancel	Always	Exit the popup without saving any changes

5.6.4 Edit MCA Group Item (MCAItem-2)

This function is used by an Administrator to change the details of an MCA Line Item.

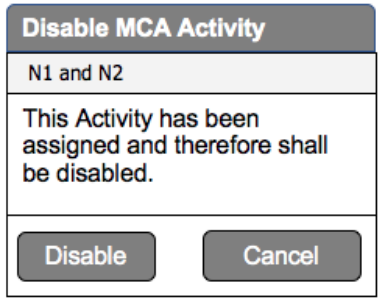

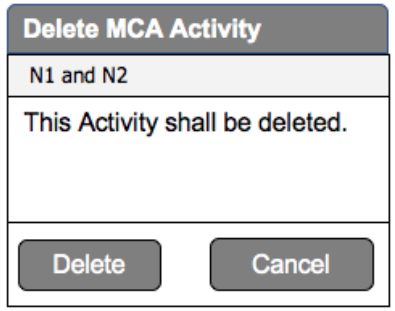

Field Name on Screen	MYPS Table	Source	Data Rules
1. Heading Group 1 *	MCA_template	Existing value	
2. Heading Group 2 *	MCA_template	Existing value	
3. Description *	MCA_template	Existing value	
4. Sequence Number *	MCA_template	Existing value	
5. Weight *	MCA_template	Existing value	

Menu Item	Enabling Rules	Action
1. Save	Always	Validate the MCA Item details, and save if ok
2. Cancel	Always	Exit the popup without saving any changes

5.6.5 MCA Group Item Delete (MCAItem-3)

This function allows an unused Group Item to be deleted. If it has been used in an evaluation, it is disabled, rather than deleted.

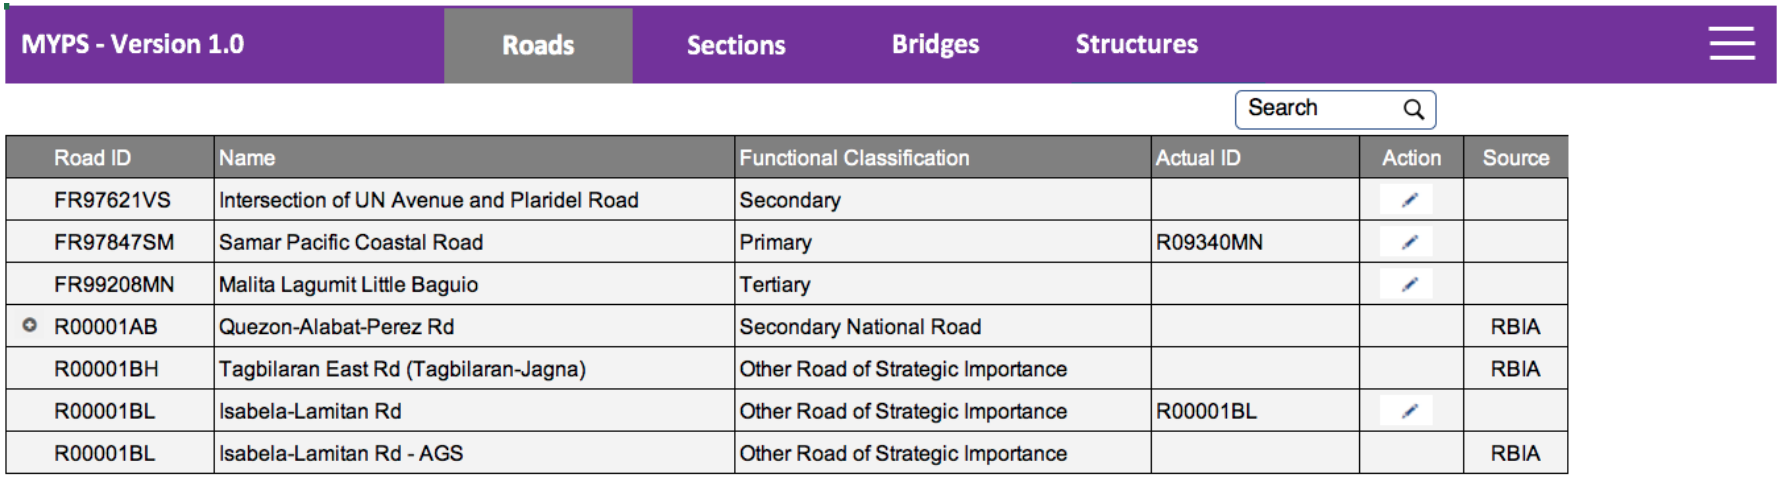

Field Name on Screen	MYPS Table	Source	Data Rules
1. Selected activity	MCA_template	Existing value	Disabled
2. Description of Action		Based on use	Choice of Disable or Delete based on the usage of the particular MCA group

Menu Item	Enabling Rules	Action
1. Disable/Delete	Always	Validate the MCA Item details, and delete or disable as permitted by rules
2. Cancel	Always	Exit the popup without saving any changes

6 Structures Module

6.1 Road Screen

The Road Screen is called from the MYPS Administration and permits viewing and management of future Infrastructure.

Road ID	Name	Functional Classification	Actual ID	Action	Source
FR97621VS	Intersection of UN Avenue and Plaridel Road	Secondary			
FR97847SM	Samar Pacific Coastal Road	Primary	R09340MN		
FR99208MN	Malita Lagumit Little Baguio	Tertiary			
R00001AB	Quezon-Alabat-Perez Rd	Secondary National Road			RBIA
R00001BH	Tagbilaran East Rd (Tagbilaran-Jagna)	Other Road of Strategic Importance			RBIA
R00001BL	Isabela-Lamitan Rd	Other Road of Strategic Importance	R00001BL		
R00001BL	Isabela-Lamitan Rd - AGS	Other Road of Strategic Importance			RBIA

Field Name on Menu	Comments
1. Roads	Selects the Road page; highlights the Roads Menu and un-highlights the other Menu options
2. Sections	Selects the Sections page
3. Bridges	Selects the Bridges page
4. Structures	Selects the Flood Control Structures page
5. 	Shows the main function menu

Field Name on Screen	MYPS Table	Source	Data Rules
1. Road ID	MYPS: road and RBIA: road	Union of MYPS and RBIA road tables	Display as tabled
2. Name			Display as tabled

Field Name on Screen	MYPS Table	Source	Data Rules
3. Functional Classification			Display as tabled
4. Actual ID	MYPS: Road	Based on populated data in MYPS database	Display as tabled
5. Source		Show "RBIA" if data from RBIA or blank if "future" roads from MYPS	

Menu Item	Enabling Rules	Action
1. Search	Always	Allows user to search for a road name or ID
2. Action	Always	Shall display the actions permitted on this road
3. 	Always	Shall display a popup of all sections related to this road – see below; Once display the + symbol will be replaced by a – symbol which when selected will close the popup

The actions permitted on a road or future road are:

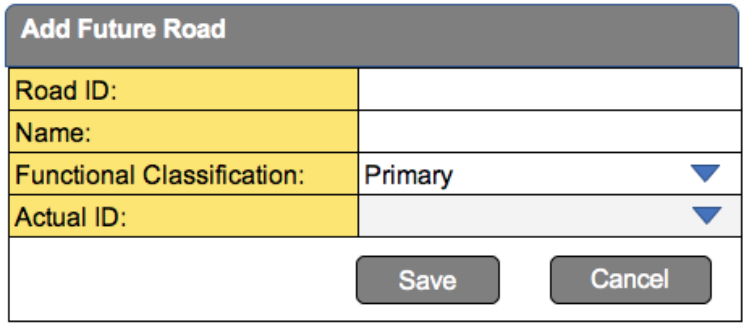

RBIA Item	Action	Description
RBIA-1	Add Future Road	Define a future Road and assigns it a FR identification number.
RBIA-2	Edit Future Road	Edit a future Road.
RBIA-3	Add Future Section	Define a future Road Section and assigns it a FS identification number.

The breakout data are the sections of the road:

Section ID	Length (m)	Region
S00005AB	43,123	Misamis Oriental 1st District Engineering Office

6.1.1 Add Future Road (RBIA-1)

This function adds a future road to MYPS. These are roads not yet in Road and Bridge Information Application (RBIA), but are to be constructed. The future Road ID as assigned by Statistics Division - Planning Service (SD-PS).

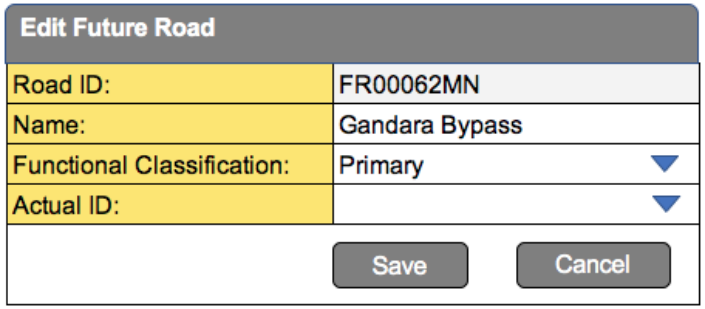

Field Name on Screen	MYPS Table	Source	Data Rules
1. Road ID *	road	User entered	Future Roads may begin with "FR" or "R" followed by a 5-digit code followed by a 2-letter Island Code as per RBIA. Mandatory; Unique
2. Name *	road	User entered	Mandatory; unique
3. Functional Classification *	road	Drop-down list from RBIA Classifications	Mandatory; choose one from dropdown
4. Actual ID	road	Should be based on Drop-down box from RBIA Road List	Disabled: during Add

Menu Item	Enabling Rules	Action
1. Save	Always	Saves the data and closes the screen
2. Cancel	Always	Closes the screen without saving

6.1.2 Edit Future Road (RBIA-2)

This function permits editing of a MYPS future road's attributes. Roads in RBIA cannot be edited.

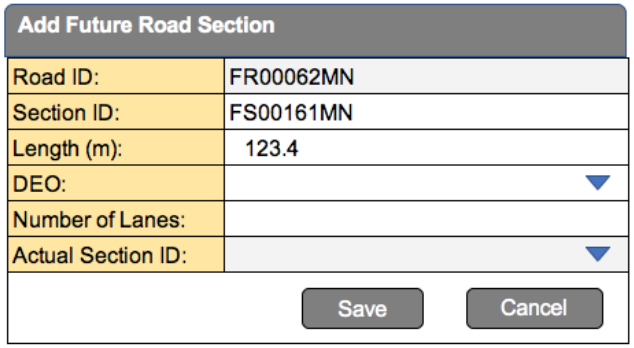

Field Name on Screen	MYPS Table	Source	Data Rules
1. Road ID *	road	Road table	Mandatory; Disabled
2. Name *	road	Added by user through Add Future Road menu item.	Mandatory; unique
3. Functional Classification *	road	Should be based on Drop-down box from RBIA	Mandatory; choose one from dropdown
4. Actual ID	road	Drop-down box from RBIA of Road ID	The actual Road ID assigned to the future road upon completion

Menu Item	Enabling Rules	Action
1. OK/Save	Always	Saves the data and closes the screen
2. Cancel	Always	Closes the screen without saving

6.1.3 Add Future Road Section (RBIA-3)

This function permits adding of a future road section that does not yet exist in RBIA, but is to be constructed.

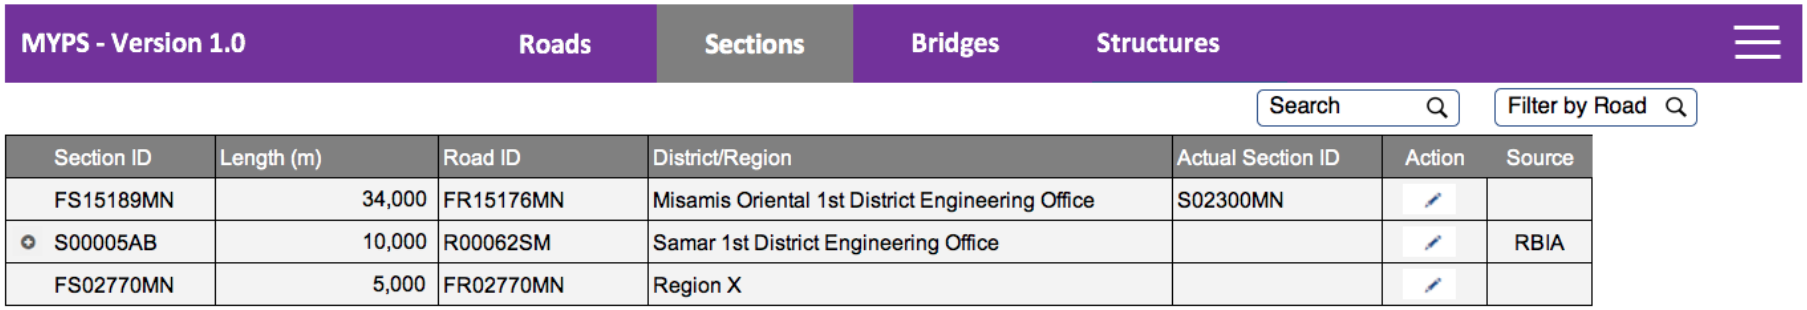

Field Name on Screen	MYPS Table	Source	Data Rules
1. Road ID *	road	Road selected by User at activation	Mandatory; disabled
2. Road Section ID *	road_section	User Supplied	Future Road Sections may begin with "FS" or "S" followed by a 5-digit code followed by a 2-letter Island Code as per RBIA. Mandatory; Unique
3. Length (m) *	road_section	User supplied	Greater than 0
4. DEO *	ro_deo	Drop-down box	Must be a valid Engineering District Office as defined in Internal Organization application
5. Number of Lanes *			Mandatory; user supplied
6. Actual ID	ro_deo	Drop-down box	Disabled: during Add

Menu Item	Enabling Rules	Action
1. Save	Always	Saves the data and closes the screen
2. Cancel	Always	Closes the screen without saving

6.2 Road Sections Screen

This screen shows all the Road Sections from the RBIA and MYPS.

Field Name on Screen	MYPS Table	Source	Data Rules
1. Section ID	MYPS: Road Section and RBIA: Road Sections	Union of MYPS and RBIA road section tables	Display as tabled
2. Length (m)			
3. Road ID			
4. District/Region			
5. Actual Section ID	MYPS road Sections	Based on populated data in MYPS database	Dropdown list of existing road sections in RBIA
6. Source		Show "RBIA" if data from RBIA or blank if "future" roads from MYPS	

Menu Item	Enabling Rules	Action
1. Search	Always	Allows user to search for a road section ID
2. Action	Always	Shall display the actions permitted on this road section
3.	Always	Shall display a popup of all bridges related to this road – see below; Once display the + symbol will be replaced by a – symbol which when selected will close the popup

The actions permitted on a road section are tabled below and described following.

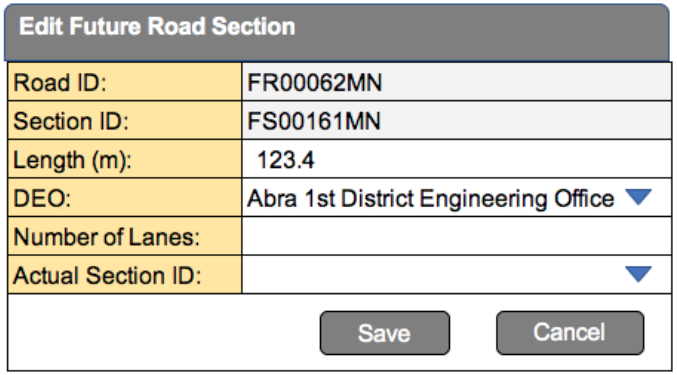

RBIA Item	Action	Description
RBIA-4	Edit Future Section	Edit a future Road Section.
RBIA-5	Add Future Bridge	Defines a future Bridge and assigns it a FB identification number.

The breakout data are the bridges on the road section:

Bridge ID	Start (m)	Length (m)	Name
B00006AB	43,123	30.50	Buenavista Br.
B00009AB	10,000	49.60	Camagong Br.
B00014AB	5,000	29.70	Caglate Br.

6.2.1 Edit Future Road Section (RBIA-4)

This function permits editing of a MYPS future road section's attributes. RBIA Sections cannot be edited.

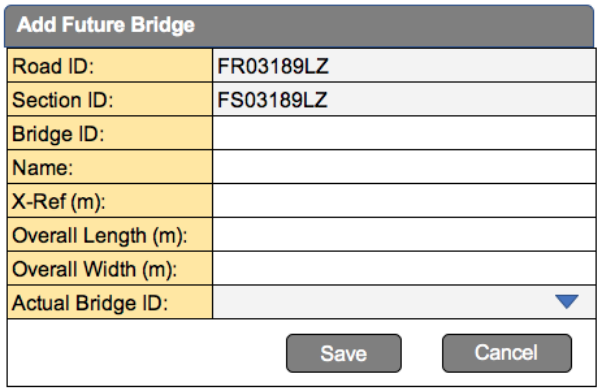

Field Name on Screen	MYPS Table	Source	Data Rules
1. Road ID *	MYPS: Road Section	Based on selected Section	Mandatory; disabled
2. Section ID *	MYPS: Road Section	Based on selected Section	Mandatory; disabled
3. Length (m) *	MYPS: Road Section	Based on selected Section	Mandatory; Greater than 0
4. DEO *	ro_deo	Based on selected Section	Must be a valid Engineering District Office as defined in Internal Organization application
5. Number of Lanes *			Mandatory; user supplied
6. Alternate ID	MYPS: Road Section or RBIA: Road Section	Drop-down box from RBIA of Section ID	Optional; The actual Section ID assigned to the future Section upon completion

Menu Item	Enabling Rules	Action
1. Save	Always	Saves the data and closes the screen
2. Cancel	Always	Closes the screen without saving

6.2.2 Add Future Bridge (RBIA-5)

This function permits adding a future bridge to the MYPS, that is not yet recorded in RBIA, but is to be constructed.

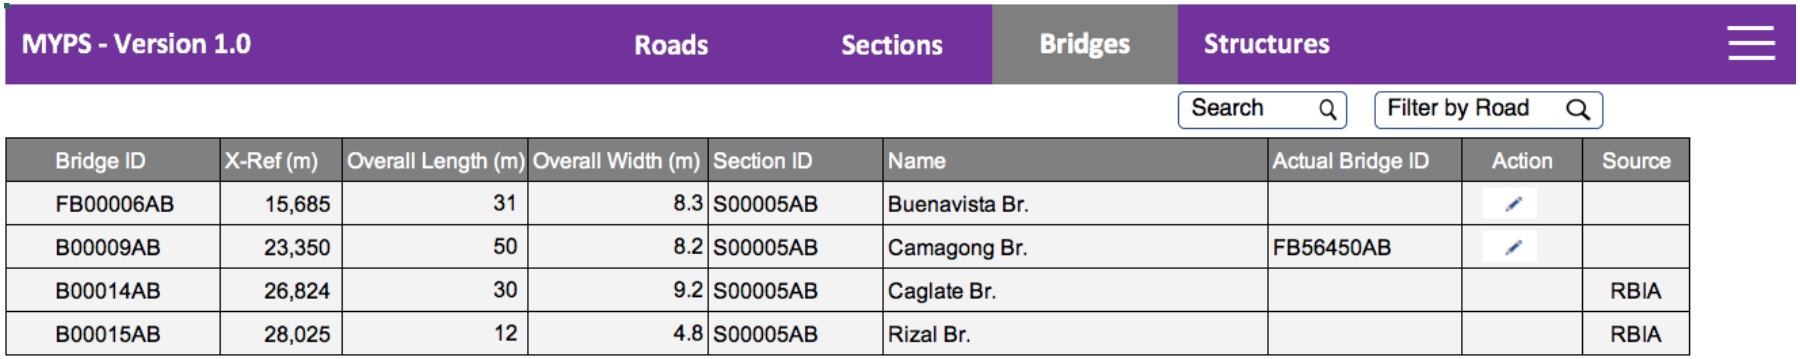

Field Name on Screen	MYPS Table	Source	Data Rules
1. Road ID *		Based on selected Section ID	Mandatory; disabled
2. Section ID *			Mandatory; disabled
3. Bridge ID *	MYPS: bridge	User supplied	Future Bridges may begin with "FB" or "B"; Mandatory; unique
4. Name *		User supplied	Mandatory; unique
5. X-Ref (m) *		User supplied	Mandatory; >=0 and <= (length of road section minus Overall Length)
6. Overall Length (m) *		User supplied	Mandatory; >=3 and <= length of road section
7. Overall Width (m) *		User supplied	Mandatory; >= 3 and < 100
8. Actual Bridge ID			Disabled: during Add

Menu Item	Enabling Rules	Action
1. OK	Always	Saves the data and closes the screen
2. Cancel	Always	Closes the screen without saving

6.3 Bridges Screen

This screen shows all the Road Sections from the RBIA and the MYPS.

Bridge ID	X-Ref (m)	Overall Length (m)	Overall Width (m)	Section ID	Name	Actual Bridge ID	Action	Source
FB00006AB	15,685	31	8.3	S00005AB	Buenavista Br.			
B00009AB	23,350	50	8.2	S00005AB	Camagong Br.	FB56450AB		
B00014AB	26,824	30	9.2	S00005AB	Caglate Br.			RBIA
B00015AB	28,025	12	4.8	S00005AB	Rizal Br.			RBIA

Field Name on Screen	MYPS Table	Source	Data Rules
1. Bridge ID	MYPS: Bridge and RBIA: Bridge	MYPS: Road Section and RBIA: Road Sections	Display as tabled
2. X-Ref (m)			
3. Overall Length (m)			
4. Overall Width (m)			
5. Section ID			
6. Name			
7. Alternate Bridge ID	MYPS Bridges	Based on populated data in MYPS database	Dropdown list of existing bridges in RBIA
8. Source		Show "RBIA" if data from RBIA or blank if "future" roads from MYPS	

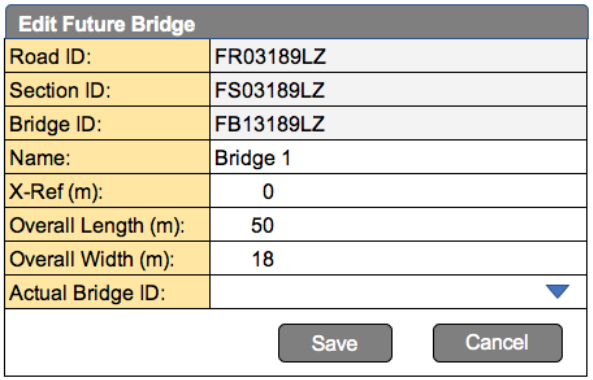

Menu Item	Enabling Rules	Action
1. Search	Always	Allows user to search for a Bridge ID or Bridge name
2. Action	Always	Shall display the actions permitted on this bridge

The actions permitted on a Bridge are tabled below and described following:

RBIA Item	Action	Description
RBIA-6	Edit Future Bridge	Edit a future Bridge.

6.3.1 Edit Future Bridge (RBIA-6)

This function permits the editing of a future bridge's attributes.

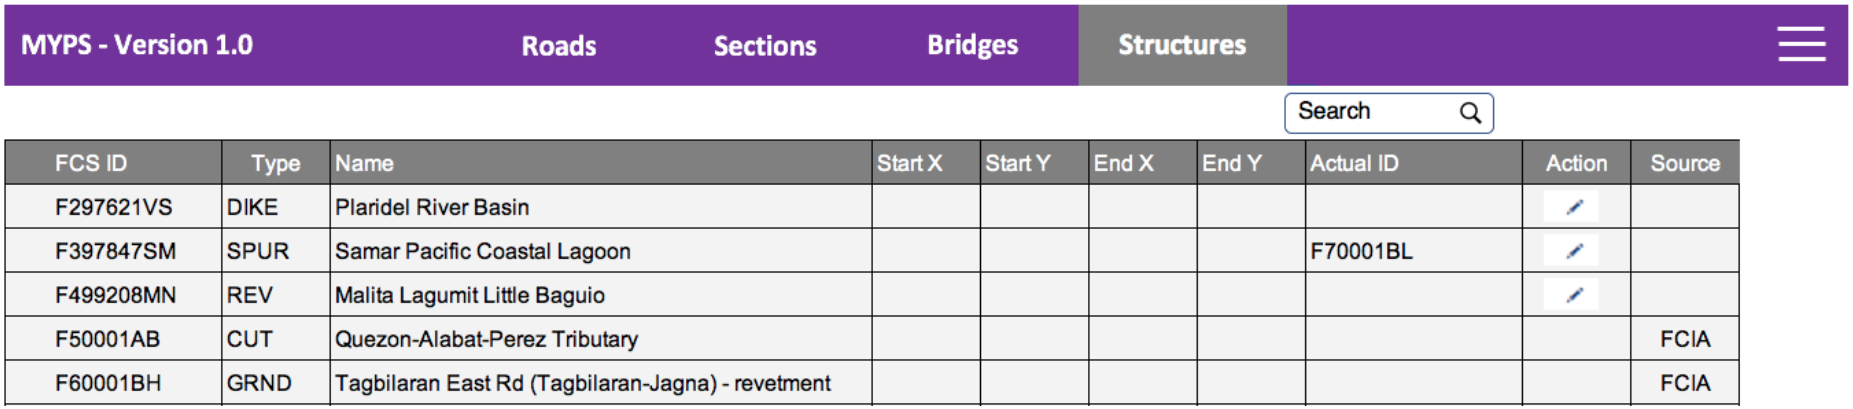

Field Name on Screen	MYPS Table	Source	Data Rules
1. Road ID *	MYPS; section	Selected Future Bridge	Mandatory; disabled
2. Section ID *	MYPS: bridge	Selected Future Bridge	Mandatory; disabled
3. Bridge ID *	MYPS: bridge	Selected Future Bridge	Mandatory; disabled
4. Name *	MYPS: bridge	Selected Future Bridge	Mandatory; free text
5. X-Ref (m) *	MYPS: bridge	Selected Future Bridge	Mandatory; >=0 and <= (length of road section minus Overall Length)
6. Overall Length (m) *	MYPS: bridge	Selected Future Bridge	Mandatory; >=3 and <= length of road section
7. Overall Width (m) *	MYPS: bridge	Selected Future Bridge	Mandatory; >= 3 and < 100
8. Alternate Bridge ID	RBIA: bridge	Drop-down box of Bridge IDs	Optional; Actual Bridge ID of the future Bridge upon completion

Menu Item	Enabling Rules	Action
1. Save	Always	Saves the data and closes the screen
2. Cancel	Always	Closes the screen without saving

6.4 Flood Control Structures Screen

This screen shows all the Flood Control Structures from the Flood Control Inventory Application (FCIA) and the MYPS.

FCS ID	Type	Name	Start X	Start Y	End X	End Y	Actual ID	Action	Source
F297621VS	DIKE	Plaridel River Basin							
F397847SM	SPUR	Samar Pacific Coastal Lagoon					F70001BL		
F499208MN	REV	Malita Lagumit Little Baguio							
F50001AB	CUT	Quezon-Alabat-Perez Tributary							FCIA
F60001BH	GRND	Tagbilaran East Rd (Tagbilaran-Jagna) - revetment							FCIA

Field Name on Screen	MYPS Table	Source	Data Rules
1. FCS ID	MYPS: FCS Table	MYPS: Road Section and RBIA: Road Sections	Display as tabled
2. Type			
3. Name			
4. Start X			
5. Start Y			
6. End X			
7. End Y			
8. Alternate ID	FCIA FCS	Based on populated data in MYPS database	Dropdown list of existing FCS in FCIA
9. Source		Show "FCIA" if data from FCIA or blank if "future" FCS from MYPS	

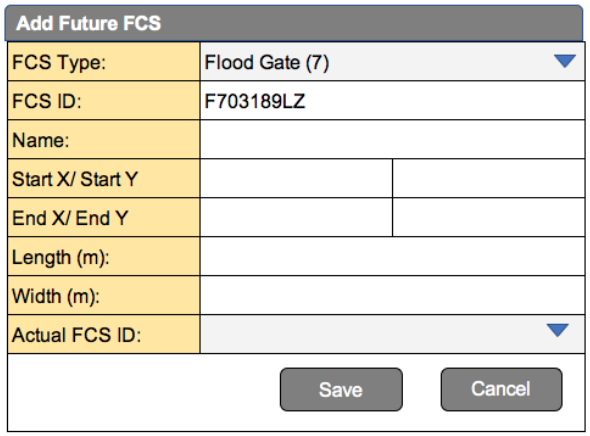

Menu Item	Enabling Rules	Action
1. Search	Always	Allows user to search for a FCS ID or FCS name
2. Action	Always	Shall display the actions permitted on this bridge

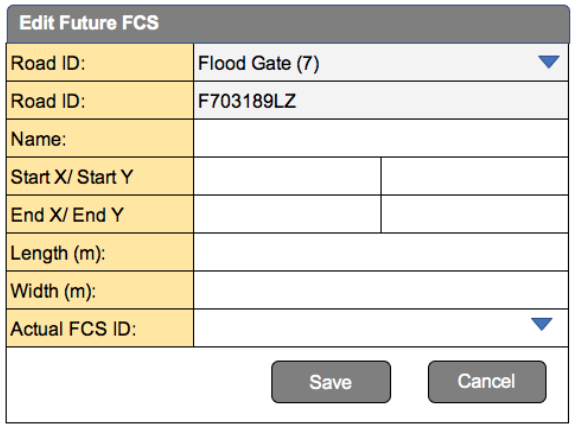

The actions permitted on an FCS are tabled below and described following:

FCS Item	Action	Description
FCS-1	Add Future FCS	Define a future FCS and assigns it an FCS F identification number.
FCS-2	Edit Future FCS	Edit a future FCS record.

6.4.1 Add/Edit Future (FCS -1) (FCS-2)

This function permits editing of a MYPS future FCS attributes. FCIA FCS cannot be edited.

Field Name on Screen	MYPS Table	Source	Data Rules
1. FCS Type *	MYPS: FCS Types	User selection	Mandatory; drop down list of FCS types; disabled for Edit
2. FCS ID *	MYPS: FCS	User supplied; determined in conjunction with BOM	Mandatory; User provided; unique; disabled for Edit
3. Name	MYPS: FCS		Mandatory; User provided
4. Location X,Y	MYPS: FCS		Mandatory; identifies containment area of FCS
5. Length (m) *	MYPS: FCS		Mandatory; Greater than 0
6. Width (m) *	MYPS: FCS		Mandatory; Greater than 0
7. Alternate FCS ID	MYPS: FCS	Drop-down from FCIA of FCS ID	Enabled for Edit; Disabled for Add

Menu Item	Enabling Rules	Action
1. Save	Always	Saves the data and closes the screen
2. Cancel	Always	Closes the screen without saving

7 Projects

The typical display of Project information is shown below: Notes:

- RDC and Profile Tabs are only shown in the Multi-Year module.
- For PIP, NEP with Errata, HGAB with Amendments and Programming, the Project tab shall show details from the two Programs (as per the second figure below.

Project	Component	Schedule	MYOA	Targets	Work Items	Funding	Notes	Programs	RDC	Profile
Project ID:	MY00200301LZ									
Project Cost:	2,300,000									
Description:	Jct. T. Taupan Street (Suterville/Gavilan) Flyover, Zamboanga City									
OU:	Central Office									
IO:	Abra 1st									
DEO:	Abra 1st									
LD:										
CM:										
OA:	DPWH									
UACS:	30101210212									
Category:	OO-2 Protect Lives and Property									
PAP:	Asset Preservation									
Region Wide:	Yes									
Project Status:	New									
MCA Score:										
PCMA Status:										

The permissible Project functions are table below:

Project Item	Action	Description
Proj-1	Add	Creates a new Project in a Program

Proj-2	Edit	Edit certain attributes of a specific Project
Proj-3	Delete	Delete a Project from a Program
Proj-4	Copy to Program	Create a copy of an existing Project in another Program
Proj-5	Revise	Revise a Project in 'GAA with Revisions' Stage
Proj-6	Add to Project Group	Include Project in a Project Group
Proj-7	Delete from Project Group	Remove Project from a Project Group
Proj-8	Publish	Publish selected Project and relevant Component details to the PCMA
Proj-9	Change Project Status	Applied to LS Projects and Additional Projects to change "potential" itemized or additional Projects to "scheduled"
Proj-10	Run MCA	Conduct an MCA evaluation of a Project
Proj-11	Do Not Publish	Flag a Project that is not to be published e.g. FAP

NEP-E - 2019 - Proposed	Version: 1					NEP 2019

7.1 Add/Edit Project Screen (Proj-1) (Proj-2)

This function allows adding and editing of Project details. The add/edit screens are very similar. Enabled fields shall depend upon the following whose rules are defined elsewhere:

- Project status
- Program status
- Program stage
- User

Field Name on Screen	MYPS Table	Source	Data Rules
1. Category Version *	Project	Populated when user imports a Project into a Program; or, when user assigns a Project to an existing Program, or chosen from drop down when added directly	Foreign key on 'program' table
2. Category	project	Added from Project Screen, or Imported through File / Import menu, or autopopulated.	Drawn from the Category Table. MYPS stores the category code in the Project table for RDIP/UDIP/PIP or RBP/UBP. Otherwise the Category ID is based on its Program.
3. Project Type *		On screen drop down (for Add Project only)	Shows i) Normal ii) Lump Sum or iii) Non Project iv) Additional Project, v) Itemized Project
4. LS Project ID *	project	For Itemized Project Type; drop down list of LS Projects	Identifies the Parent of the Itemized Project
5. Project ID *	project	Auto generated whether added from Project Screen, or Imported through File / Import menu.	Follows Project ID numbering convention. All numbers are auto generated.
6. Description *	project	Added from Project Screen, or Imported through File / Import menu	
7. Total Project Cost (Php)	project	Calculated from the sum of the costs of all Components under the Project in this Program	Disabled
8. Origin	project	Added from Project Screen, or Imported through File / Import menu. MYPS only stores the origin code in the project table.	Code table under MYPS Tools / Options / Project Origin
9. Region	projectoffices	Added from Project Screen, or Imported through File / Import menu. MYPS only stores the region code in the project table.	Code table under MYPS Tools / Options / Project Category
10. Operating Unit	projectoffices	Added from Project Screen, or Imported through File / Import menu. MYPS only stores the DEO code in the project offices table.	Code table for from Internal Org database is used for validation. Only if the Operating Unit is Central Office can the Implementing Office be different.

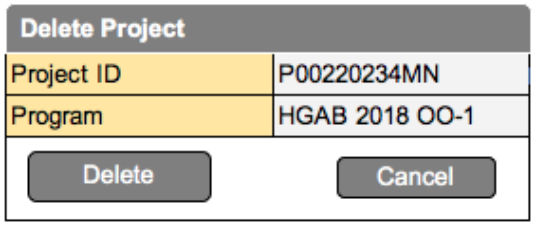

Field Name on Screen	MYPS Table	Source	Data Rules
11. Implementing Office	projectoffices	Added from Project Screen, or Imported through File / Import menu. MYPS only stores the DEO code in the project offices table.	Code table for from Internal Org database is used for validation.
12. District Engineering Office	projectoffices	Added from Project Screen, or Imported through File / Import menu. MYPS only stores the DEO code in the project offices table.	Code table for from Internal Org database is used for validation.
13. Legislative District	projectoffices	Added from Project Screen, or Imported through File / Import menu. MYPS only stores the DEO code in the project offices table.	Code table from Admin Areas database is used for validation.
14. City / Municipality	projectoffices	Added from Project Screen, or Imported through File / Import menu. MYPS only stores the city / municipality code in the project offices table.	Code table from Admin Areas database is used for validation.
15. Originating Agency	project	Added from Project Screen, or Imported through File / Import menu. MYPS only stores the organization code in the project table.	Code table imported from external org database
16. UACS	project	Added from Project Screen, or Imported through File / Import menu.	DBM rules change often
17. PAP	project	Added from Project Screen, or Imported through File / Import menu.	Valid codes from parentworkcode (thrust) table
18. Region Wide	project	Added from Project Screen, or Imported through File / Import menu.	
19. Emergency Code	Project	Added from Project Screen, or Imported through File / Import menu.	'Yes' or blank
20. PCMA Status	PCMA View	Tapped from PCMA view	Disabled: information only
21. Project Start Year	Project	Added from Project Screen, or Imported through File / Import menu.	

Field Name on Screen	MYPS Table	Source	Data Rules
22. Alternative Project Code	Project	Added from Project Screen, or Imported through File / Import menu.	
23. Alternate ID	Project	Populated by Functionality of MYPS	Disabled

Menu Item	Enabling Rules	Action
1. Save	Always	Saves the Changes after compliance with business and validation rules
2. Cancel	Always	Exits the screen without any changes saved

7.1.1 Delete Project (Proj-3)

This function will delete a Project from a Program, provided business rules permit.

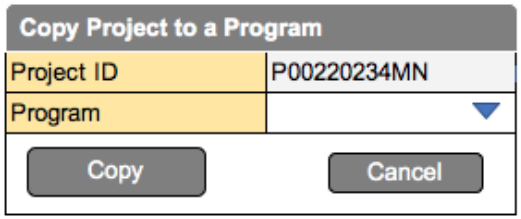

Field Name on Screen	MYPS Table	Source	Data Rules
1. Project ID	project	Auto populated by user selection	disabled
2. Program	project	Auto populated by user Project selection	disabled

Menu Item	Enabling Rules	Action
1. Delete	Always	Deletes the Project provided compliance with business and validation rules
2. Cancel	Always	Exits the screen without any action

7.1.2 Copy Project to a Program (Proj-4)

This function will copy a Project to another Program, provided business rules permit.

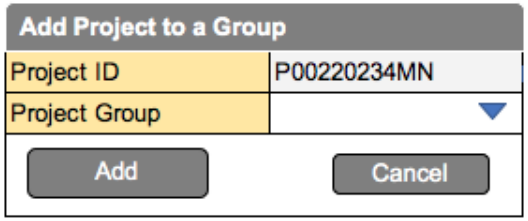

Field Name on Screen	MYPS Table	Source	Data Rules
1. Project ID *	project	User Selected	From RDIP/PIP to RBP: Project ID is upgraded from MY to BP, as per rules From RBP to BP/NEP/GAA/TF: Project ID is upgraded from BP to P, as per rules If a MYOA Project is copied to other Programs the Project ID is not changed. If already a P-series ID, the Project ID is not changed during the copy.
2. Program *	project	Available Project Groups	Mandatory; one selection from permitted Programs dropdown list

Menu Item	Enabling Rules	Action
1. Copy	Always	Copy the Project and all related to the nominated Program; and applies appropriate business rules
2. Cancel	Always	Exits the screen without any action

7.1.3 Add Project to a Project Group (Proj-6)

This function will delete a Project from a Program, provided business rules permit.

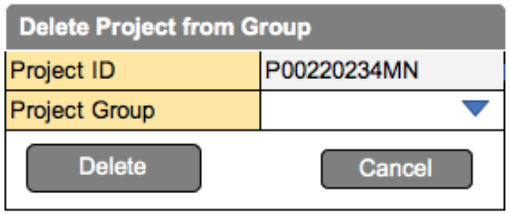

Field Name on Screen	MYPS Table	Source	Data Rules
3. Project ID *	project	User Selected	
4. Project Group *	project	Available Project Groups	Allow one or more selections from dropdown

Menu Item	Enabling Rules	Action
3. Add	Always	Add the Project to the nominated Groups; and applies Publishing rules for Groups
4. Cancel	Always	Exits the screen without any action

7.1.4 Delete Project from a Project Group (Proj-7)

This function will delete a Project from a Project Group.

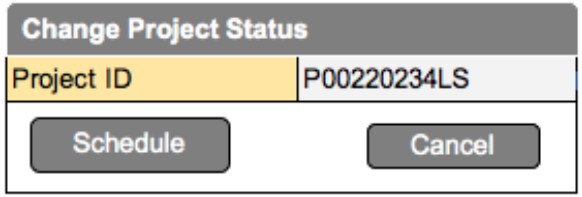

Field Name on Screen	MYPS Table	Source	Data Rules
1. Project ID *	project	User Selected	
2. Project Group *	project	List of Groups the Project is currently in.	Allow one or more selections from dropdown

Menu Item	Enabling Rules	Action
1. Delete	Always; if there is Group membership	Deletes the Project from the nominated Groups; and applies Publishing rules for Groups
2. Cancel	Always	Exits the screen without any action

7.1.5 Change Project Status (Proj-9)

This function shall cause the Project Status of itemized Lump Sum (LS) Projects, or an Additional Project to be changed from 'potential' to 'scheduled'.

Field Name on Screen	MYPS Table	Source	Data Rules
1. Project ID *	project	User selected	Either Project is LS, or Project is marked as an Additional Project.

Menu Item	Enabling Rules	Action
1. Schedule	If permitted	Updates the Project status as per the business rules
2. Cancel	Always	Exits the screen without any action

7.1.6 Conduct an MCA (Proj-10)

This function will conduct a chosen a Project from a Program, provided business rules permit.

Conduct MCA for Project: P002345012LZ

Network Capacity Expansion

		Item Maximum	Sub-Item Maximum	Score Points	Checkbox	Evaluation Score
1.0	PROJECT READINESS/STATUS	25	25			
1.1	a With Feasibility Study			10	☐	
	b With Traffic Impact Assessment/Rapid Assessment			5	☐	
1.2	Included the Master Plan Study			3	☐	
1.3	With RDC Endorsement			3	☐	
1.4	With Detailed Engineering Design			4	☐	
1.5	With Right of Way Acquisition Plan			5	☐	
2.0	ROAD NETWORK IMPORTANT AND PRESENT ROAD FACILITY	30				
2.1	Project Terminal Points (Start and End)		15			
2.1.1	N1 and N2			15	☐	

Save Cancel

Field Name on Screen	MYPS Table	Source	Data Rules
1. Project ID *	project	User selected	mandatory
2. MCA Name *	project	MCA Group: dropdown list	Mandatory; user chooses the appropriate MCA
3. Headers	multicriteria	Show the MCA header and description for each item in the chosen group	Auto populated; user only needs check the box or not
4. Item Maximum	multicriteria	MCA Items	Auto populated; sum of all weightings at that group level

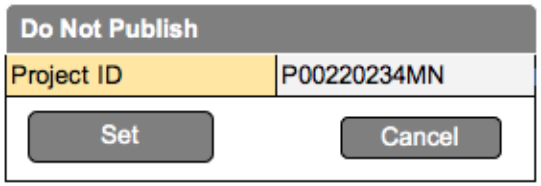

Field Name on Screen	MYPS Table	Source	Data Rules
5. Sub Item Maximum	multicriteria	MCA Items	Auto populated; sum of all weightings at that group level
6. Score Points	multicriteria	MCA Items	Auto populated; individual weightings at the item level
7. Check Box	projectmca	MCA Items; if stored as selectable; if this MCA has already been conducted the check boxes will be prefilled with the previous settings.	User selected; optional;
8. Evaluation score	Project; mcascore	Show Score if selected	Auto populated; individual weightings at the item level

The figure displayed is a sample only. The full set of items shall be shown for the selected MCA Group. The last line shall indicate the total MCA score in the Evaluation score column based on the user selections. Both the individual selections and the total score shall be saved if the save button is pressed.

Menu Item	Enabling Rules	Action
1. Save	Always	Save the total score in mcascore, and the individual selections in projectmca
2. Cancel	Always	Exits the screen without any action

7.1.7 Do Not Publish (Proj-11)

This function shall mark a Project as Do Not Publish, thus preventing it from being Published to other applications.

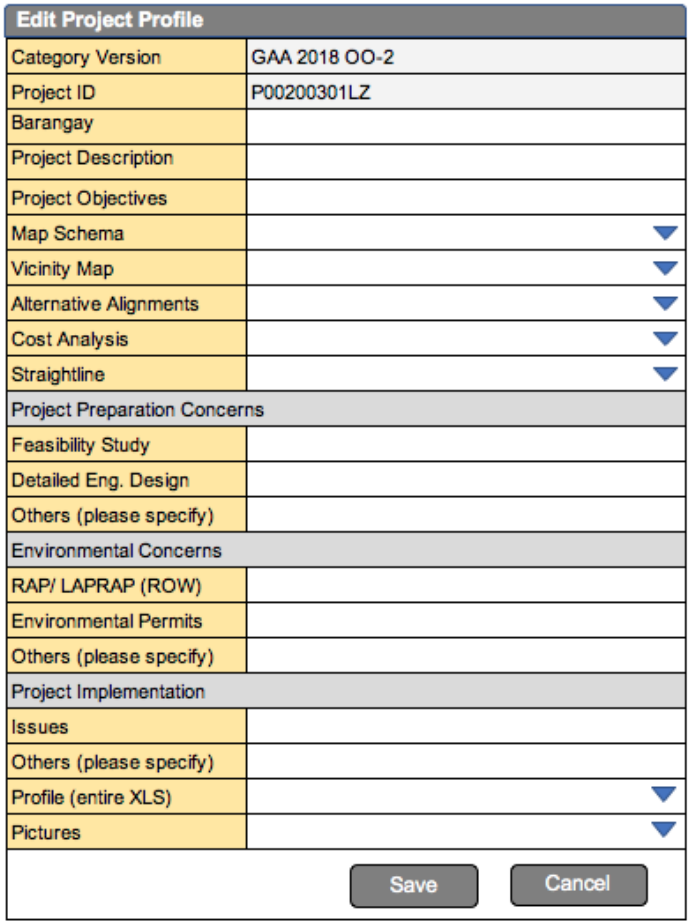

Field Name on Screen	MYPS Table	Source	Data Rules
1. Project ID *	project	Selected by User	Disabled

Menu Item	Enabling Rules	Action
1. Set	Always	Sets the Project as Do Not Publish
2. Cancel	Always	Exits the screen without any action

7.1.8 Project Profiles (Proj-12)

This function shall permit the editing of the Project Profile data.

Field Name on Screen	MYPS Table	Source	Data Rules
1. Category Version *	project	Selected by User	Disabled

Field Name on Screen	MYPS Table	Source	Data Rules
2. Project ID	Project	Selected by User	Disabled
3. Barangay	Project Profile	Free text	
4. Project Description	Project Profile	Free text	
5. Project Objectives	Project Profile	Free text	
6. Map Schema	Project Profile	Free text	URL of PDF, JPG – user may select more than 1
7. Vicinity Map	Project Profile	Free text	URL of PDF, JPG – user may select more than 1
8. Alternative Alignments	Project Profile	Free text	URL of PDF, JPG – user may select more than 1
9. Cost Analysis	Project Profile	Free text	URL of PDF, JPG – user may select more than 1
10. Straightline	Project Profile	Free text	URL of PDF, JPG – user may select more than 1
11. Feasibility Study	Project Profile	Free text	
12. Detailed Eng. Design	Project Profile	Free text	
13. Others (please specify)	Project Profile	Free text	
14. RAP/ LAPRAP (ROW)	Project Profile	Free text	
15. Environmental Permits	Project Profile	Free text	
16. Others (please specify)	Project Profile	Free text	
17. Issues	Project Profile	Free text	
18. Others (please specify)	Project Profile	Free text	
19. Profile (entire XLS)	Project Profile	Free text	URL of PDF, JPG, excel
20. Pictures	Project Profile	Free text	URL of PDF, JPG – user may select more than 1

Menu Item	Enabling Rules	Action
1. Save	Always	Save the results; upload the documents to the server following naming conventions
2. Cancel	Always	Exits the screen without any action

7.2 Component Screen

Display of Component details, which are fully described in Add/Edit Component section following.

Component	Schedule	MYOA	Targets	Activities	Funding	Notes	Programs	History		
Comp ID	Comp Type	Description		Total	2018	2019	2020	2021	2022	2023
CW1	Civil Works	Concrete Road		1,500,000.00	1,500,000.00	0.00	0.00	0.00	0.00	0.00

In some instances, the display for the above screen shall show other Program data as per the functional rules, disabled with differences in Type of Work, Target or Unit highlighted in blue. Comparisons permitted:

- NEP versus NEP with Errata (example shown below)
- HGAB versus HGAB with Amendments
- RDIP versus PIP
- PIP versus RDIP versus GAA implementations
- GAA versus GAA With Revisions

This principle is applied to: Component, Schedule, MYPA, Targets, Activities, and Funding Tabs. An example of NEP versus NEP with Errata.

Project	Component	Schedule	MYOA	Targets	Work Items	Funding	Notes	Programs	RDC	Profile
Type/Source	Description	Comp ID		Total	2016	2017	2018	2019	2020	2021
Civil Works	Airport-Turno-	MY00200301LZ-CW1		310,000	-	100,000	-	110,000	100,000	etc
Total				310,000	-	100,000	-	110,000	100,000	
GAA 2016	Airport-Turno-	P00002809MN-CW1		141,000	141,000					
GAA 2017	Airport-Turno-	P00109713MN-CW1		100,000		100,000				
NEP 2019	Airport-Turno-	P00251630MN-CW1		40,000				40,000		

7.2.1 Add/Edit Component (Comp-1) (Comp-2)

These functions permit adding and editing of Component data.

Add Component

Field Name on Screen	MYPS Table	Source	Data Rules
1. Component Id *	Component Costs	Added from Project Component Cost Screen, or Imported through File / Import menu.	Component Id is prefixed with the component type abbreviation, followed by one or more digits. Max length of this can be no more than the length of "project id" field in e-NGAS (currently, 20).
2. Component Type *	Component Costs	Added from Project Component Cost Screen, or Imported through File / Import menu.	See DO 153 Series 2016. Valid Component Types are FS, DED, CWD, ROW, CW, DR, CS, LS, EAO, OTH.
3. Component Description *	Component Costs	Added from Project Component Cost Screen, or Imported through File / Import menu.	All Component Descriptions must be unique within the Project. This should be automatically populated in the interface through combination of the Project Description and the Type of Work.
4. Planned Start Date	Component Costs	Added from Project Screen, or Imported through File / Import menu. Added from Project Screen, or Imported through File / Import menu.	Can be no earlier than the Start Date of the Program to which this belongs.
5. Planned End Date	Component Costs	Added from Project Screen, or Imported through File / Import menu. Added from Project Screen, or Imported through File / Import menu.	i) >= Planned Start Date ii) Not more than Planned Start Date + 2 years (funding validity period in the GAA for this Component)
6. Project Start Year	project	Project Cost table	Disabled: information only
7. Cost 1 through Cost 10	Component Costs	Added from Project Component Cost Screen, or Imported through File / Import menu. Added from Project Screen, or Imported through File / Import menu.	
8. Cost Total	Project Component	Calculated from the sum of the costs of all Components under the Project in this Program	Calculated from the sum of the costs of all Components under the Project in this Program

Button Name	Enabling Rules	Action
1. Save	Enabled always	Saves all changes after ensuring compliance with validation and business rules.
2. Cancel	Enabled always	Exit without saving any changes

7.2.2 Delete Component (Comp-3)

These function permits deletion of a Component.

Field Name on Screen	MYPS Table	Source	Data Rules
1. Component Id *	Project Component	Project Component based on user selection.	Delete if permitted

Button Name	Enabling Rules	Action
1. Delete	Enabled always	Delete the component provided all related business rules are met.
2. Cancel	Enabled always	Exit without deleting

7.3 Component Schedule Tab

This tab shows the basic planned start and end dates of the Project Components. They are managed through the Add/Edit Project Component screen.

Component	Schedule	MYOA	Targets	Activities	Funding	Notes	Programs	History

Comp ID	2018	2019	2020	2021	2022
CW1	01/05/2018 - 10/30/2019				

An example of NEP and NEP with Errata:

RDIP - Region X

Project	Component	Schedule	MYOA	Targets	Work Items	Funding	Notes	Programs	RDC	Profile

Source	Comp ID	2018	2019	2020	2021	2022
RDIP - Region X	MY00200301LZ-CW1					
GAA 2016	P00002809MN-CW1					

7.4 Major Items of Work (Activities) Screen

This Tab is the display only view of Major Work Items, which are fully described in Add/Edit Major Work Items (Activities) following.

Component	Schedule	MYOA	Targets	Activities	Funding	Notes	Programs	History			
Comp ID	Infra ID	Dominant	Type of Work		Physical Target	Target Unit		Start St	End St	Start Chain	etc
CW1	FR00123LZ	YES	Concrete Road		1.00	Lane Kms		K0012+100	K0013+100		
CW1	FR00123LZ	YES	Concrete Road		0.54	Lane Kms		K0015+200	K0015+754		

An example of NEP and NEP with Errata:

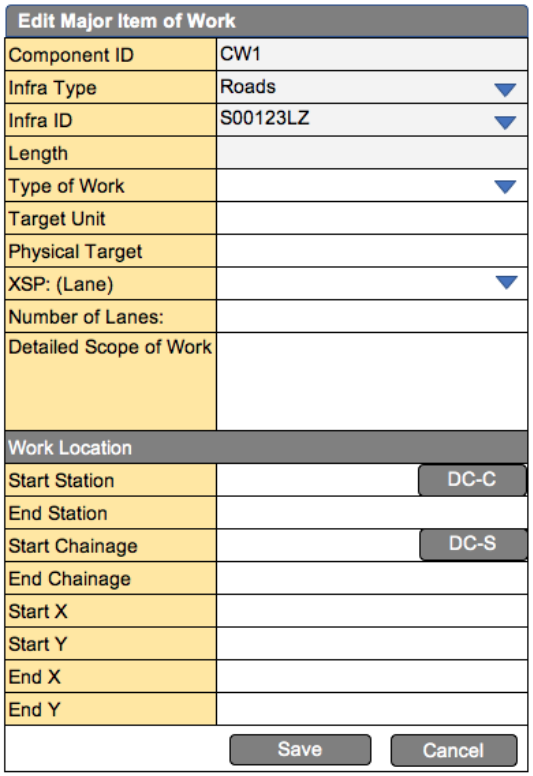

RDIP - Region X

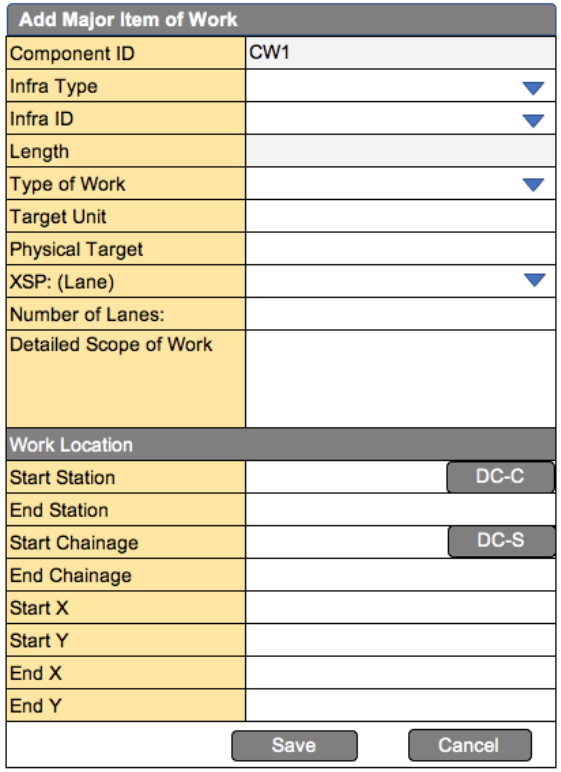

Project	Component	Schedule	MYOA	Targets	Work Items	Funding	Notes	Programs	RDC	Profile
Comp ID	Infra ID	Dominant	Type of Work		Physical Targe	Target Unit		Start St	End St	Start Chain
CW1	FR00123LZ	YES	Concrete Road		1.00	Lane Kms		K0012+100	K0013+100	
CW1	FR00123LZ	YES	Concrete Road		0.54	Lane Kms		K0015+200	K0015+754	

Activity Item	Action	Description
Work-1	Add	Adds a Major Item of Work to a Component
Work-2	Edit	Edit a new Major Item of Work in a Component
Work-3	Delete	Delete a new Major Item of Work from a Component
Work-4	Mark as Dominant	Context Menu: selected Work Item to be set as Dominant
Work-5	Clear Dominant	Context Menu: selected Work Item to be set as non-Dominant

7.4.1 Add/Edit Major Work Items (Activities) (Work-1) (Work-2)

This function allows adding and editing of Major Items of Work for a Project Component.

Field Name on Screen	MYPS Table	Source	Data Rules
1. Component Id *	Component Costs	From Selected Component	Mandatory; Disabled
2. Infra Type *	Infra_type	Dropdown list from infra_type table	Mandatory; Disable for edit

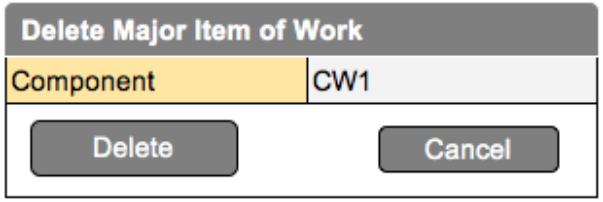

Field Name on Screen	MYPS Table	Source	Data Rules
3. Infra Id *	Activity	Added from Major Items of Work Screen, or Imported through File / Import menu.	For Road Sections, must match an existing Road Section Id or Future Road Section Id; For Bridges, must match an existing Bridge Id, or Future Bridge Id; For all Other Types of Infrastructure, there is no validation; Disabled for Edit
4. Length	activity	Added from Major Items of Work Screen, or Imported through File / Import menu.	Disabled: Represents length of Section or distance based on Start and End chainages. Auto calculated
5. Type of Work	activity	Added from Major Items of Work Screen, or Imported through File / Import menu.	Drop-down menu based on Type of Work from Tools / Options screen
6. Target Unit *	activity	Automatically populated from Type of Work table from Tools / Options	Dependent on Type of Work
7. Physical Target *	activity	Added from Major Items of Work Screen, or Imported through File / Import menu.	Must be non-zero. Must be >= Min and <= Max amount specified in the Type of Work table from Tools / Options for the given Type of Work. Must also be consistent with the Data Type (integer or real) specified for the given Type of Work.
8. XSP (Lane)	RBIA	Cross sectional Position on the carriageway	Optional: from dropdown list if chosen
9. Number of Lanes	RBIA	From RBIA for existing roads, User supplied for new roads	Mandatory for road infrastructure. If new road, must be between 2 and 6.
10. Detailed Scope of Work	activity	Added from Major Items of Work Screen, or Imported through File / Import menu.	Optional: free text
11. Start Station	activity		Valid for National Roads with LRP station markers.
12. End Station	activity		Valid for National Roads with LRP station markers.

Field Name on Screen	MYPS Table	Source	Data Rules
13. Start Chainage (m)	activity		For Roads, Positive and <= Length of Road Section For Other Types of Infrastructure, not required.
14. End Chainage (m)	activity		For Roads, >= From (m) and <= Length of Road Section For Other Types of Infrastructure, not required. Also, should prevent overlapping chainages on same type of work.
15. Start X Coordinate	activity		>=115 and <= 130 (longitude limits for Philippines)
16. Start Y Coordinate	activity		>=5 and <= 25 (latitude limits for Philippines)
17. End X Coordinate	activity		>=115 and <= 130 (longitude limits for Philippines)
18. End Y Coordinate	activity		>=5 and <= 25 (latitude limits for Philippines)

Button Name	Enabling Rules	Action
1. Save	Enabled always	Saves all changes after ensuring compliance with validation and business rules.
2. Cancel	Enabled always	Exit without saving any changes
3. DC-C	Enabled for existing national roads with LRP	Distance converter to convert entered Station limits to chainages: also populates the chainage fields
4. DC-S	Enabled for existing national roads with LRP	Distance converter to convert entered chainage limits to station limits: also populates the chainage fields

7.4.2 Delete Major Work Items (Activities) (Work-3)

This function allows the deletion of a Major Work Item. This may cause a change in the Component Description.

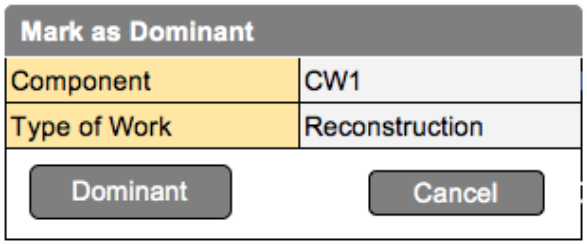

Field Name on Screen	MYPS Table	Source	Data Rules
1. Component Id *	Major Work Items	Project Component/Work Item based on user selection.	Delete if permitted

Button Name	Enabling Rules	Action
1. Delete	Enabled always	Delete the MIW provided all related business rules are met.
2. Cancel	Enabled always	Exit without deleting

7.4.3 Mark As Dominant (Activities) (Work-4)

This function marks all Major Work Items for the selected component/selected Type of Work as Dominant.

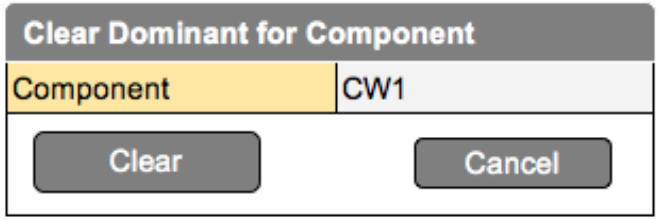

Field Name on Screen	MYPS Table	Source	Data Rules
1. Component Id *	Major Work Items	Project Component/Work Item based on user selection.	
2. Type of Work *	Major Work Items	Project Component/Work Item based on user selection.	

Button Name	Enabling Rules	Action
1. Dominate	Enabled always	Marks all selected Activities with the same Type of Work as Dominant, and all others as non-dominant for this Component.
2. Cancel	Enabled always	Exit without any changes

7.4.4 Clear Dominant (Activities) (Work-5)

This function clears the Dominant Major Work Items flag for all activities in the selected component.

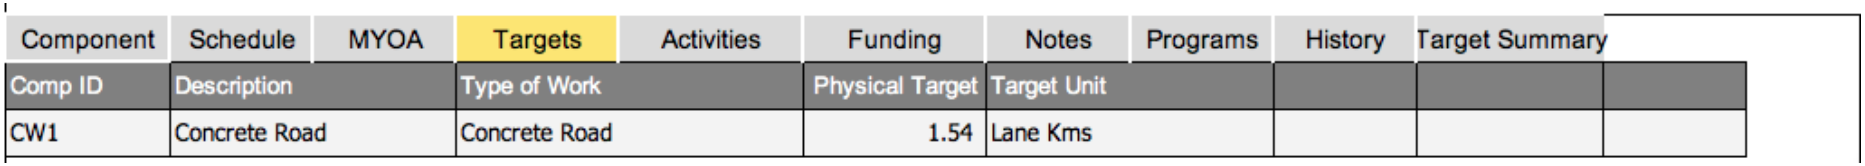

Field Name on Screen	MYPS Table	Source	Data Rules
1. Component Id *	Major Work Items	Project Component/Work Item based on user selection.	Delete all Dominant flags for this component

Button Name	Enabling Rules	Action
1. Clear	Enabled always	Clears the Dominant setting for all Activities of this Component.
2. Cancel	Enabled always	Exit without any changes

7.1 Component Targets Tab

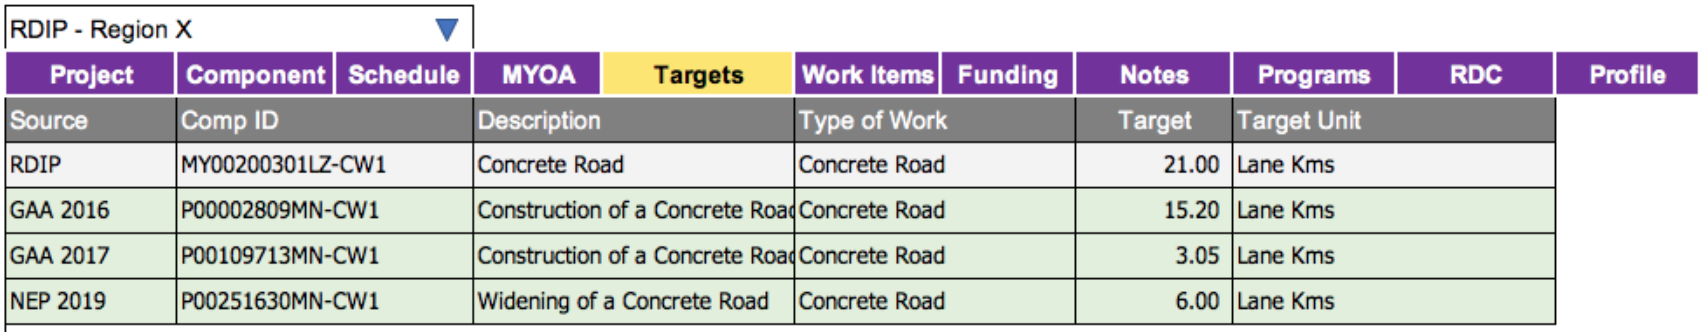

The following Tab is read only and shows the total Physical Target of the dominant work type for each Component. No functions are performed on this screen.

Component	Schedule	MYOA	Targets	Activities	Funding	Notes	Programs	History	Target Summary

Comp ID	Description	Type of Work	Physical Target	Target Unit			
CW1	Concrete Road	Concrete Road	1.54	Lane Kms			

An example of NEP and NEP with Errata shown below:

RDIP - Region X

Project	Component	Schedule	MYOA	Targets	Work Items	Funding	Notes	Programs	RDC	Profile

Source	Comp ID	Description	Type of Work	Target	Target Unit
RDIP	MY00200301LZ-CW1	Concrete Road	Concrete Road	21.00	Lane Kms
GAA 2016	P00002809MN-CW1	Construction of a Concrete Roac	Concrete Road	15.20	Lane Kms
GAA 2017	P00109713MN-CW1	Construction of a Concrete Roac	Concrete Road	3.05	Lane Kms
NEP 2019	P00251630MN-CW1	Widening of a Concrete Road	Concrete Road	6.00	Lane Kms

Field Name on Screen	MYPS Table	Source	Data Rules
1. Component Id	Project Component	For selected Project	Disabled
2. Description		Component Description	Disabled
3. Type of Work	Major Work item	Based on selected Project; dominant type of work	Disabled
4. Physical Target			Disabled; Total physical targets of the dominant Type of Work for this component
5. Target Unit			Dependent on dominant Type of Work

7.2 Funding Profile Tab

This Tab shows the current funding agreements and is read only. Management of these are by the Add/Edit/Delete Funding functions.

Component | Schedule | MYOA | Targets | Activities | Funding | Notes | Programs | History

Source	Agreement	Percentage
GOP	DPWH-GAA-2018	100.00

An example of NEP and NEP with Errata is shown below:

Component | Schedule | MYOA | Targets | Activities | Funding | Notes | Programs | History

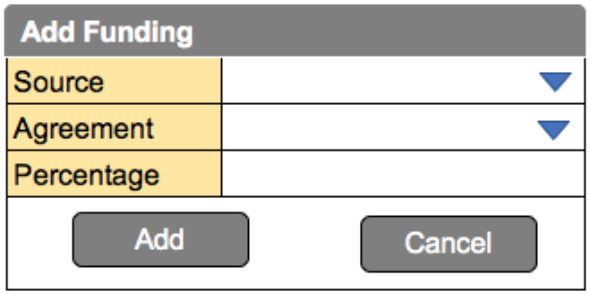

Stage	Project ID	Source	Agreement	Percentage
NEP-E	P00200301LZ	GOP	DPWH-GAA-2018	100.00
NEP	P00200301LZ	GOP	DPWH-GAA-2018	100.00

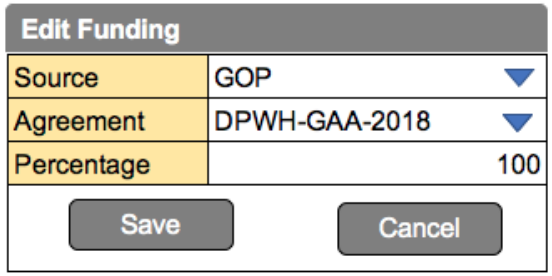

The funding actions permitted are:

Funding Item	Action	Description
Fund-1	Add	Adds a Funding Agreement to a Project
Fund-2	Edit	Edits a Funding Agreement in a Project
Fund-3	Delete	Deletes a Funding Agreement from a Project

7.2.1 Add/Edit Funding (Fund-1) (Fund-2)

These functions allow adding and editing of Funding Agreements.

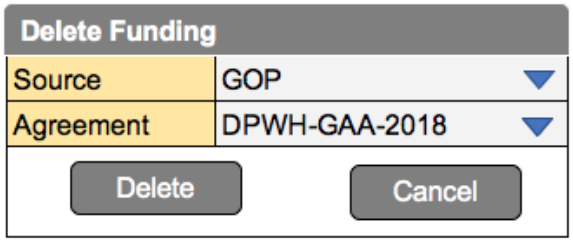

Field Name on Screen	MYPS Table	Source	Data Rules
1. Source *	fundingsource	Added from Project Fund Source screen, or Imported through File / Import menu.	Based on drop-down from Tools / Options / Funding Source - Organization
2. Agreement *	fundingagreement	Added from Project Fund Source screen, or Imported through File / Import menu.	Based on drop-down from Tools / Options / Funding Agreement – Funding Agreement Code
3. Percentage *	projectfunding	Added from Project Fund Source screen, or Imported through File / Import menu.	>0 and <=100. The sum of all Funding Agreements on this Project must equal 100.

Button Name	Enabling Rules	Action
1. Add/Save	Enabled always	Saves all changes after ensuring compliance with validation and business rules.
2. Cancel	Enabled always	Exit without saving any changes

7.2.2 Delete Project Funding (Fund-3)

This function permits the deletion of a Funding Agreement from a Project.

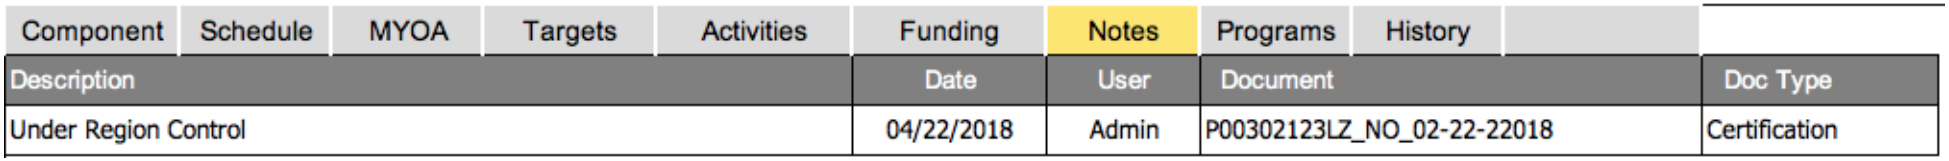

Field Name on Screen	MYPS Table	Source	Data Rules
1. Source *	fundingsource	Added from Project Fund Source screen, or Imported through File / Import menu.	Based on drop-down from Tools / Options / Funding Source - Organization
2. Agreement *	fundingagreement	Added from Project Fund Source screen, or Imported through File / Import menu.	Based on drop-down from Tools / Options / Funding Agreement – Funding Agreement Code

Button Name	Enabling Rules	Action
1. Delete	Enabled always	Deletes this Project Funding.
2. Cancel	Enabled always	Exit without making any changes

7.3 Notes Tab

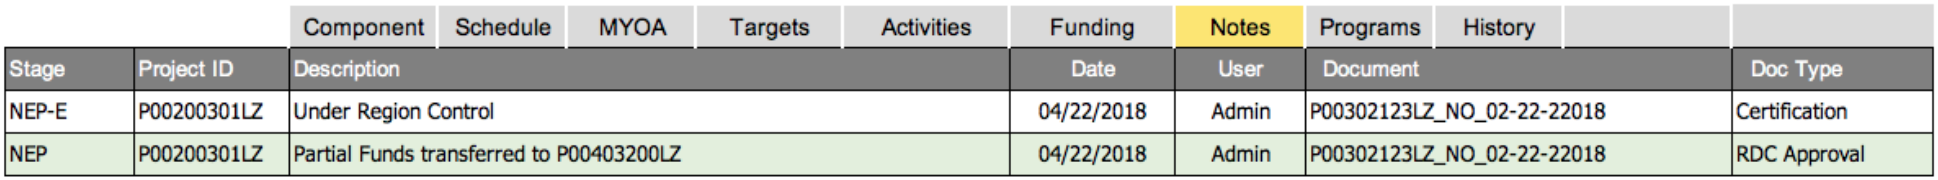

This Tab shows the currently recorded Notes for a Project. They are managed by the Add/Edit/Delete Notes functions.

Component	Schedule	MYOA	Targets	Activities	Funding	Notes	Programs	History

Description	Date	User	Document	Doc Type
Under Region Control	04/22/2018	Admin	P00302123LZ_NO_02-22-22018	Certification

An example of NEP and NEP with Errata is shown below:

		Component	Schedule	MYOA	Targets	Activities	Funding	Notes	Programs	History

Stage	Project ID	Description	Date	User	Document	Doc Type
NEP-E	P00200301LZ	Under Region Control	04/22/2018	Admin	P00302123LZ_NO_02-22-22018	Certification
NEP	P00200301LZ	Partial Funds transferred to P00403200LZ	04/22/2018	Admin	P00302123LZ_NO_02-22-22018	RDC Approval

The field shown on the screen are:

Field Name on Screen	MYPS Table	Source	Data Rules
1. Stage	Program	Program stage	As per selected Project
2. Project ID	Project	Project ID	As per selected Project
3. Description	history	Added from Project Notes screen, or Imported through File / Import menu.	Free text
4. Date	history	Automatically stored by MYPS	Valid date in mm/dd/yyyy format
5. User	history	Logged in User ID	Auto populated
6. Document	history	Selected by User	Auto renamed and stored in PS server location
7. Document Type		Dropdown list of Document Types	

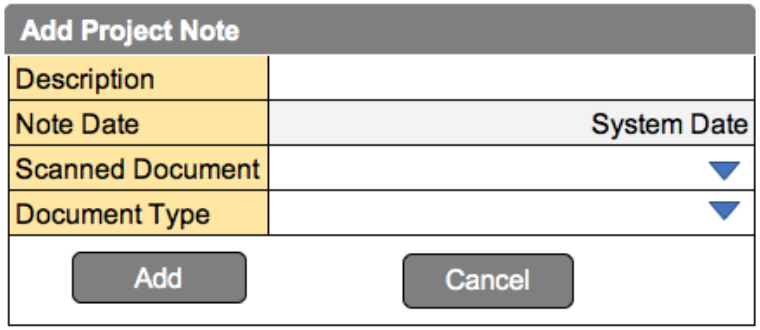

The actions permitted on Notes are:

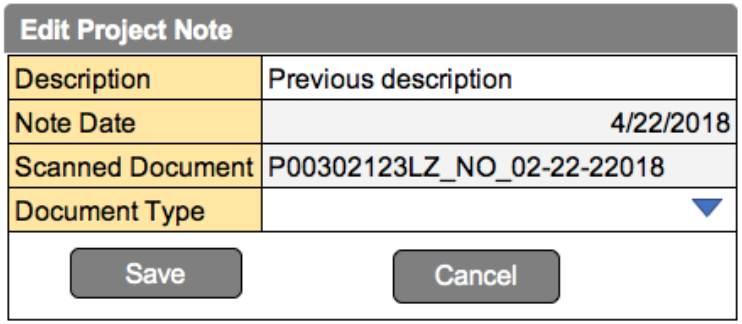

Notes Item	Action	Description
Note-1	Add	Adds a Note to a Project, Component or Major Work item
Note-2	Edit	Edit a Note
Note-3	Delete	Delete a Note
Note-4	History	View the Note history for a Project back to its origin

Notes can be activated from a Project, a Project Component or a Major Item of Work. The History table is populated based on the level at which the Note function is called. Notes generated by Users can be edited or deleted. Notes generated by MYPS functions cannot be edited or deleted.

7.3.1 Add and Edit Project Note (Note-1) (Note-2)

This function permits adding and editing of Project Notes.

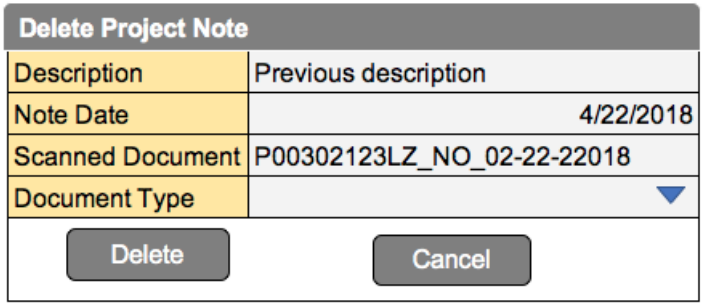

Field Name on Screen	MYPS Table	Source	Data Rules
1. Description *	history	Added from Project Notes screen, or Imported through File / Import menu.	Free text
2. Note Date *	history	Automatically stored by MYPS	Mandatory; auto populated from system date
3. Scanned Document	history	Selected by User	Optional; For Add Note, chosen document is copied and renamed in PS server; Disabled for the Edit option if populated, enabled if null
4. Document Type	history	Drop down list of Document types	Mandatory

Button Name	Enabling Rules	Action
1. Add /Save	Enabled for Authorized user	Opens Add or Edit Project Notes Screen
2. Cancel	Enabled for Authorized user	Opens Add or Edit Project Notes Screen

7.3.2 Delete Project Note (Note-3)

This function permits deleting of User created Notes.

Field Name on Screen	MYPS Table	Source	Data Rules
1. Description *	history	Selected by User	Disabled
2. Note Date *	history	Based on selection	Disabled
3. Scanned Document	history	Based on selection	Disabled
4. Document Type	history	Based on selection	Disabled

Button Name	Enabling Rules	Action
1. Delete	Enabled for Authorized user	Deletes the Note if it was added by a User; Not permitted if auto added from MYPS function.
2. Cancel	Enabled for Authorized user	Cancels the operation with no changes

7.3.3 View Notes History (Note-4)

This function shall popup a history of notes for the selected Project back to its earliest rendition or Parent Project.

Project ID	Notes Description	Year	Stage	Date	User	Document	Doc Type
P00200301LZ	Under Region Control	2018	GAA-R	04/22/2018	Admin	P00302123LZ_NO_02-22-22018	Certification
P00200301LZ	Partial Funds transferred to P00403200LZ	2018	GAA	03/22/2018	Admin	P00302123LZ_NO_02-22-22018	RDC Approval
BP00212112LZ	Proposed for RBP	2018	RBP	01/22/2018	Admin	P00302123LZ_NO_02-22-22018	RDC Approval
MY00134501LZ	Proposed for RBP	2018	RBP	12/20/2017	Admin	P00302123LZ_NO_02-22-22018	RDC Approval

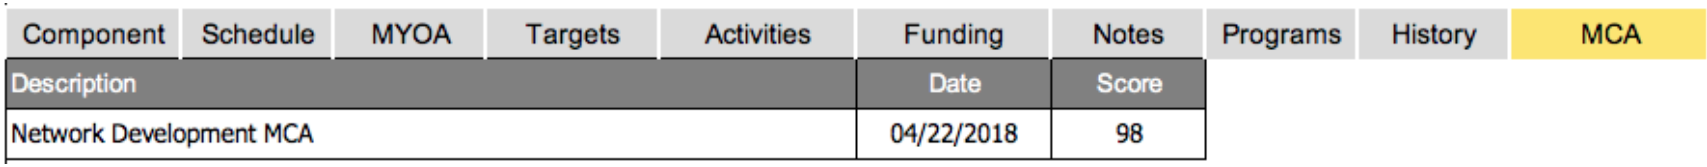

Field Name on Screen	MYPS Table	Source	Data Rules
1. Project ID	history	Selected by User	Disabled
1. Note Description	history		Disabled
2. Year	history		Disabled
3. Stage	history		Disabled
4. Note Date	history		Disabled
5. User	history		Disabled
6. Scanned Document	history		Viewable (if permitted)
7. Document Type	history		Disabled

The scanned documents shall be viewable provided User has access permission to server.

The list shall include all notes references for the selected project, and based on its Alternate ID, through to its earliest reference.

The table shall be printable and exportable.

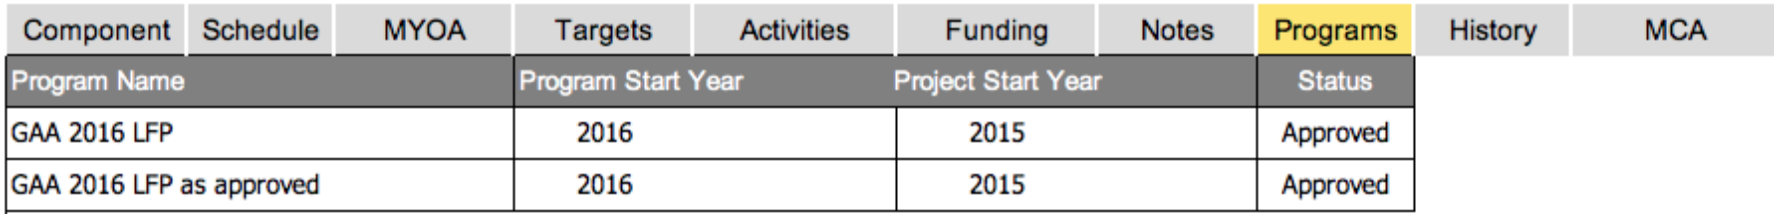

7.4 Project MCA Information Tab

Field Name on Screen	MYPS Table	Source	Data Rules
1. Description	projectmca	Automatically stored by MYPS upon hitting "Conduct MCA"	Disabled
2. Date	projectmca	Automatically stored by MYPS upon hitting "Conduct MCA"	Disabled
3. Score	projectmca	Automatically stored by MYPS upon hitting "Conduct MCA"	Disabled

7.5 Program Information Tab

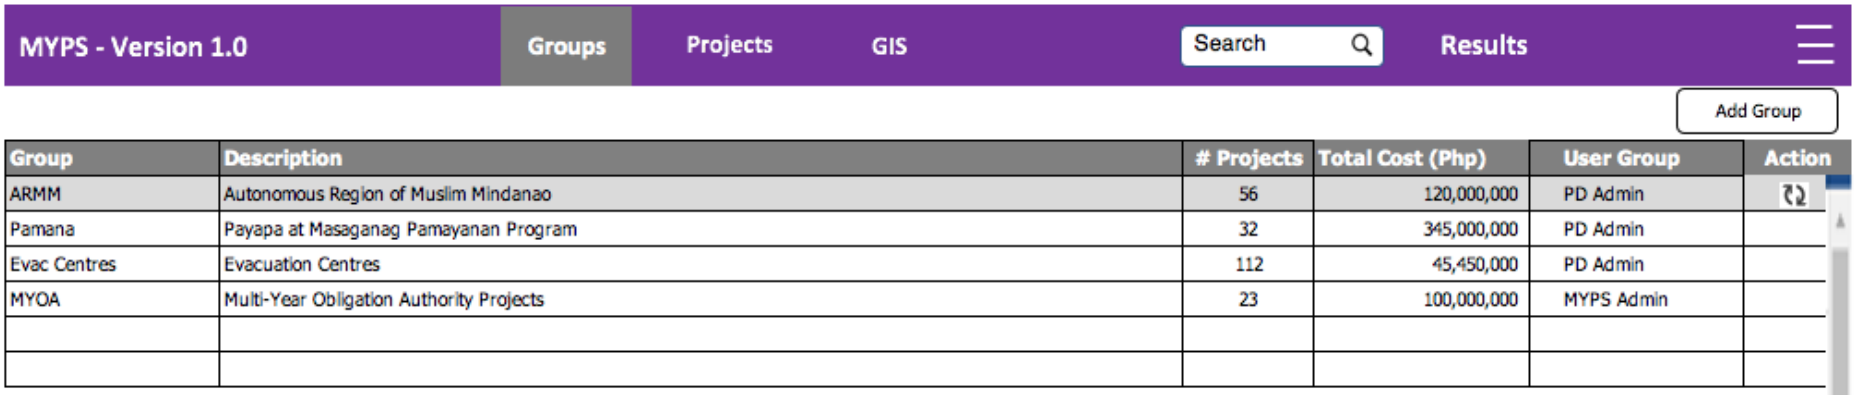

This tab displays the Program history for the Project.

Field Name on Screen	MYPS Table	Source	Data Rules
1. Program Name *	program	Automatically stored by MYPS upon assigning a Project to a Program, or Removing a Project from a Program	Valid Program Name. Double-clicking on a Program Name opens the instance of the Project in that Program.
2. Program Start Year *	projectinprogram	From Program table	See Edit Program Screen
3. Project Start Year *	projectinprogram	From Project in Program table	See Edit Working Program Screen
4. Status *	programstatus	From Program table	Working, or Approved

8 Project Group Module

This module allows management of Project Groups.

Group	Description	# Projects	Total Cost (Php)	User Group	Action
ARMM	Autonomous Region of Muslim Mindanao	56	120,000,000	PD Admin	
Pamana	Payapa at Masaganag Pamayanan Program	32	345,000,000	PD Admin	
Evac Centres	Evacuation Centres	112	45,450,000	PD Admin	
MYOA	Multi-Year Obligation Authority Projects	23	100,000,000	MYPS Admin	

Field Name on Menu	Comments
1. Groups	Selects the Project Groups page;
2. Projects	Selects the Projects page
3. GIS	Selects the GIS page and displays Projects in current selected Group
4.	Shows the main function menu

Field Name on Screen	Source	Action
1. Name/Group Name	project_group	Double-click on a row opens the Projects page for the selected Group
2. Description	project_group	A Complete description of the Project Group
3. No of Projects	project_group	The Total number of Projects in the Group
4. Total Cost	project_group	Total Project Costs of all Projects in the Group
5. User Group	project_group	Name of Group Creator

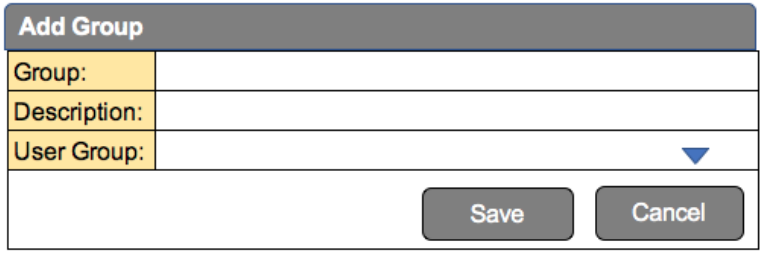

The actions for each Project Group listed are:

pGroup Item	Action	Description
pGroup-1	Add	Create a new Project Group
pGroup-2	Edit	Edit attributes of a Project Group
pGroup-3	Delete	Delete a Project Group
pGroup-4	Re-publish Group	Publish the Group name for all Projects in the Group
pGroup-5	View Projects	View the Projects in a Project Group
pGroup-6	Delete Project from Group	Delete a Project from a Project Group
pGroup-7	View Group in GIS	View the Projects in a Project Group in GIS browser
pGroup-8	Add Project to Group	Add a Project to a Project Group

This function is implemented as Proj-8 Add Project to Project Group (see Section 7.1.3)

8.1 Project Groups

8.1.1 Add Project Group (pGroup-1)

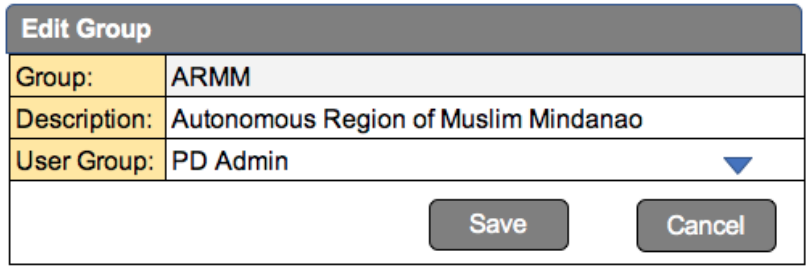

Field Name on Screen	MYPS Table	Source	Data Rules
1. Group *	Projectgroup; name	User input	Mandatory; Unique; free text
2. Description *	Projectgroup; description	User input	Mandatory; Free text
3. User Group *	Projectgroup; Usertype	Drop-down from mypsuser_seccurity_ug	Mandatory; select only 1 from Drop-down

Button Name	Enabling Rules	Action
1. Save	Always	Saves the data supplied, including the username and date of time of creation, creates a record in the Project Change Log, and closes the form.
2. Cancel	Always	Closes the form without saving

8.1.2 Edit Project Group (pGroup-2)

This function permits editing of Project Group attributes.

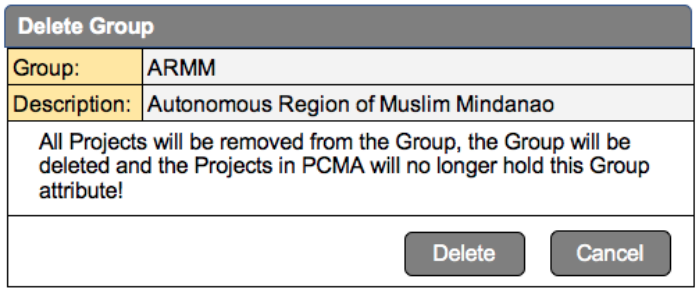

Field Name on Screen	MYPS Table	Source	Data Rules
1. Group	Projectgroup; name	Autopopulate	Mandatory; disabled
2. Description *	Projectgroup; description	Autopopulate	Mandatory; enabled; free text
3. User Group *	Projectgroup; Usertype	Drop-down from User Groups	Mandatory; select only 1 from Drop-down

Button Name	Enabling Rules	Action
1. Save	Always	Saves the data supplied, including the username and date of time of creation, creates a record in the Project Change Log, and closes the form.
2. Cancel	Always	Closes the form without saving

8.1.3 Delete Project Group (pGroup-3)

This function permits deletion of a Project Group. This will cause this Project Group data to be removed from other applications, and the deletion of the Group.

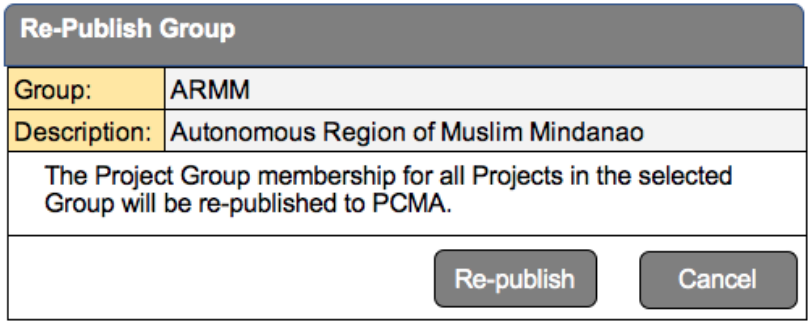

Field Name on Screen	MYPS Table	Source	Data Rules
1. Group	Projectgroup; name	Group selected by User	disabled
2. Description	Projectgroup; description	Autopopulate	disabled

Button Name	Enabling Rules	Action
1. Delete	Always	Apply Publishing functional rules. Deletes the Project Group from the ProjectGroup and ProjectinGroup tables.
2. Cancel	Always	Closes the form without deleting

8.1.4 Republish Project Group (pGroup-4)

This function shall cause the refreshing (republishing) of this Project Group tag from all related Projects in other applications.

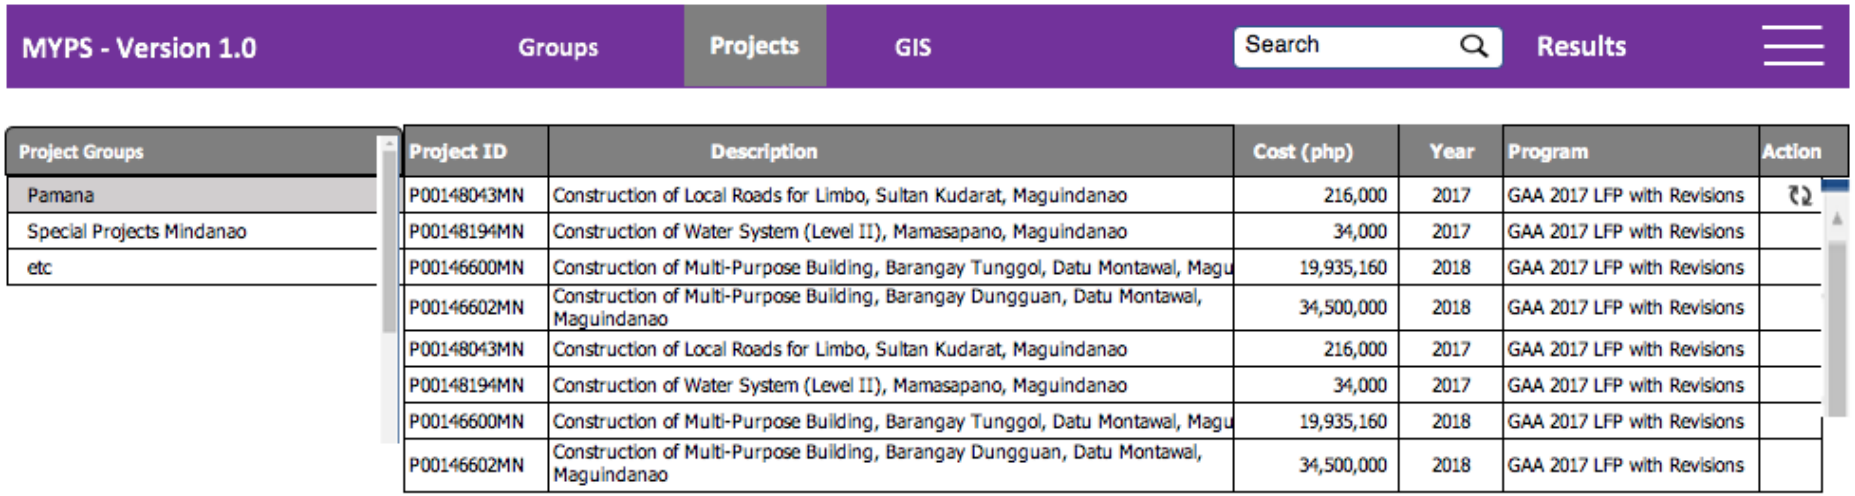

Field Name on Screen	MYPS Table	Source	Data Rules
1. Group	Projectgroup; name	Autopopulate	disabled
2. Description	Projectgroup; description	Autopopulate	disabled

Button Name	Enabling Rules	Action
1. Re-publish	Always	Apply Publishing functional rules.
2. Cancel	Always	Closes the form without re-publishing.

8.2 View Projects in Group (pGroup-5)

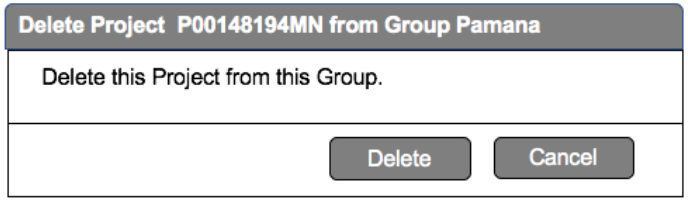

This (read only) display shows all the Projects for the selected Group. Two functions are permitted on a selected a Project to Delete from Group or View the Project data.

Field Name on Screen	Source	Action
1. Project Groups	project_group	Double-click on a row displays the Projects for the selected Group
2. Project ID	projectingroup	A Complete description of the Project Group
3. Description	Project	The project Description
4. Cost	Project	The Project Cost
5. Project Start Year	project_group	The infra year of the Project
6. Program	project_group	The Name of the Program the Project belongs to

8.2.1 Delete a Project from a Group (pGroup-6)

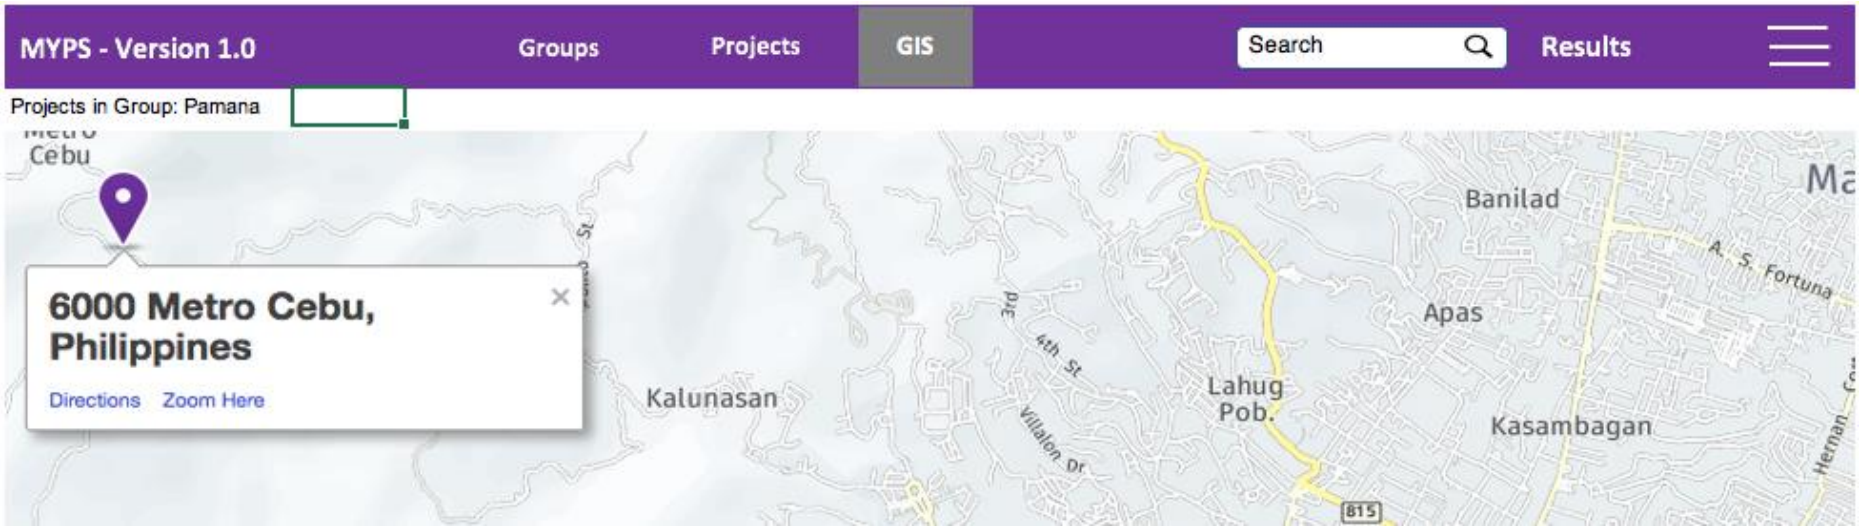

This function shall remove a Project from a Project Group.

Button Name	Enabling Rules	Action
1. Delete	Always	Ensure compliance with all Project Group Publishing rules
2. Cancel	Always	Closes the form without any changes.

8.2.2 Project Group in GIS (pGroup-7)

All Projects from the selected Project Group will be displayed in MYPS or the GIS web app.

9 Program Module

This module manages the functionality required for Programs.

9.1 Programs Screen

The initial display screen is shown below.

Program Name	Stage	Status	Cost (php)	Year	No of Projects	No. Published	User Group	Action
GAA 2018 OO-1	GAA-R	Working	230,000,001.00	2018	4,100	3,800	DPD Admin	
GAA 2018 OO-1 as approved	GAA	Approved	220,000,000.00	2018	4,100	0	DPD Admin	
GAA 2018 OO-2	GAA-R	Approved	10,000,000.00	2018	8,345	7,900	PD Admin	
HGAB 2018 OO-1	HGAB-I	Approved	9,500,000.00	2018	7,800	0	DPD Admin	
HGAB 2018 OO-1 as approved	HGAB	Approved	9,500,000.00	2018	7,800	0	DPD Admin	
GAA 2018 Convergence and Special Support Program	GAA-R	Approved	120,000,000.00	2018	10,000	8,900	PD Admin	

Field Name on Menu	Comments
1. Programs	Selects the Program page; lists all current programs
2. Publish Status	Selects the Publish Stage page;
3. Validate	Selects the Validate page; lists unpublished Projects
4. Filter	Selects the Filter page; sets a session Program filter
5. 	Shows the main function menu

Field Name on Screen	Source	Action
1. Program Name	program	Double-click on a row opens the Projects page for the selected Group
2. Stage	Program	The Program Stage
3. Status	Program	Program status

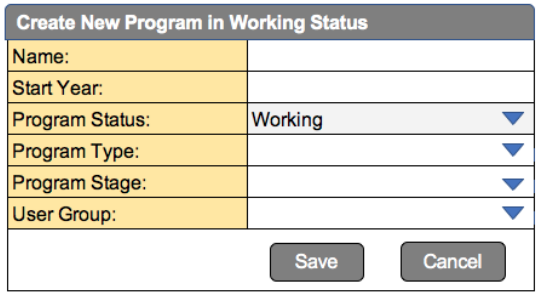

Field Name on Screen	Source	Action
4. Cost (php)	Program	Total Project Costs of all Projects in the Program
5. Year	program	Program start year
6. Number of Projects	Program	Total number of Projects in the Program
7. Number Published	Program	
8. User Group	Program	Name of Group Creator

The actions that can be performed on a Program are:

Program Item	Action	Description
Prog-1	Add	Creates a new program table entry
Prog-2	Edit	Edit certain attributes of a specific Program
Prog-3	Change Status	Change the Program Status field
Prog-4	Copy	Create a copy of an existing Program
Prog-5	Publish	Publish all valid Projects and relevant Component details to the PCMA
Prog-6	Synchronize PIP	Update the proposal status of Projects in the PIP based on their presence in the GAA (now in change status)
Prog-7	Delete	Delete a Program and all its constituent Projects
Prog-8	Calculate EAO	Apply Engineering and Administrative Overhead expenses (EAO) to each Project in the selected Program
Prog-9	Archive	Archive the full contents of a Program to an alternative database
Prog-10	Restore	Restore the full contents of a Program from an alternative database
Prog-11	Export	Export selected Program to EXCEL template
Prog-12	Import	Import Projects in an EXCEL template to a selected Program

9.1.1 Create New Working Program (Prog-1)

This function creates a new Program (Working status) in the Program table.

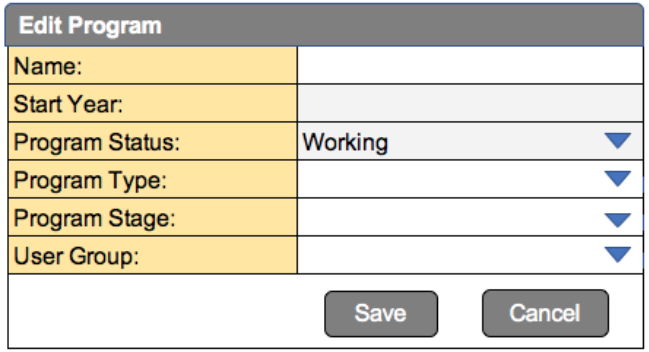

Field Name on Screen	MYPS Table	Source	Data Rules
1. Name *	Program; name	User input	Mandatory; unique
2. Start Year *	Program; yearstart	User input	>= Current Year
3. Program Status	Program; programstatus	Drop-down of Program Status	Mandatory; Default to Working; disabled
4. Program Type *	Program; programtype	Drop-down of Program Types	Mandatory; must select 1 from drop down
5. Program Stage *	programstage	Drop-down of Program Stages	Mandatory; must select 1 from drop down
6. User Group *	mypsuser_security_ug	Drop-down from user security table	Mandatory; must select 1 from drop down

Button Name	Enabling Rules	Action
1. Save	Always	Saves the data supplied, including the username and date of time of creation, creates a record in the Change Log, and closes the form.
2. Cancel	Always	Closes the form without saving.

9.1.2 Edit Working Program (Prog-2)

This function allows the editing of certain Program attributes.

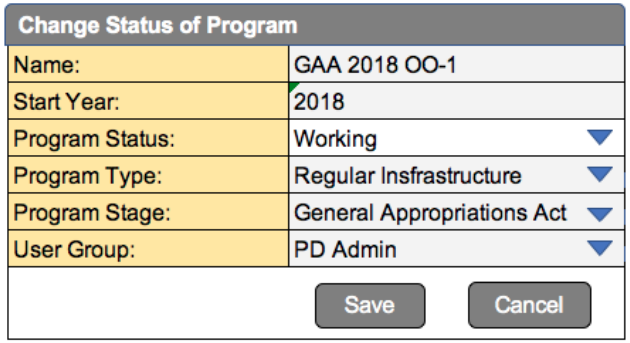

Field Name on Screen	MYPS Table	Source	Data Rules
1. Name *	Program	Added in Create Working Program menu	Mandatory; normal validation rules apply
2. Start Year *	Program	Added in Create Working Program menu item	Disabled
3. Last Year Period	Program	Calculated by MYPS based on First Year Period + 5	Disabled
4. Program Type *	Programtype	Added in Create Working Program menu item	Mandatory; Drop-down box of "Regular Infrastructure" or "External Infrastructure"
5. Program Stage *	programstage	Added in Create Working Program menu item	Drop-down box from table Program Stage
6. User Group *	mypsuser_security_ug	Added in Create Working Program menu item	Drop-down box based on User Groups defined in the Security Settings

Button Name	Enabling Rules	Action
1. Save	Always	Saves the data supplied, including the username and date of time of creation, creates a record in the Change Log, and closes the form.
2. Cancel	Always	Closes the form without saving.

9.1.3 Change Program Status (Prog-3)

This function permits the changing of the Program Status. This is restricted by Program Type and User.

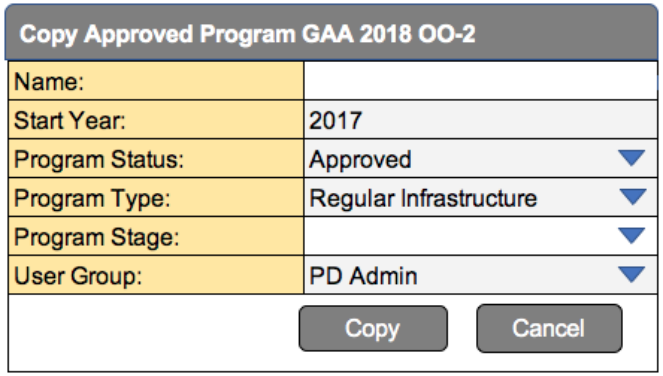

Field Name on Screen	MYPS Table	Source	Data Rules
1. Name	Program; name	Current Program	Disabled
2. Start Year	Program; yearstart	Current Program	Disabled
3. Program Status *	Program; programtype	Drop-down of Program Status	Choose from Dropdown of Program Status showing only "Approved"
4. Program Type	Program; programtype	Current Program	Disabled
5. Program Stage	programstage	Current Program	Disabled
6. User Group	mypsuser_security_ug	Current Program	Disabled

Button Name	Enabling Rules	Action
1. Save	Always	Saves the status change.
2. Cancel	Always	Closes the form without saving.

9.1.4 Copy to New Working Program (Prog-4)

This function permits the copying of a Program (and all its Projects) to another Program which shall be in Working Stats.

Only Approved Programs can be copied

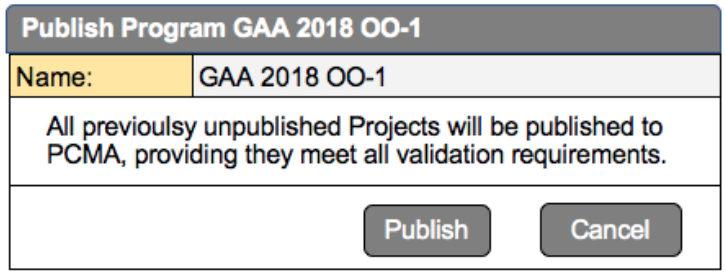

Field Name on Screen	MYPS Table	Source	Data Rules
1. Name *	Program; name	User input	Mandatory; unique
2. Start Year	Program; yearstart	Copied from Source Program	Disabled
3. Program Status	Program; programtype	Copied from Source Program	Default to Working; Disabled
4. Program Type	Program; programtype	Copied from Source Program	Disabled
5. Program Stage *	programstage	Drop-down of Program Stages	Mandatory; must select 1 from drop down
6. User Group	mypsuser_security_ug	Copied from Source Program	Disabled

Button Name	Enabling Rules	Action
1. Copy	Always	Saves the data supplied, including the username and date of time of creation, creates a record in the Change Log, closes the form and copies all source Projects to new Program with all Projects having "Scheduled' status.
2. Cancel	Always	Closes the form without saving.

9.1.5 Publish Program (Prog-5)

This function causes the publishing of not yet published projects to other applications, and is permitted when the Program is GAA, TF or GAA-R or TF-R stage.

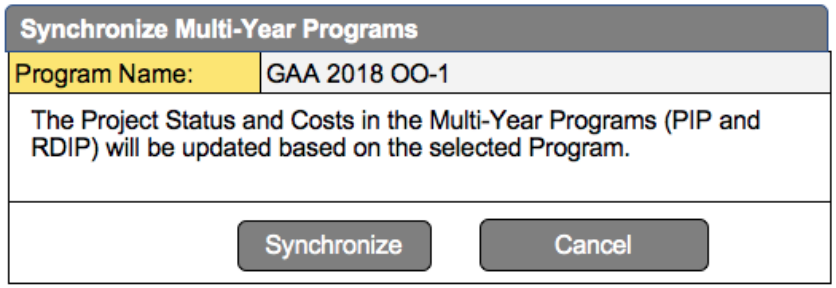

Field Name on Screen	MYPS Table	Source	Data Rules
1. Name	Program; name	Selected Program	Disabled

Button Name	Enabling Rules	Action
1. Publish	Enabled if permitted	Publish all unpublished Projects from the selected Program according to Publishing rules.
2. Cancel	Always	Closes the popup without Publishing.

9.1.6 Synchronize PIP (Prog-6)

This Function synchronizes a chosen Program (usually the GAA) with the PIP and RDIP, to update RDIP/UDIP and PIP Project Status and Project Costs.

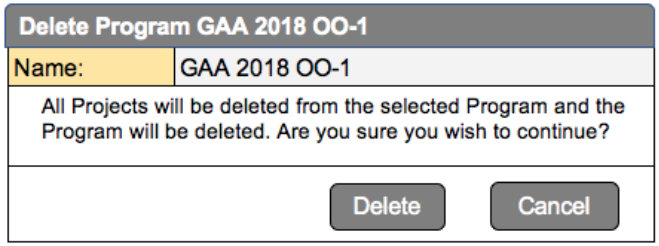

Field Name on Screen	MYPS Table	Source	Data Rules
1. Program Name	Program; name	Selected Program	Disabled

Button Name	Enabling Rules	Action
1. Synchronize	Always	Update PIP and RDIP Programs based on selected Program according to update rules.
2. Cancel	Always	Closes the popup without synchronizing

9.1.7 Delete Program (Prog-7)

This function shall delete a Program, provided i) it is in Working status and ii) None of its Project have been published to other applications.

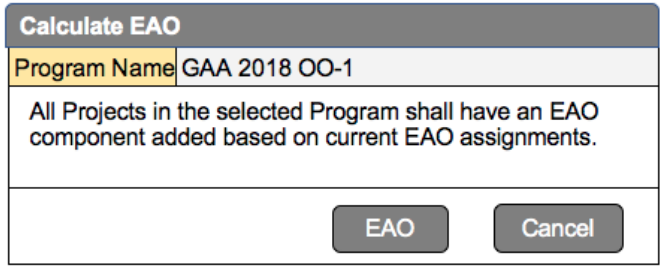

Field Name on Screen	MYPS Table	Source	Data Rules
1. Name	Program; name	Selected Program	Disabled

Button Name	Enabling Rules	Action
1. Delete	Enabled if permitted	Delete all Projects from the Program. Delete the Program Entry.
2. Cancel	Always	Closes the form without deleting.

9.1.8 Calculate EAO (Prog-8)

This function shall examine the selected GAA Program and calculate EAO Components for all Projects that do not yet have EAO.

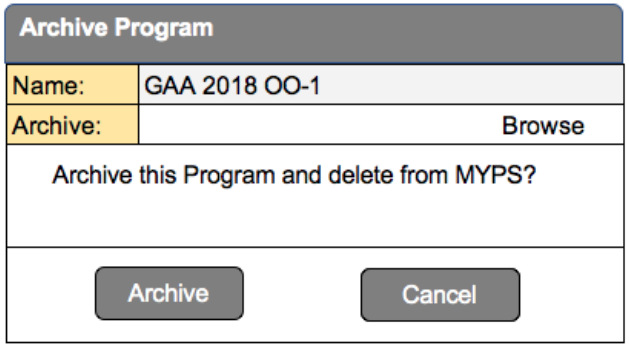

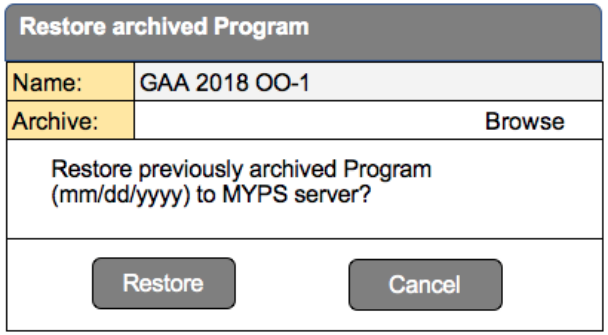

Field Name on Screen	MYPS Table	Source	Data Rules
1. Name	Program; name	Selected Program	Disabled

Button Name	Enabling Rules	Action
1. EAO	Enabled if permitted	Calculates and creates EAO components as per the business rules.
2. Cancel	Always	Closes the form without any action.

9.1.9 Archive or Restore Program (Prog-9) (Prog-10)

This function shall archive or restore a Program according to the appropriate business rules.

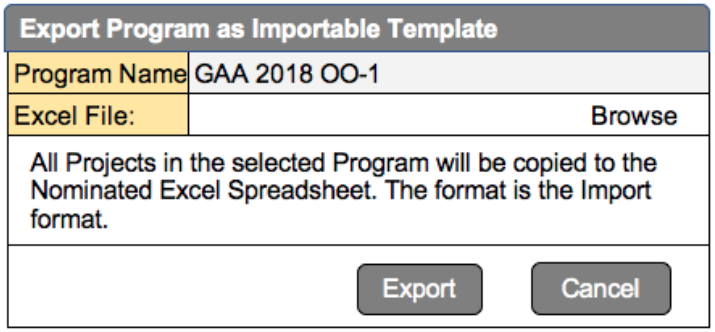

Field Name on Screen	MYPS Table	Source	Data Rules
1. Name	Program; name	Selected Program	Disabled
2. Archive		User supplied location of archive	Enabled

Button Name	Enabling Rules	Action
1. Archive/Restore	Enabled if permitted	Validate business rules, and archive or restore if OK. On completion, indicate the number of Projects archived or restored.
2. Cancel	Always	Closes the form without any action.

9.1.10 Export Program (Prog-11)

This function permits the exporting of a selected Program to a spreadsheet in the format of the standard Import template.

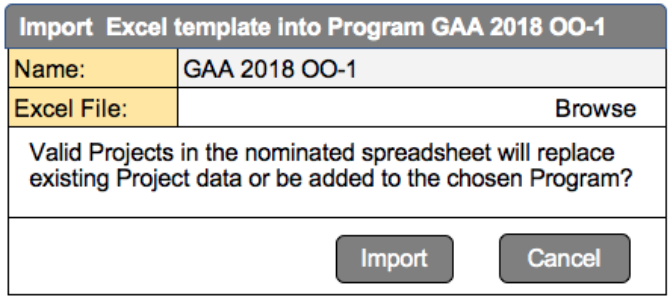

Field Name on Screen	Field Type	MYPS Table	Source	Data Rules
1. Program Name *		Program	User selected	
2. Excel File *	Varchar	All relevant tables	User selected	A valid EXCEL file/folder name and file

Button Name	Enabling Rules	Action
1. Browse	Always	Permits the selection of folder/filename containing the EXCEL spreadsheet
2. Export	Always	Export all Projects from the selected Program into nominated spreadsheet in a format suitable for reimport.
3. Cancel	Always	Closes the popup without Exporting.

9.1.11 Import Program (Prog-12)

This function permits the importing of Project details to either populate or update Projects in the target Program.

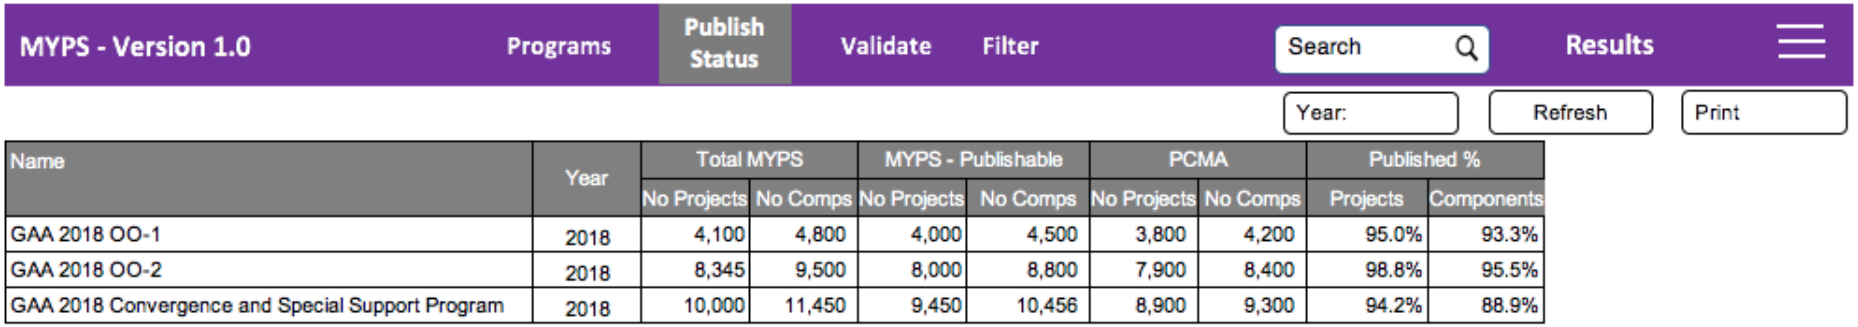

Field Name on Screen	Field Type	MYPS Table	Source	Data Rules
1. Excel File:	Varchar		User selected	Template and data must follow validation requirements

Button Name	Enabling Rules	Action
1. Browse	Always enabled	Permits the selection of folder/filename containing the EXCEL spreadsheet
2. Import	Enabled if permitted	Import all Projects into the selected Program according to the prescribed import validation rules
3. Cancel	Always	Closes the popup without Importing.

9.2 Publish Status Screen

This screen displays the publishing status of all Programs. These can be filtered by Year.

Name	Year	Total MYPS		MYPS - Publishable		PCMA		Published %	
		No Projects	No Comps	No Projects	No Comps	No Projects	No Comps	Projects	Components
GAA 2018 OO-1	2018	4,100	4,800	4,000	4,500	3,800	4,200	95.0%	93.3%
GAA 2018 OO-2	2018	8,345	9,500	8,000	8,800	7,900	8,400	98.8%	95.5%
GAA 2018 Convergence and Special Support Program	2018	10,000	11,450	9,450	10,456	8,900	9,300	94.2%	88.9%

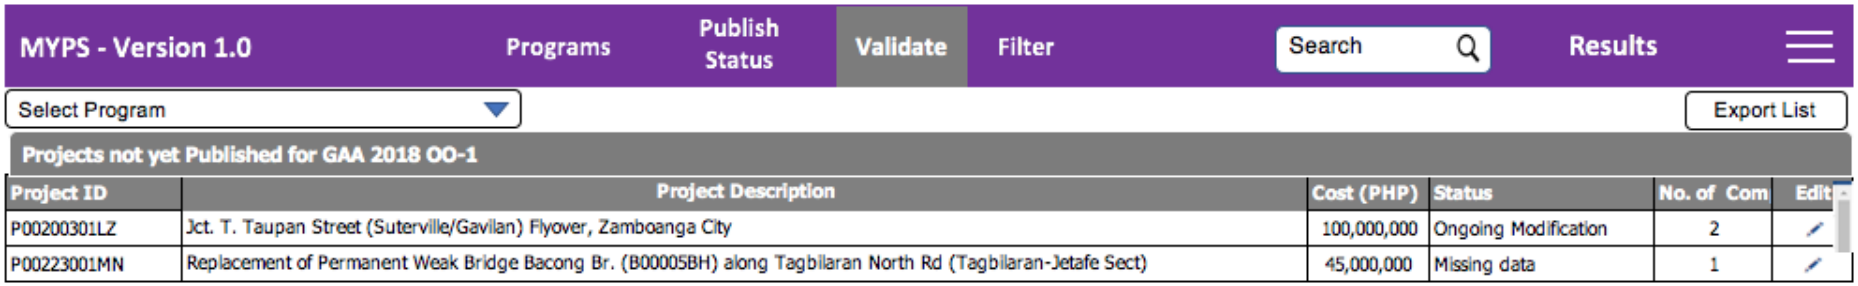

Field Name on Screen	Source	Action
1. Program Name	program	
2. Year	program	Program start year
3. MYPS: Number of Projects		Total number of Projects in the Program
4. MYPS: Number of Components		Total number of Components in the Program
5. MYPS: Number Publishable Projects		Total number of Publishable Projects in the Program
6. MYPS: Number Publishable Components		Total number of Publishable Components in the Program
7. PCMA: Number of Projects	Pcma_Project	Total number of Projects in the Program
8. PCMA: Number of Components	Pcma_ProjectComponent	Total number of Components in the Program
9. Percentage Publishable Projects published		Field 7 divided by 5
10. Percentage Publishable Components published		Field 8 divided by 6

The actions for this screen are:

- Year: filter the list by selected Program year
- Refresh: Recalculate the data shown in the report
- Print: Print the Publishing Status Report

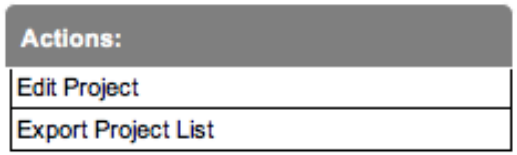

9.3 Validate Screen

This screen displays a list of the Projects that were not published.

Field Name on Screen	Source	Action
1. Project ID	Project	Project ID: double clicking will show the Project Module
2. Description	Project	Project description
3. Cost	Project	Project Cost
4. Status		The reason for not being published
5. Number of Components	Project Component	The number of components in the Project

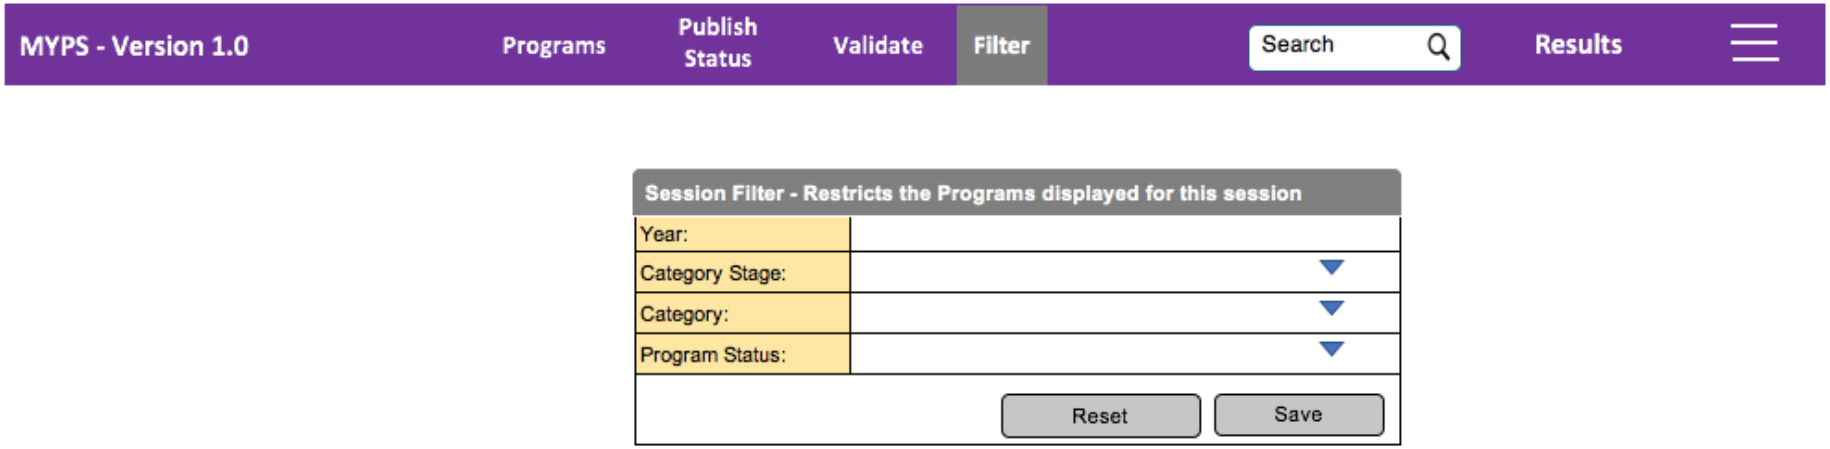

The actions for this screen are:

Export Project will export the displayed data as a spreadsheet.

9.4 Program Filter

This function represents a Session-only Program filter to restrict the Programs displayed in lists or Programs being search. The presence of such a filter shall be made clear in the screen.

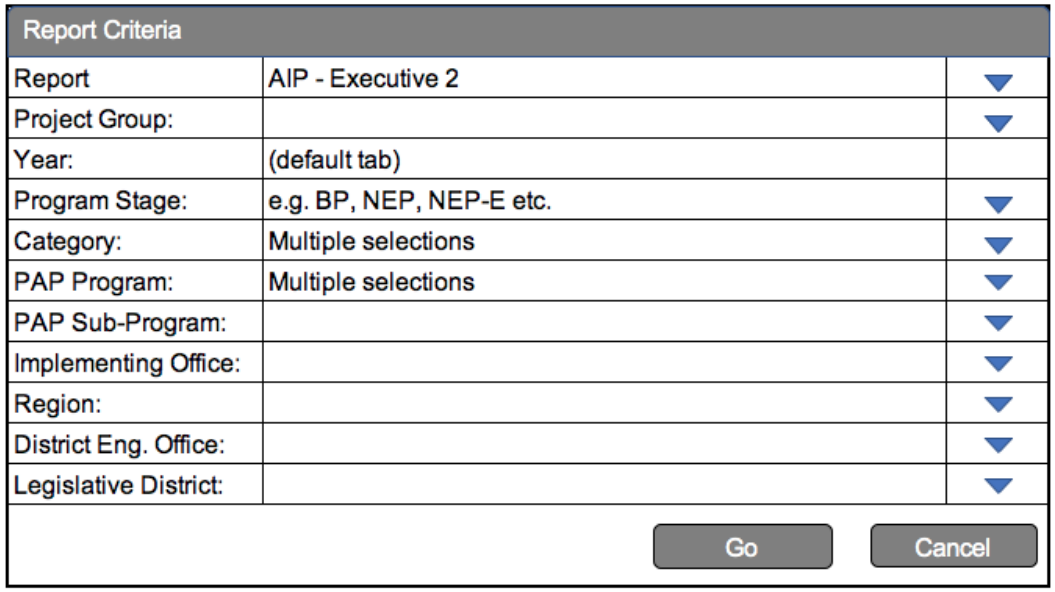

The Filter Screen allows filtering (active for the session) of Programs to be shown and searched:

Field Name on Screen	Source	Action
1. Year	Program	Program Start Year
2. Category Stage	Program Stage	Program Stage
3. Category	Program	Program Category
4. Program Status	Program	Program Status

Button Name	Enabling Rules	Action
1. Reset	Always	Clear all filter settings
2. Save	Always	Save and apply selections

9.5 Reports Selection

This screen allows the selection of a Report and the specification of the filters to be applied to the Report.

Field Name on Screen	Source	Action
1. Report	Report List	User selects Report to be printed; selection determines enabling of selection criteria and possible prefilling (also based on logged in User)
1. Project Group	ProjectGroup	Optional; multiple selection; Projects printed constrained to Projects in selected Groups
2. Year	Program; Startyear	Funding Year; single selection
3. Program Stage	Program; Program Stage	Optional; single selection; Program selection constrained to Programs with selected Stage
4. Category	Program; category	Optional single selection; Program Category
5. PAP Program	Program; thrust	Optional; multiple selection; Projects printed constrained to Projects with this PAP Program
6. PAP Sub Program	Program; thrust	Optional; multiple selection; Projects printed constrained to Projects with this PAP Sub Program
7. Implementing Office	Projectoffices;io code	Optional; multiple selection; Projects printed constrained to Projects with this IO

Field Name on Screen	Source	Action
8. Region	Projectoffices;deo_code Ro_deo; region	Optional; multiple selection; Projects printed constrained to Projects in this Region
9. District Engineering Office	Projectoffices;deo_code	Optional; multiple selection; Projects printed constrained to Projects in this DEO
10. Legislative District	Projectoffices;ld_code	Optional; multiple selection; Projects printed constrained to Projects with this LD

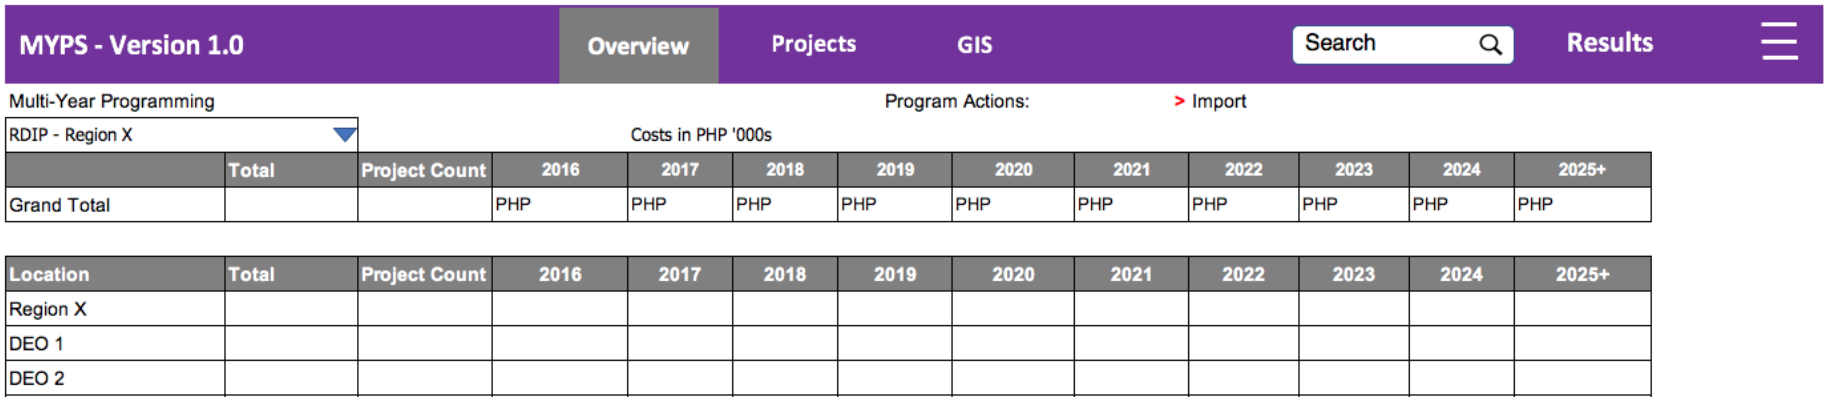

Button Name	Enabling Rules	Action
1. Go	Always	Prepare data and report. If the selection of criteria returns zero (0) records, display an information message
2. Cancel	Always	Exit screen without any printing

10 Multi-Year Module

This Module controls the functions required for Multi-Year Programming. The target Programs are the RDIP and UDIP for Regions and UPMO Clusters and the PIP for the DPD-PS PIP Planning office. Initial display based on logged in User.

10.1 Overview Screen

This screen summarizes the total value of the Projects in the RDIP, UDIP or PIP programs.

Field Name on Menu	Comments
1. Overview	Selects the Overview page; summarizes the current allocations
2. Details	Selects the Details page; allows normal manipulation of Projects
3. GIS	Selects the GIS page
4. Profile	Selects the Project Profile page
5. 	Shows the main function menu

Field Name on Screen	Source	Action
6. Program Name	program	Shows the current Program; auto filtered to appropriate Program based on the User.

Field Name on Screen	Source	Action
7. Total	Program	The total Program allocation for all years
8. Project Count	Program	The number of Projects identified in the Program
9. Year 2016 - onwards	Program	The total cost by implementation year

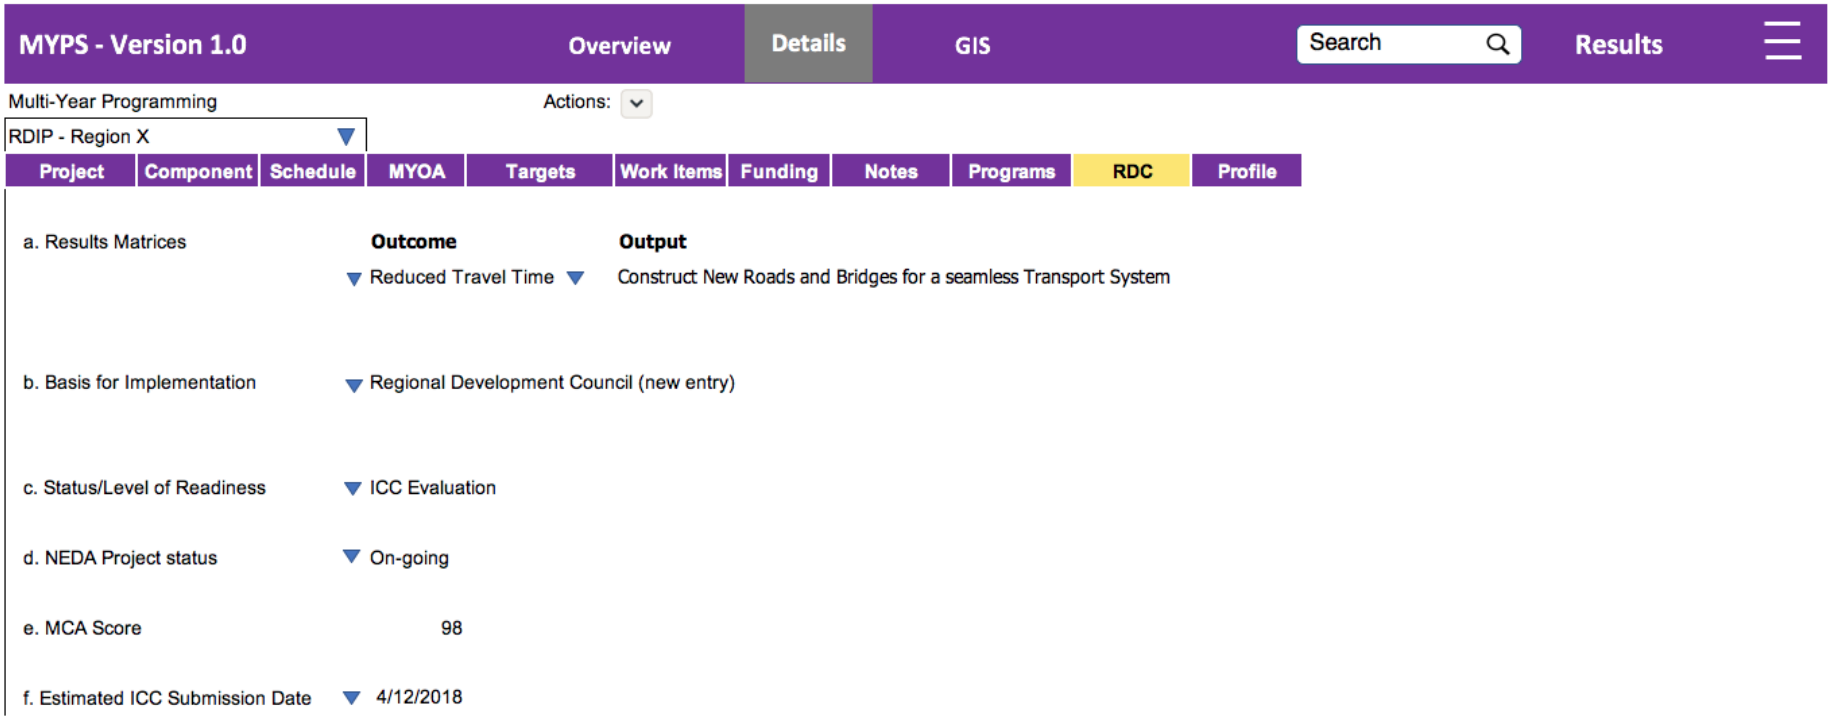

The next table breaks down the total by Region/UPMO, then by DEO, then by LD

Field Name on Screen	Source	Action
1. Region/DEO Name	program	Shows the current Program; auto filtered to appropriate Program based on the User.
2. Total	Program	The total Program allocation for all years for the Region/DEO
3. Project Count	Program	The number of Projects identified in the Program for the Region/DEO
4. Year 2016 - onwards	Program	The total cost by implementation year for the Region/DEO

Button Name	Enabling Rules	Action
1. Import	Always	Permits the Import from template of new RDIP, UDIP or PIP projects

10.2 RDC Tab

This tab shows the Regional Development Council evaluation data only relevant to Multi-year Programming.

Field Name on Screen	Source	Action
1. Results Matrices	LongtermProjects	User chooses combinations of Outcome and Output. One output per Outcome.
2. Outcome	LongtermProjects	Mandatory; Drop down list of Outcomes
3. Output	LongtermProjects	Mandatory; Drop down list of Outputs/based on selected Outcome
4. Basis for Implementation	LongtermProjects	Mandatory; Drop down list of Outcomes
5. Status Level of Readiness	LongtermProjects	Mandatory; Drop down list of Status Level of Readiness

Field Name on Screen	Source	Action
6. NEDA Project Status	LongtermProjects	Mandatory; Drop down list of NEDA Project Status
7. MCA Score	Project/mcascore	Result of conducting MCA
8. Estimated ICC submission date	LongtermProjects	Optional; Choose from date picker

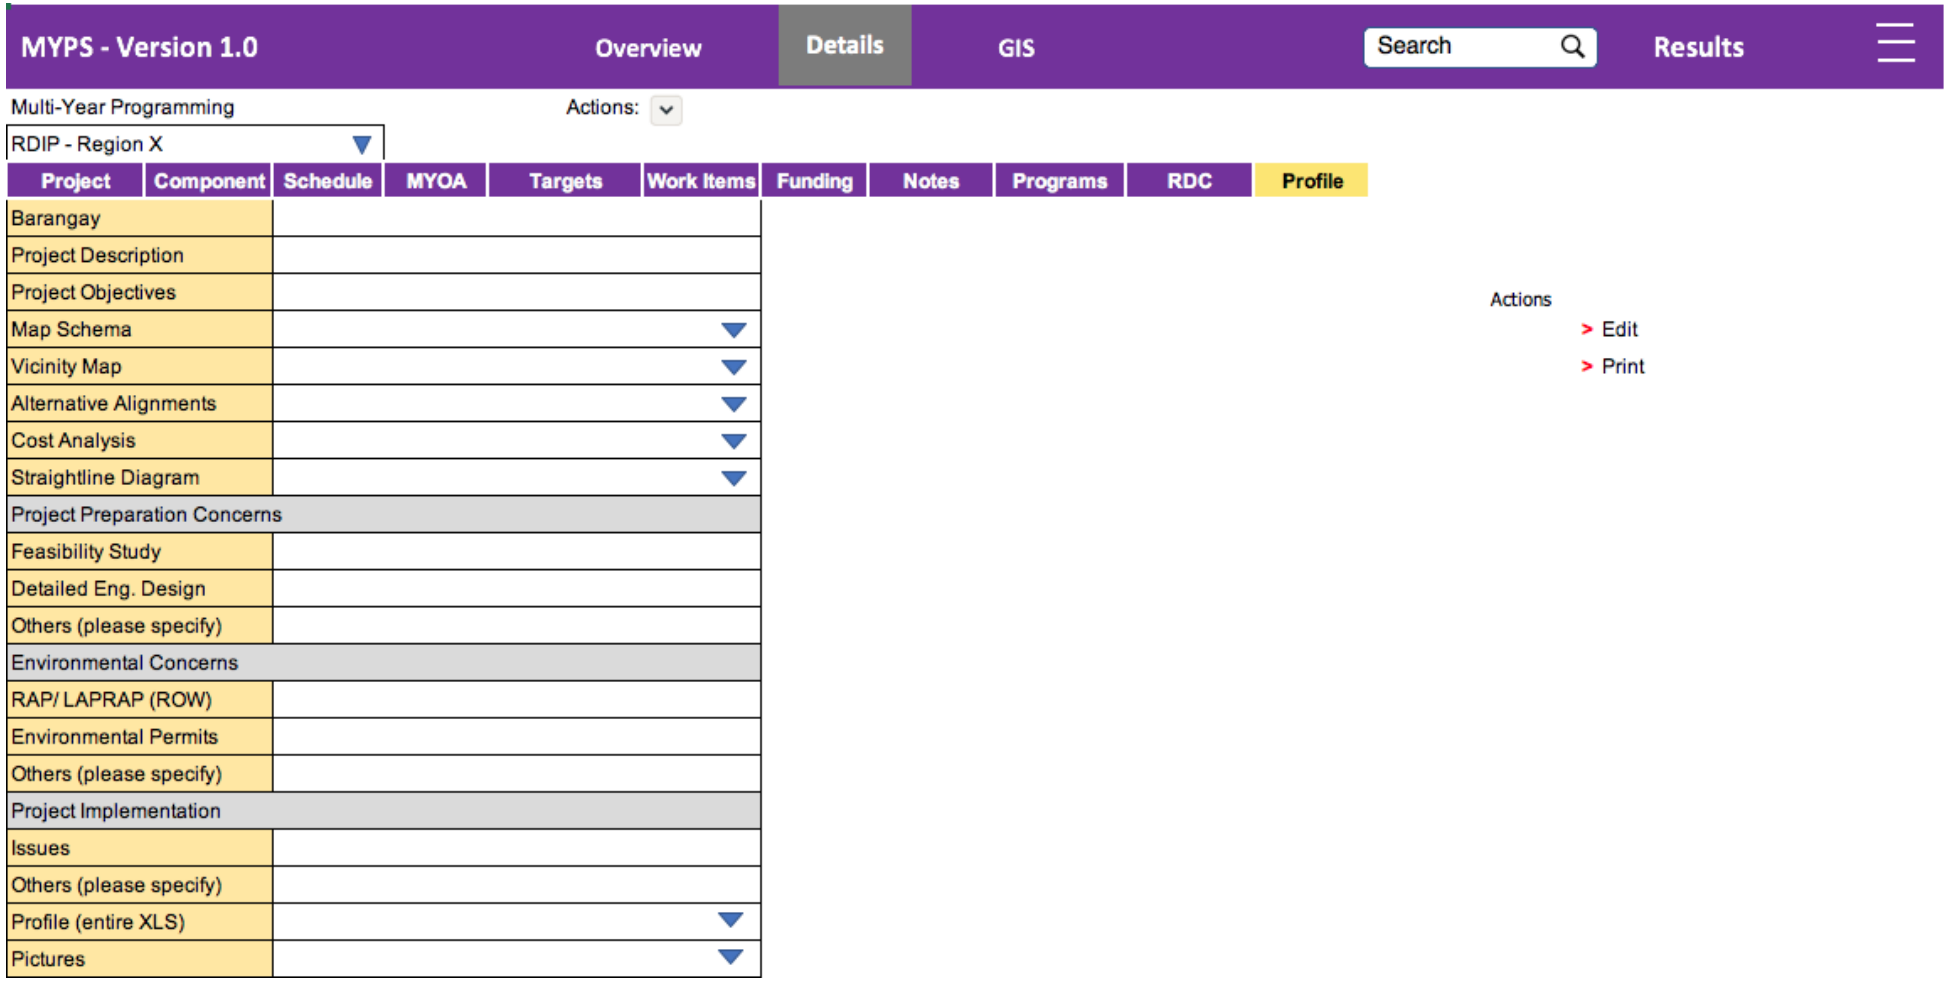

The possible actions are:

Edit the details

Run the MCA. (see Section 7.1.6)

10.3 Profile Tab

This tab shows the Project Profile dat only relevant to Multi-year Programming.

See Section 7.1.8 for description.

The possible actions are:

Edit the details

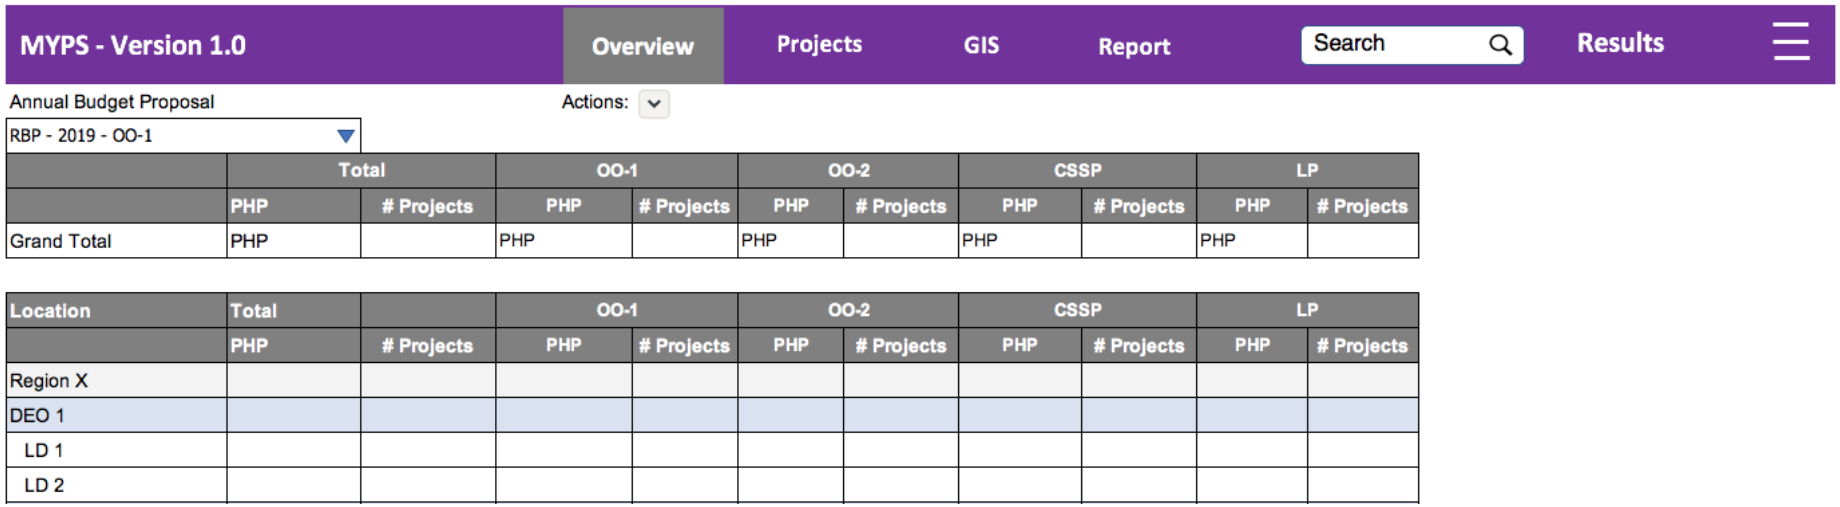

Print the Profile Report.

11 Annual Budget Module

This Module controls the functions required for Annual Budget Preparation. The target Programs are the RBP and UBP for Regions and UPMO Clusters and the BP for the PS. Initial display based on logged in User.

11.1 Overview Screen

This screen summarizes the total cost of the Regional or Central Budget Proposals.

Field Name on Menu	Comments
1. Overview	Selects the Overview page; summarizes the current allocations
2. Projects	Selects the Details page; allows normal manipulation of Projects
3. GIS	Selects the GIS page
4. Report	Selects the Reports page
5. 	Shows the main function menu

Field Name on Screen	Source	Action
6. Program Name	program	Shows the current Program; auto filtered to appropriate Program based on the User.
7. Total Count	Program	The number of Projects in the four key Programs
8. Total Cost	Program	The total cost of Projects in the four key Programs
For each of the four key Programs, OO-1, OO-2, CSSP and LP, show the total count and Cost		

The next table breaks down the above totals by Region/UPMO, then by DEO, then by LD

Button Name	Enabling Rules	Action
1. Import	Always	Permits the Import from template of new RDIP, UDIP or PIP projects
2. Submit	Always	Submits the RBP/UBP or BP program: changes the Program status to Approved
3. Unlock	Always	CO permits further edits to the RBP/UBP Program; changes the Program status to Working
4. Print	Always	Print RDC, or BP depending on User

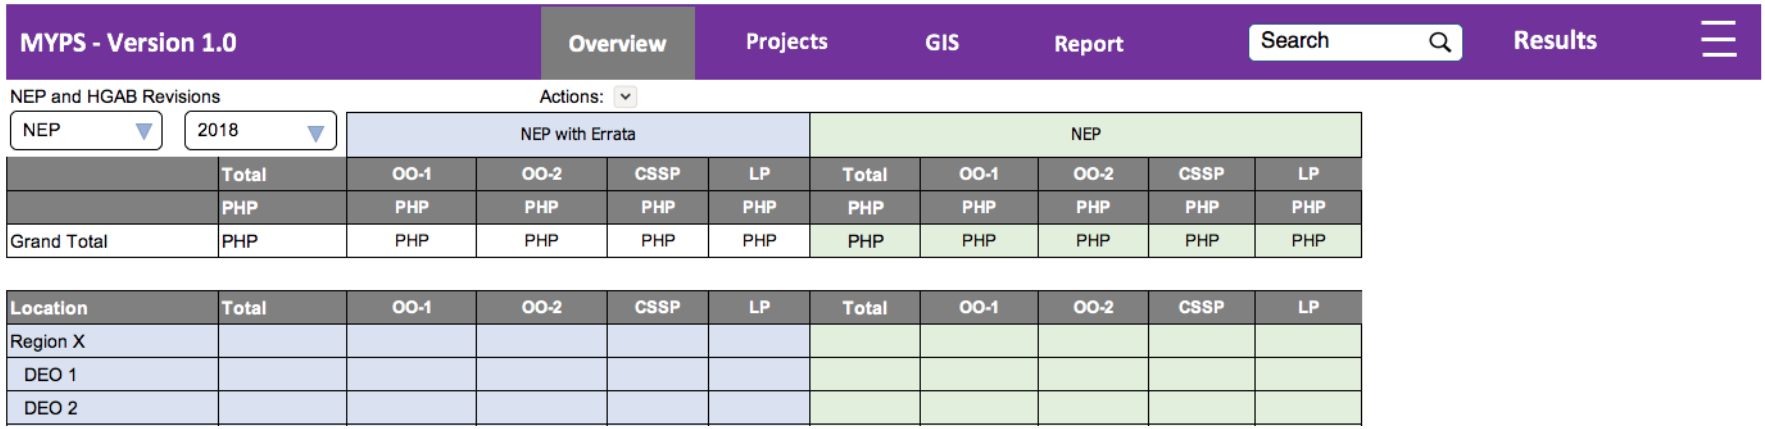

Submit and Unlock are variants of the Change Program Status.

12 NEP-E and HGAB-A Module

This Module controls the functions required for Annual Program revisions of NEP with Errata and HGAB with Amendments. The target Programs are the NEP-E and HGAB-A. Initial display based on logged in User.

12.1 Overview Screen

This screen summarizes the total costs of the revised programs compared to the approved Program. Operation of NEP-E and HGAB-A are identical. The user chooses either NEP or HGAB from the dropdown, and the year.

Field Name on Menu	Comments
1. Overview	Selects the Overview page; summarizes the current allocations
2. Details	Selects the Details page; allows normal manipulation of Projects
3. GIS	Selects the GIS page
4. Report	Selects the Reports page
5. 	Shows the main function menu

Field Name on Screen	Source	Action
1. NEP/HGAB	Program	User chooses NEP or HGAB
2. Year	Program Year	User chooses the year
Compares the revision costs to the master costs for the 4 key Programs		
3. Total Cost	Program	The total cost of Projects in the four key Programs
For each of the four key Programs, OO-1, OO-2, CSSP and LP, show the total Cost		

The next table breaks down the above totals by Region/UPMO, then by DEO, then by LD

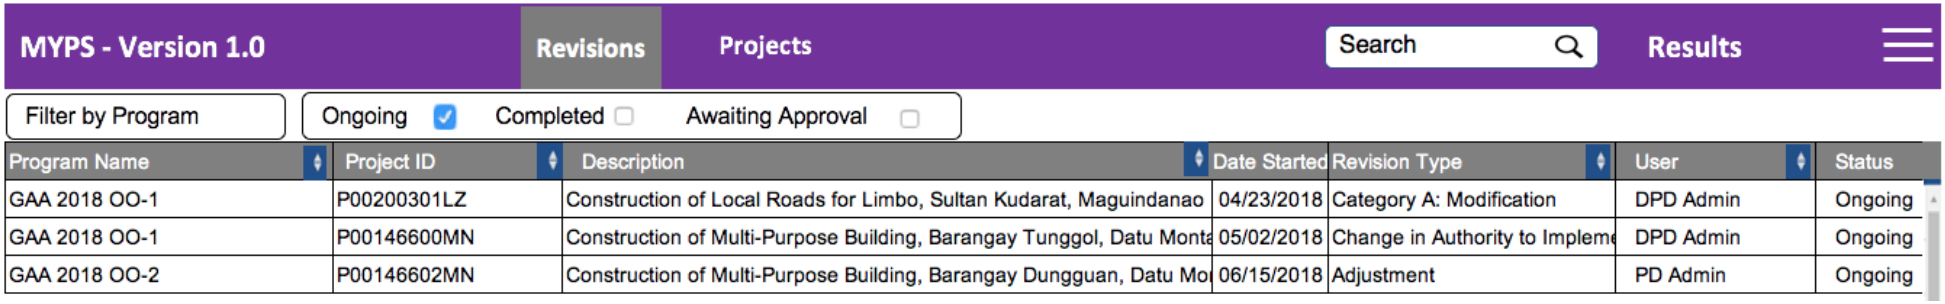

Button Name	Enabling Rules	Action
1. Submit	Always	Submits the NEP or HGAB revised program: changes the regional/UPMO lock (as all regions are in the same Program); increments the revision number by 1; 7 is the maximum allowed
2. Unlock	Always	CO permits further edits to the NEP/HGAB Program; clears the regional/UPMO lock.
3. Print	Always	Print the Errata or HGAB amendments reports

Submit and Unlock set or unset the Region Code locking where multiple regions or districts or UPMO are operating on the same Program e.g. NEP with Errata, HGAB with Amendments.

13 Programming Module

13.1 General Screen

The Programming module will show the following screen. The contents of the page are based on the

Field Name on Menu	Comments
1. Revisions	Selects the Revisions page; summarizes the current ongoing (uncompleted) or Completed Project Revisions
2. Projects	Selects the Projects page; allows the start of, or completion and publishing of a Project.
3. 	Shows the main function menu

Clicking on a row shall open the Projects screen; showing the original and modified Project Data.

Field Name on Screen	MYPS Table	Source	Data Rules
1. Program *	Pcma_project_revision	Programid	Disabled; based on filtering
2. Project ID *	Pcma_project_revision	Project ID	Disabled
3. Project Description *	Project	name	Disabled
4. Date Started *	Pcma_project_revision	Date revision started	Disabled
5. Revision Type *	Modification Classification:	Based on revision type selected by User	Disabled
6. User	pcma_project_revision	User	Disabled; user who started the Revision

Field Name on Screen	MYPS Table	Source	Data Rules
7. Status	pcma_project_revision	Status of Publication	Disabled; one of Ongoing, Published, Awaiting Approval

Button Name	Enabling Rules	Action
1. Filter by Program	Always	Filters the displayed Projects by Program; multiple sections possible
2. Ongoing	Always	Filters the displayed list based on whether the revision is ongoing
3. Completed	Always	Filters the displayed list based on whether the revision has been published
4. Awaiting Approval	Always	Filters the displayed list based on whether the revision has been submitted, and is awaiting approval

13.2 Project Screen

The Project screen is the standard Project data display screen and for the Programming module shall compare:

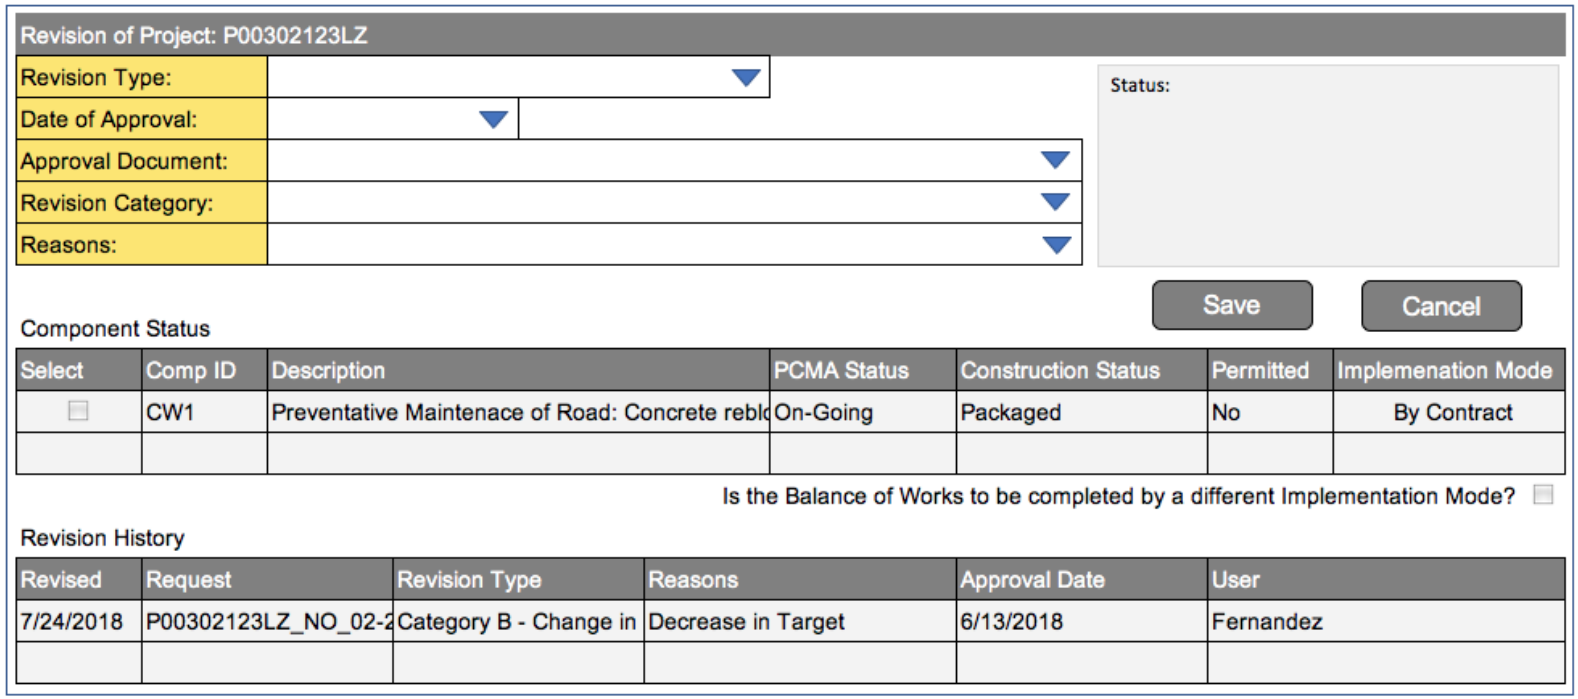

- Pending Revised Project
- GAA With Revisions data (prior to revision)

The actions shall include, apart from normal project actions:

Revision Item	Action	Description
Rev-1	Initiate	Commences a Revision and stores relevant data
Rev-2	Compile required changes	User modifies aspects of the Project and its details as required by the approved change (Standard Project Functions as permitted by the business rules of the Revision)
Rev-3	Submit Revision	Lock the Revision and its original Project
Rev-4	Publish	Completes the Revision transaction and publishes required changes
Rev-5	Cancel Revision	Cancels the entire Revision
Rev-6	Disapprove Revision	Flags the Project has had the revision disapproved

13.3 Initiate Revision Screen (Rev-1)

The Revision screen will take the following format:

Field Name on Screen	MYPS Table	Source	Data Rules
1. Revision Type *	Modification Classification: code_description	User selected;	Based on selection and associated business rules, this revision may not be allowed, or the Is Balance of Works question shall appear. First five revision types are Modifications.
2. Date of Approval *	pcma_project_revision	User input	For all projects <= Today's date; other rules based on Revision type selection; Optional - if Regional/District/UPMO user (this date is not yet known). Mandatory for other Users

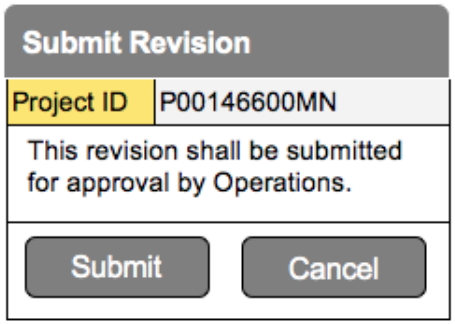

Field Name on Screen	MYPS Table	Source	Data Rules
3. Approval Document *	pcma_project_revision	User input	To path specified in the MYPS initialization file for Scanned Documents. File Name is according to file naming convention. Optional - if Regional/District/UPMO user (this date is not yet known). Mandatory for other Users
4. Revision Category *	Modification Classification: code_description	Drop down list of Revision Categories	Category as shown on the Approved Request form; may be prefilled for some revision types
5. Revision Reason(s)*	Modification reasons: code_description	Drop down list of Revision Reasons by Category	Reasons as shown on the Approved Request Form Reasons based on selected Category; multiple selections allowed
6. Status		MYPS application	Indication (if needed) as to whether this revision is possible or not.
Component Status			
7. Select		User selected	Enabled if relevant to specific revision type Selectable if eligible for specific revision type
8. Project Component ID	Project Components: Component ID	Based on Selected Project	Disabled
9. Description	Project Components: Component Description	Based on Selected Project Component	Disabled
10. PCMA Status	PCMA view: component status	If present in PCMA, show the status of the view; if not in PCMA show a reason why, as per column to left	Disabled: one of: i) Not Yet Published ii) Do Not Publish iii) Unpublished Reason iii) may be due to Non Implementable for example
11. Construction Status	PCMA view: component construction status	If present in PCMA, show the status of the view	Disabled
12. Permitted		Yes or No	Disabled: Based on the business rules for the chosen revision type and the status of the PCMA

Field Name on Screen	MYPS Table	Source	Data Rules
13. Implementation Mode	PCMA view: component construction status	If present in PCMA, show the status of the view	Disabled
Is the Balance of Works to be completed by a different implementation mode?			
1. Check Box		User selected	This prompt is only visible for Termination; enabled if allowed by business rules.
Revision History (all fields disabled)			
2. Revision Date	Pcma_project_revision	previous revision dates	Sort descending order of date
3. Request	Pcma_project_revision	URL/file name of approval document	View of document possible if server access granted
4. Revision Type	Pcma_project_revision	Type of revision (Category)	View only
5. Reasons	Pcma_project_revision	Display the selected revisions	View only
6. Approval Date	Pcma_project_revision	Date of approval	View only
7. User	Pcma_project_revision	User who published the revision	View only

Button Name	Enabling Rules	Action
1. Save	Disabled if: • Active revision/modifications exist • This revision is not allowable based on Project status Otherwise enabled when fields are all completed	Saves the details of the Project(s) for revision and closes the form. Does not Publish yet. For some revisions, the action is automatically commenced and possibly published.
2. Cancel	Always	Closes the form without saving.

13.3.1 Submit Revision (Rev-3)

This function shall submit the Revision for approval. This action locks the Revision.

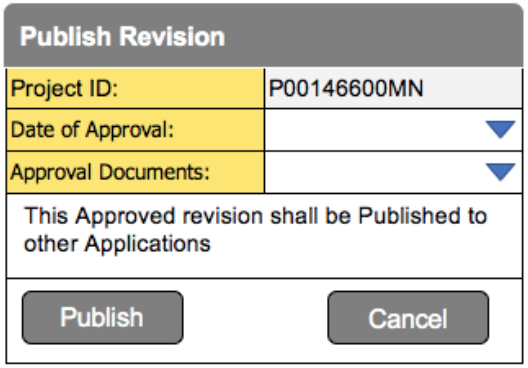

Field Name on Screen	MYPS Table	Source	Data Rules
1. Project ID	Pcma_project_revision	User selected;	Based on the selected Project

Button Name	Enabling Rules	Action
1. Submit	Always	Sets the Revision flag to "Submitted"
2. Cancel	Always	Exit without any action

13.3.2 Publish Revision (Rev-4)

This function shall publish the revision. A revision may have been previously submitted which is the case of Regional or District entry of the Revision. If PD-PS have entered the revision and are publishing it, the Date of Approval and Approval Documents shall be disabled (as they were entered at revision initiation time).

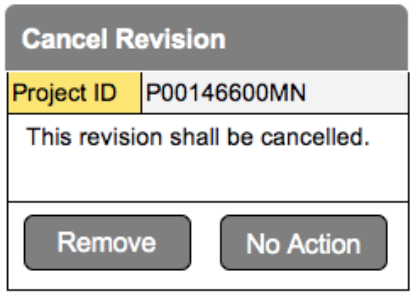

Field Name on Screen	MYPS Table	Source	Data Rules
1. Project ID	Pcma_project_revision	User selected;	Disabled; Based on selection
2. Date of Approval	Pcma_project_revision	User selected;	Disabled if the Revision was entered by PD-PS after approval already granted; Mandatory/Enabled if the Revision was entered by RPC/DPC/UPC prior to approval
3. Approval Documents	Pcma_project_revision	User selected;	Disabled if the Revision was entered by PD-PS after approval already granted; Mandatory/Enabled if the Revision was entered by RPC/DPC/UPC prior to approval

Button Name	Enabling Rules	Action
1. Publish	Always	All the Publishing rules for the revision shall be enacted and if OK the Project is published.
2. Cancel	Always	Exit without any action

13.3.3 Cancel Revision (Rev-5)

This function shall cancel the Revision. This action cancels all trace of the Revision. Only ongoing or submitted revisions can be cancelled.

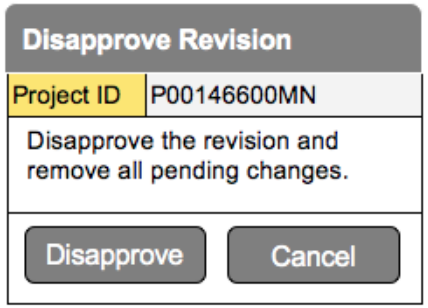

Field Name on Screen	MYPS Table	Source	Data Rules
1. Project ID	Pcma_project_revision	User selected;	Based on the selected Project

Button Name	Enabling Rules	Action
1. Remove	Always	Removes all trace of the revision from pending program
2. No Action	Always	Exit without any action

13.3.4 Disapprove Revision (Rev-6)

This function shall disapprove the Revision. This action closes the Revision. Only ongoing or submitted revisions can be disapproved.

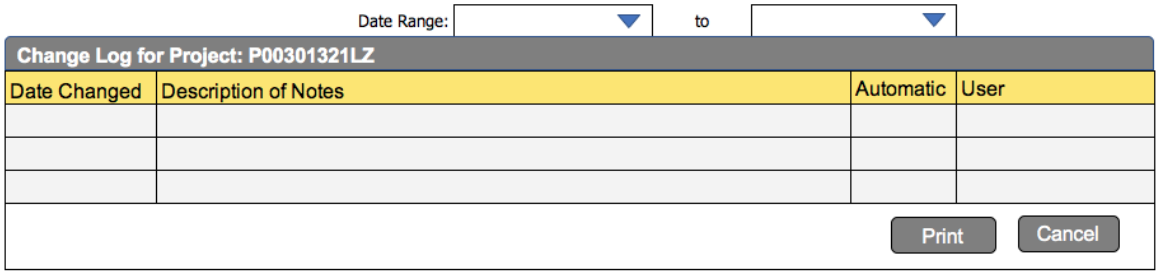

Field Name on Screen	MYPS Table	Source	Data Rules
1. Project ID	Pcma_project_revision	User selected;	Based on the selected Project

Button Name	Enabling Rules	Action
1. Disapprove	Always	Deletes the pending revision data, closes the revision as per the rules
2. No Action	Always	Exit without any action

14 Other Miscellaneous Screens

14.1 Change Log Screen

This screen shows the Change log for a selected project and date range.

Field Name on Screen	MYPS Table	Source	Data Rules
1. Date Changed	changelog	Selected Project ID	Disabled
2. Change Description	changelog	Selected Project ID	Disabled
3. User	changelog	Selected Project ID	Disabled
4. Computer	changelog	Selected Project ID	Disabled

Button Name	Enabling Rules	Action
1. From	Always	Displays only those changes within the From and To dates
2. To	Always	Displays only those changes within the From and To dates
3. Print	Always	Prints the Change Log for the specified dates.
4. Close	Always	Closes the form.

14.2 Simple Search

This frame menu item allows a quick search for Project ID.

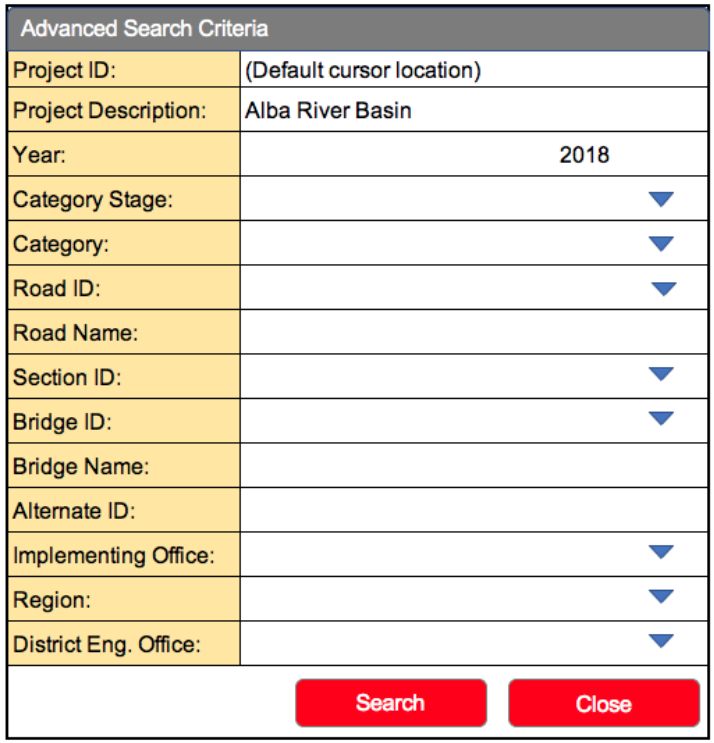

Field Name on Screen	MYPS Search Table	Source	Data Rules
1. Project ID	Project	User input	Exact or partial match of User Input

Button Name	Enabling Rules	Action
1. Search	Always	Searches the MYPS Project database against the selected Project ID. If any results are found, opens the Search Results screen. If no results are found, a "No Results Found" message is displayed.

14.3 Advanced Search

This function allows advanced searching of Projects. It can be activated from the Simple Search button.

Field Name on Screen	MYPS Search Table	Source	Data Rules
1. Project ID	Project	User input	
2. Project Description	Project	User input	
3. Year	Program	User input	YYYY format
4. Category Stage	Program	Drop Down list from Program Stage	Multiple selections

Field Name on Screen	MYPS Search Table	Source	Data Rules
5. Category	Program	Drop Down list from Category table	Multiple selections
6. Road ID	Activity	Drop Down list road table	Single selection
7. Road Name	Activity and Road	User entered	
8. Section ID	Activity	Drop Down list road section table	Single selection
9. Bridge ID	Activity	Drop Down list from Bridge	Single selection
10. Bridge Name	Activity and Bridge	User entry	
11. Alternate ID	Project	User entry	
12. Implementing Office	Projectoffices	Drop Down list from Admin_implementing_office	Single selection
13. Region	Projectoffices	Drop Down list ro_deo	Single selection
14. Dist. Engineering Office	Projectoffices	Drop Down list ro_deo	Single selection

Button Name	Enabling Rules	Action
1. Search/OK	Always	Searches the MYPS database against the selected criteria. If any results are found, opens the Search Results screen. If no results are found, gives a "No Results Found" message.
2. Close	Always	Closes the search window.

14.4 Search Results - Projects

This Popup shows the results of the last search and allows the User to select and copy displayed information. The User shall be allowed to display the results again to choose another Project, without having to rerun the search.

Project ID	Description	Cost (php)	Year	Program
P00148043MN	Construction of Local Roads for Limbo, Sultan Kudarat, Maguindanao	216,000	2017	GAA 2017 LFP with Revisions
P00148194MN	Construction of Water System (Level II), Mamasapano, Maguindanao	34,000	2017	GAA 2017 LFP with Revisions
P00146600MN	Construction of Multi-Purpose Building, Barangay Tunggol, Datu Montawal, Maguindanao	19,935,160	2018	GAA 2017 LFP with Revisions

Field Name on Screen	Source	Action
1. Project ID	MYPS Project table	Double-click opens the Projects Screen showing the instance of the Project in the associated Program
2. Description	MYPS Project table	
3. Category	MYPS Project table	
4. Origin	MYPS Project table	
5. Program Name	Added in Create Working Program menu item	Drop-down box of "Regular Infrastructure" or "External Infrastructure"
